

Instructions to change the color of Xiaomi phone application icons

Xiaomi phones after upgrading to Android 13 operating system are provided with many more features. For example, change the color of the compatible application icon for each icon

Xiaomi phones after upgrading to Android 13 operating system are provided with many interesting features. For example, you can change the color of compatible application icons for each icon to make the display more beautiful and eye-catching with color-synchronized application icons. And you can also combine with beautiful widget templates for Xiaomi to redesign the screen to your liking. The following article will guide you to change the color of the Xiaomi phone application icon.

How to change the color of application icons on Xiaomi

Step 1:

First, you access **the Settings section** on the phone and then click on **the Home screen item** to adjust the icon displayed on the main screen.

Step 2:

Next, the user clicks on **the Icon size item** to change the application icon on Xiaomi phones.

Step 3:

In the icon adjustment section on Xiaomi phones, click on **the Background color item** to adjust the application icon color on the phone. When you click on this setting, it will display several options for the application icon background color.

We **click on the color** in the displayed color range to change the color of the application icon on the phone.

After you choose, some supported apps will change to solid colors, most of them are Google apps and some are installed by default on the phone.
