

Instructions to change the detailed battery capacity widget on iOS 14

Many iPhone users may have been satisfied with the default iOS 14 battery life notification widget, but many would prefer a larger widget that displays percentage accuracy.

If your iPhone is running on iOS 14, you should see a default battery capacity widget in the Today View area, the leftmost screen on the home screen. Maybe many users are satisfied with this widget, but also many people will prefer a larger widget, which accurately displays the battery percentage.

Switching to a larger, more detailed widget on iOS 14 involves 2 steps, that is to remove the old default widget and install the new version of the widget.

Remove old battery capacity notification widget

First, from the home screen, swipe right all the way to the Today View page, then tap the Edit button at the bottom of the screen (or press and hold anywhere in Today View) to start editing.

From the home screen, you swipe right all the way to the Today View page.

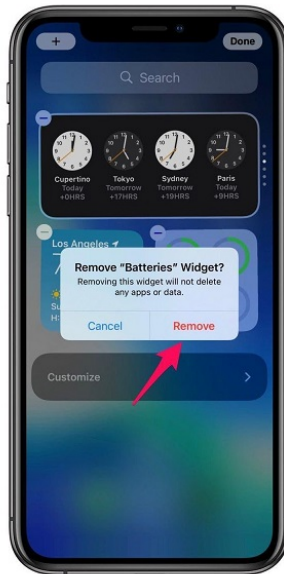

Click the Edit button at the bottom of the screen to start editing.

When the widgets start to vibrate, click the icon - above the battery widget to remove the default widget, then press the Remove button to proceed. Finally, click the Done button on the right corner to finish.

When widgets start to vibrate, tap the icon - above the battery widget to delete this default widget.

Click the Remove button.

Click the Done button on the top right corner to finish.

Set a detailed battery capacity notification widget

To install a detailed battery capacity widget, you also need to go to the Today View page, then tap the Edit button at the bottom of the screen (or press and hold anywhere in Today View) to start editing.

When the widgets start to vibrate, tap the + sign at the top left of the screen to install more widgets. In the Search Widgets section, locate the Batteries tool.

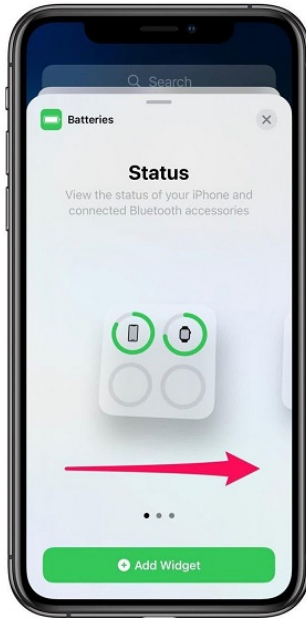

Click the + sign at the top left of the Today View screen to add widgets.

In the Search Widgets section, locate the Batteries tool.

You can swipe to choose the right version of the widget.

You can swipe to choose the right version of the widget.

When done, tap Add Widget, then press the Done button on the right corner to finish.

When done, tap Add Widget.

Click the Done button on the right corner to finish.
