

Instructions to change folder color - Folder

In a computer with a lot of folders, you want to distinguish the folders for different jobs for easy searching. Folder Highlight software can help you do that by changing the folder color so you can easily identify the folder.

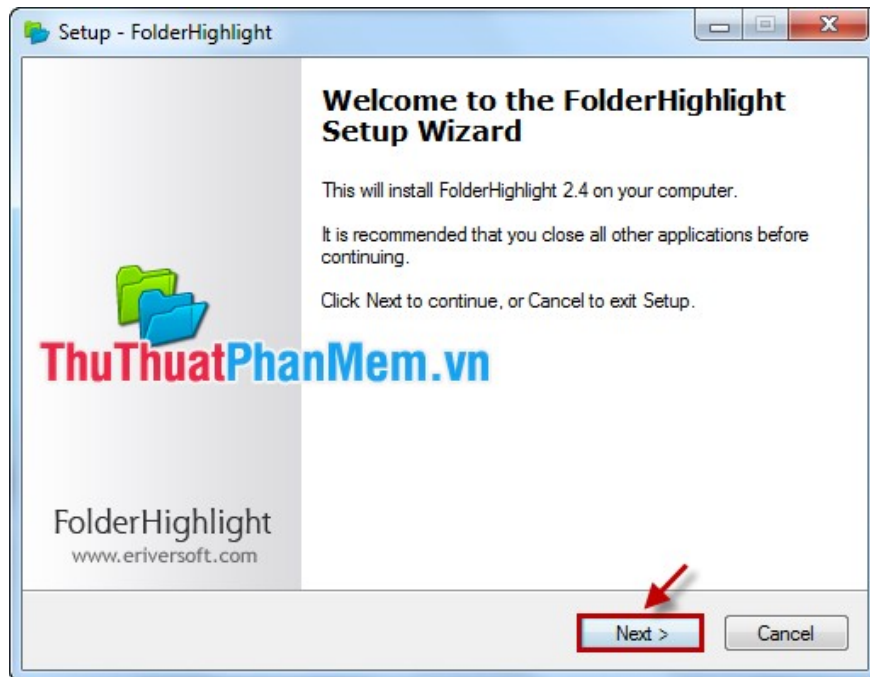

In a computer with a lot of folders, you want to distinguish the folders for different jobs for easy searching. Folder Highlight software can help you do that by changing the folder color so you can easily identify the folder.

The color changing folders are both beautiful and not boring with the default yellow folder for Windows. You can mark important folders by swapping them with the same folder color to make it easier to manage. Folder Highlight also helps you make your computer more unique with many colors to suit your own preferences.

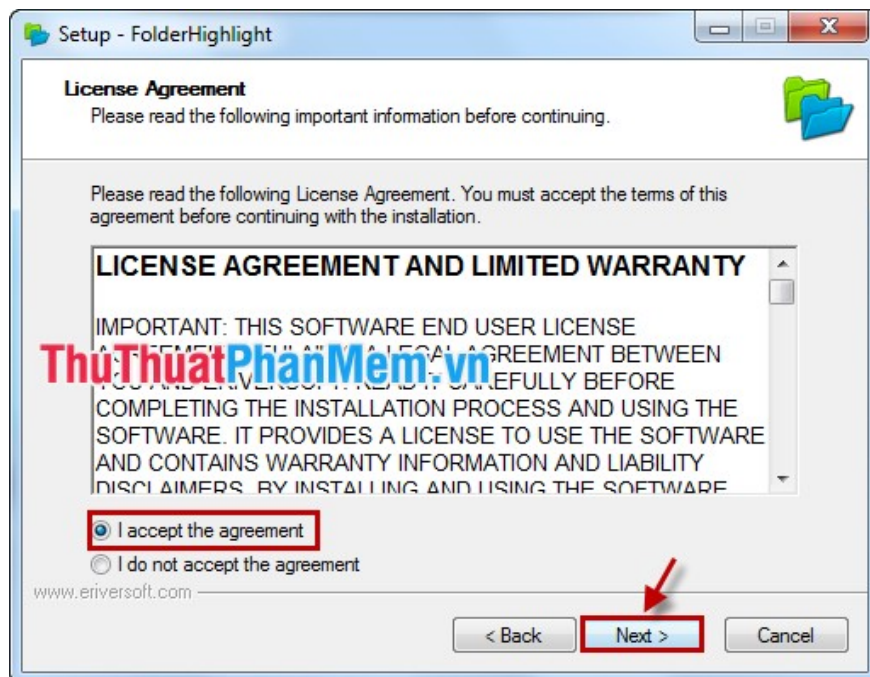

Highlight folder is small in size, easy to install and use. First you download the software at: <http://folderhighlight.download.hdtp.com/?download>.

Instructions for installing Folder Highlight

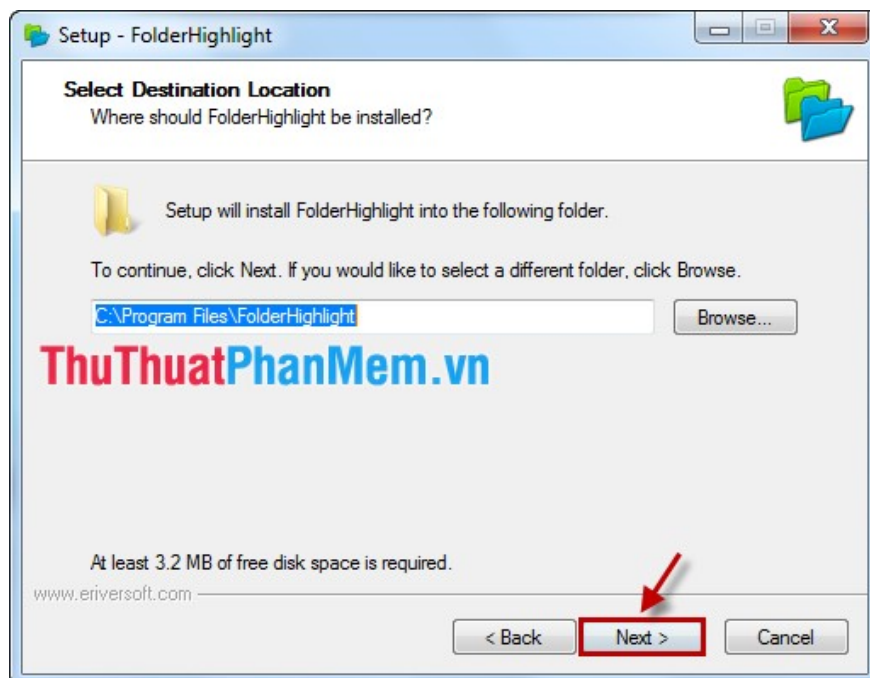

1. After downloading, open the file to install, first click **Next** .

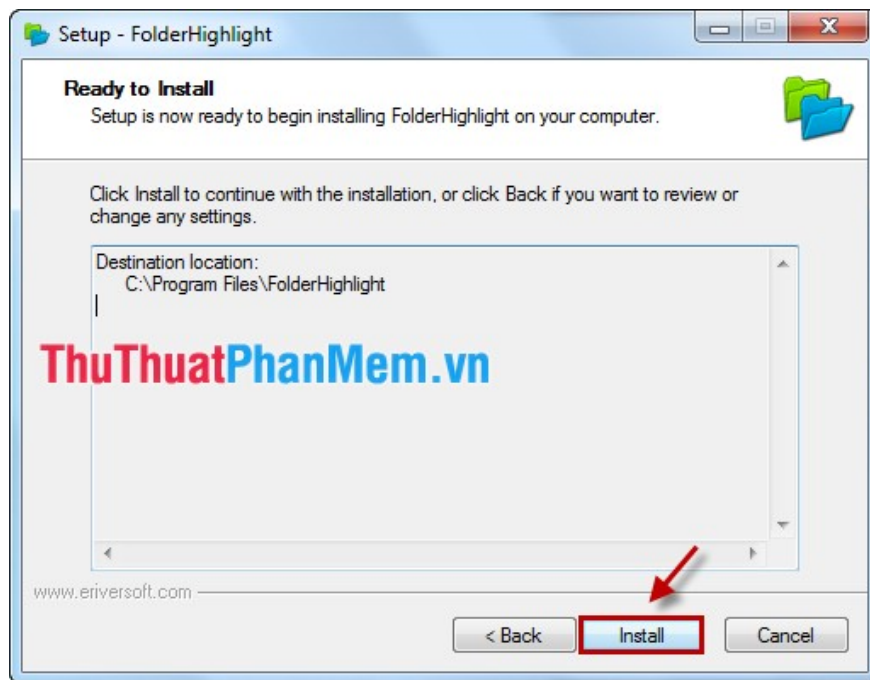

2. Select ***I accept the agreement*** and select **Next** .

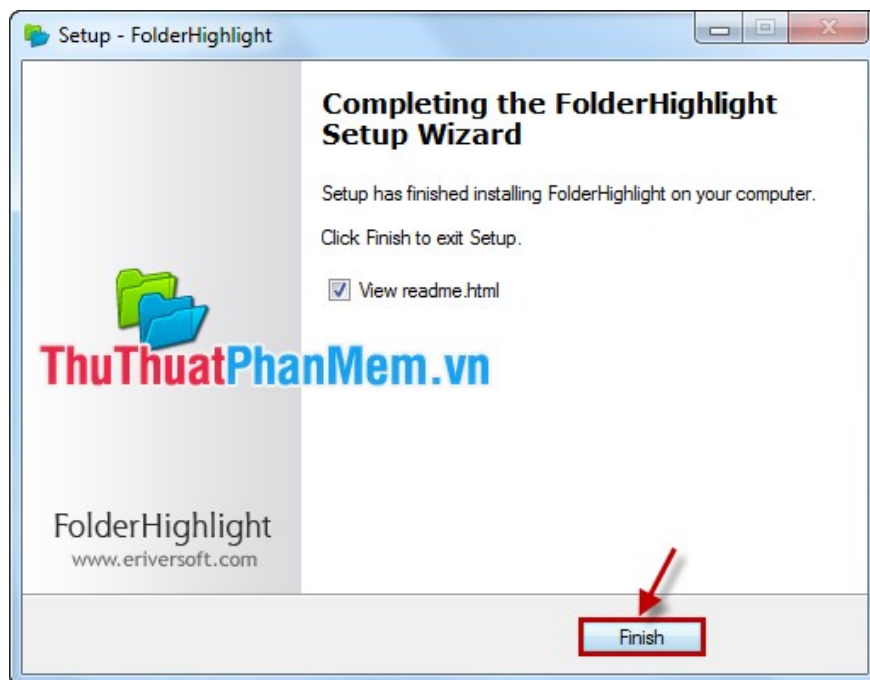

3. Click **Next** .

4. Next, click **Install** to install.

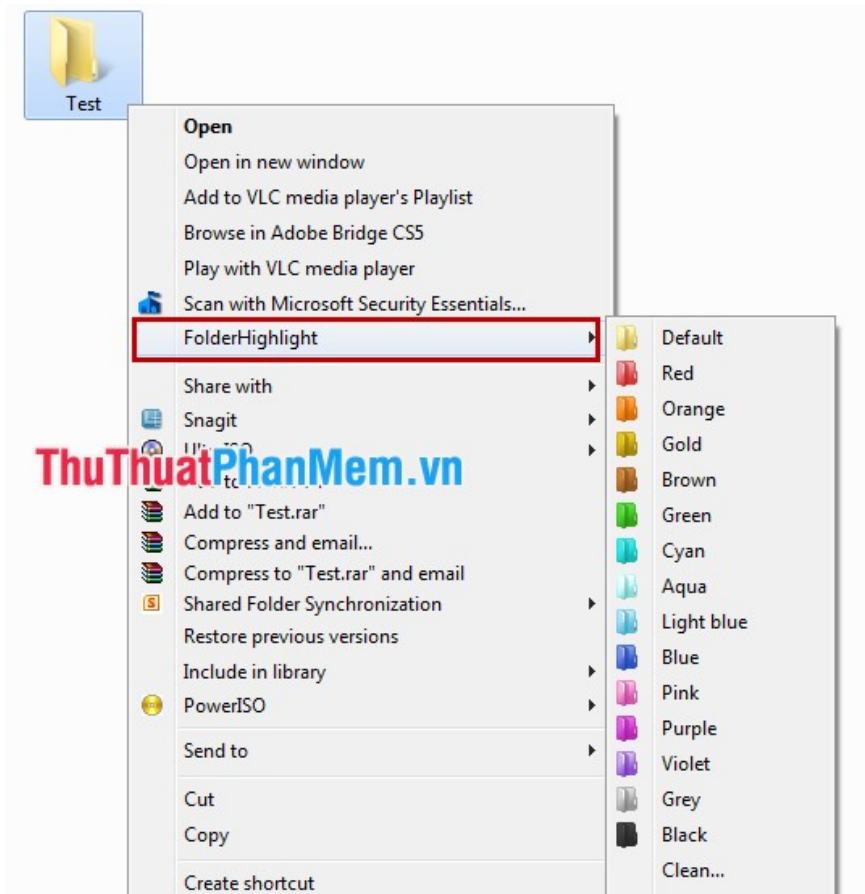

5. Wait for the installation program momentarily, select **Finish** to finish.

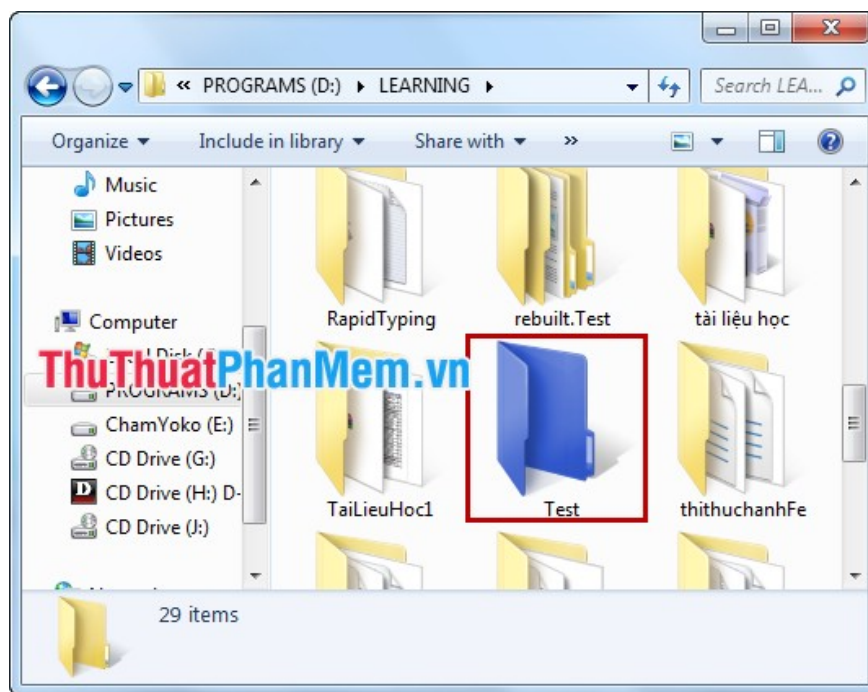

Instructions for using Folder Highlight

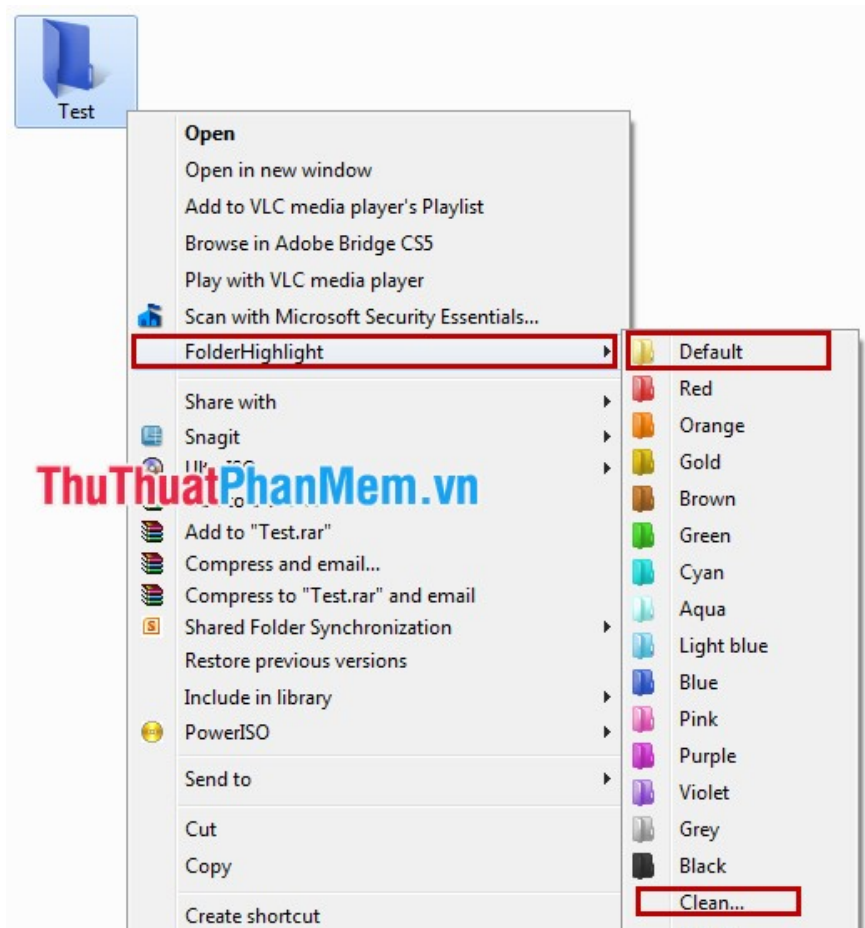

After installation, Folder Highlight is integrated into the right-click menu. To change the folder color, right-click on the **folder** and select **Folder Highlight** and choose the color you want.

Your folder will then be changed to the color you chose.

To return the folder color to the default Windows color, right-click the folder, select Folder Highlight and select **Default** or **Clean** .

With very simple operations, you can change the folder color as you like. You will easily manage the folders in your computer more with Folder Highlight.
