

# Instructions to change the interface of the mouse cursor on Windows

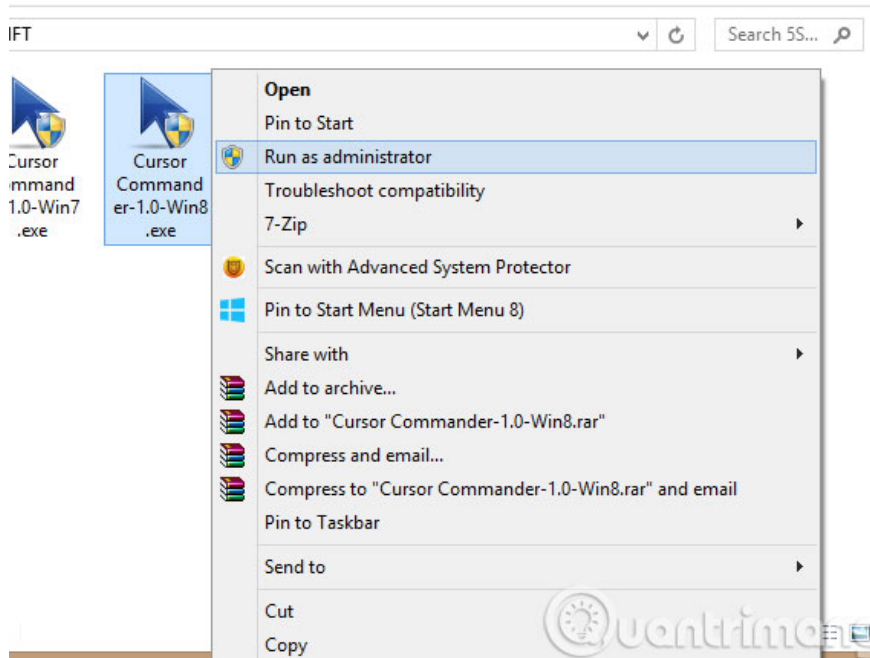

Besides changing the appearance of the Desktop screen, another way to refresh your computer is to change the interface of the mouse pointer. There are quite a lot of tools to support this change, but in this article, we will introduce you to a simple, easy to use tool that is completely free, which is Cursor Commander.

Besides changing the appearance of the Desktop screen, there is another way to "refresh" your computer, which is to change the interface of the mouse pointer. There are quite a lot of tools to support this change, but in this article, we will introduce you to a simple, easy to use tool that is completely free, which is **Cursor Commander**

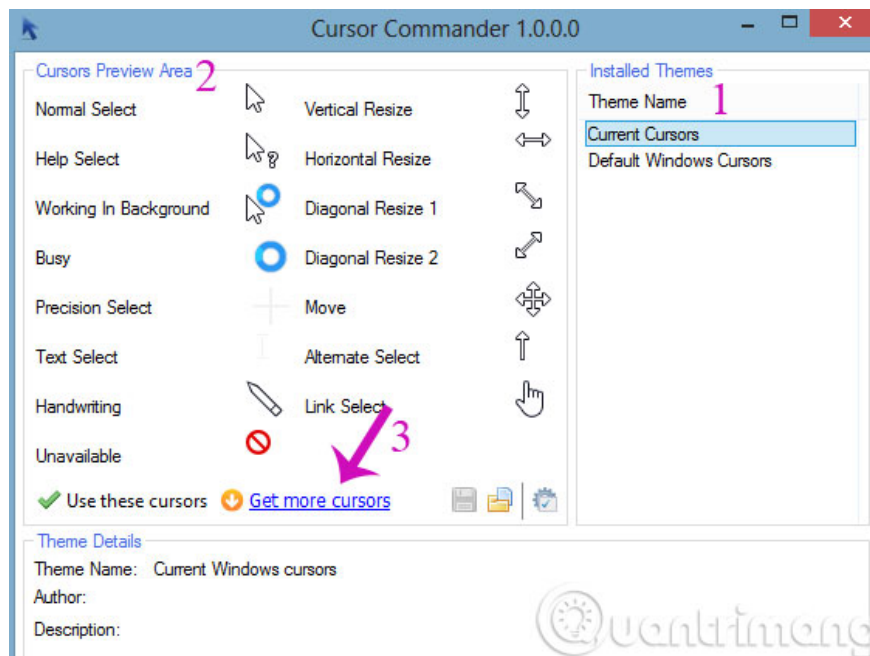

**Step 1 :** After the download is complete, please unzip the ZIP packet.

**Step 2 :** After extracting, find the **.EXE file that** matches the version of Windows you are using and launch it. Here, we use **Windows 8**, so choose the **Cursor Commander-Win8** file.

**Step 3** : After installation is complete, open the application. The Cursor Commander interface appears, you will see the default interface of the current cursor in the **Theme Name** and preview image at the **Cursors Preview Area section** . To download the package interface to your computer, click the **Get more cursors link** .

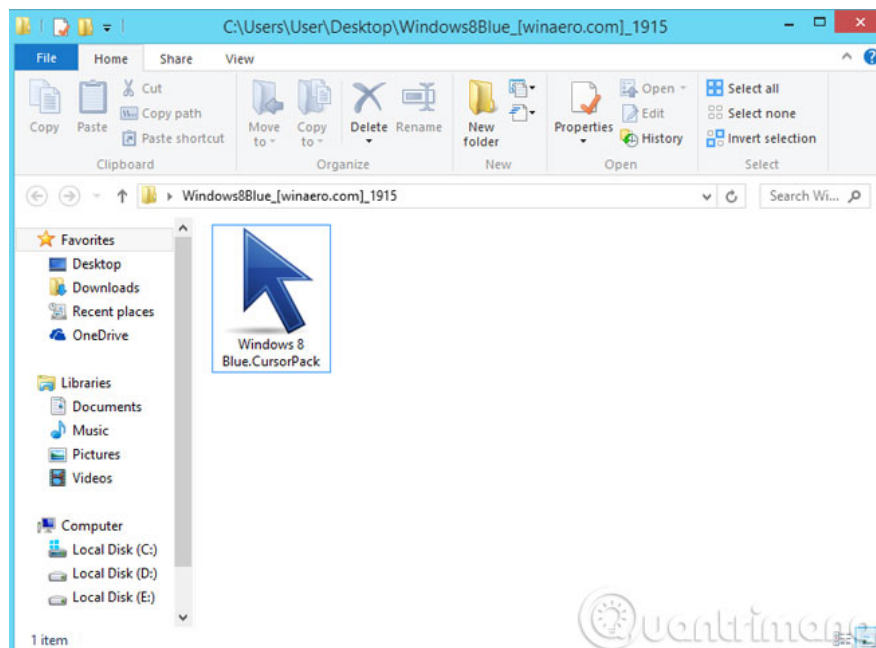

**Step 4** : The download interface appears, select a package and download

## Cursors

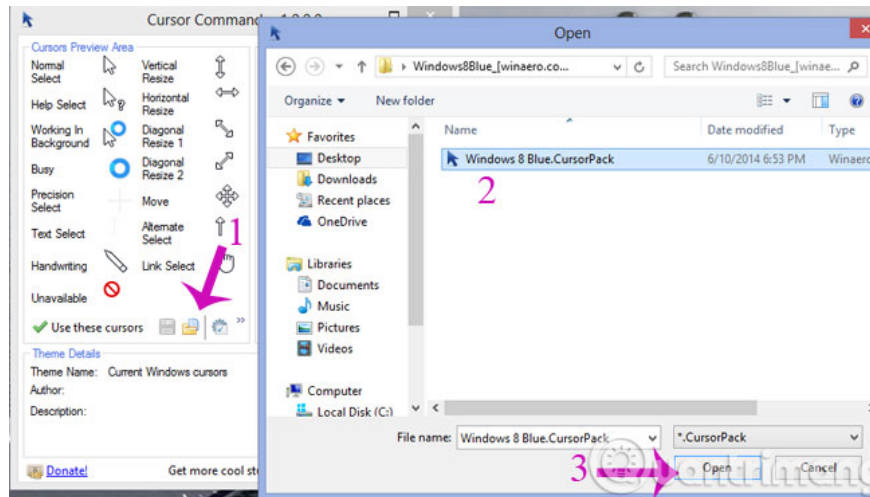

View **50** Order by **Date** Sort **Descending** **Go**

Name	Date	Size	DL's
<a href="#">Colorful Animated Cursors</a>	09 Nov 15	81.66 kB	250
<a href="#">Media Center</a>	10 Jun 14	33.1 kB	898
<a href="#">Red Yellow Binary</a>	10 Jun 14	6.7 kB	644
<a href="#">Dark Red Yellow Binary</a>	10 Jun 14	6.7 kB	482
<a href="#">Dark Blue Cyan Binary</a>	10 Jun 14	6.69 kB	890
<a href="#">Black Green Binary</a>	10 Jun 14	6.47 kB	737
<a href="#">Aero Black Gold</a>	10 Jun 14	35.53 kB	1947
<a href="#">Aero Red Dark</a>	10 Jun 14	35.39 kB	1303
<a href="#">Aero Purple</a>	10 Jun 14	49.14 kB	865
<a href="#">Aero Dark Blue</a>	10 Jun 14	44.96 kB	1528
<a href="#">Windows 8 Blue</a>	10 Jun 14	21.07 kB	638
<a href="#">Windows 8 Yellow</a>	10 Jun 14	20.82 kB	460
<a href="#">Windows 8 Red</a>	10 Jun 14	20.88 kB	646
<a href="#">Windows 8 Purple</a>	10 Jun 14	20.85 kB	402

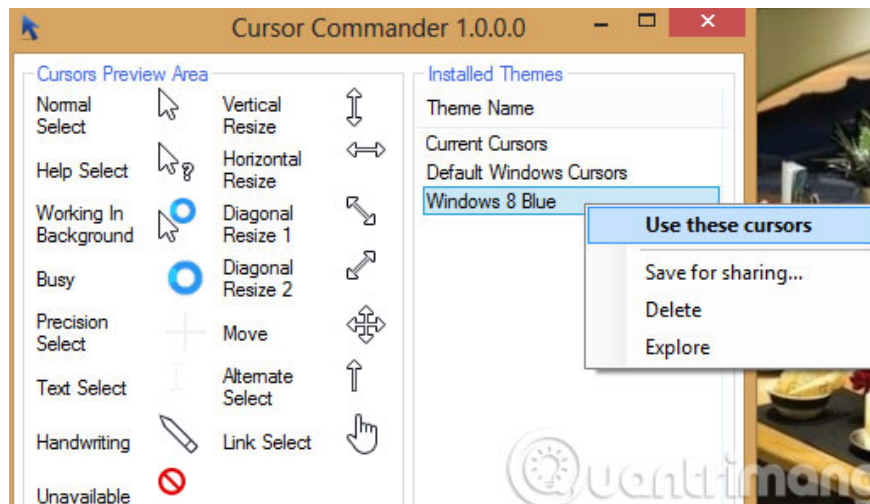

**Step 5 :** After downloading, proceed to extract the package to get the interface file format ".CursorPack".

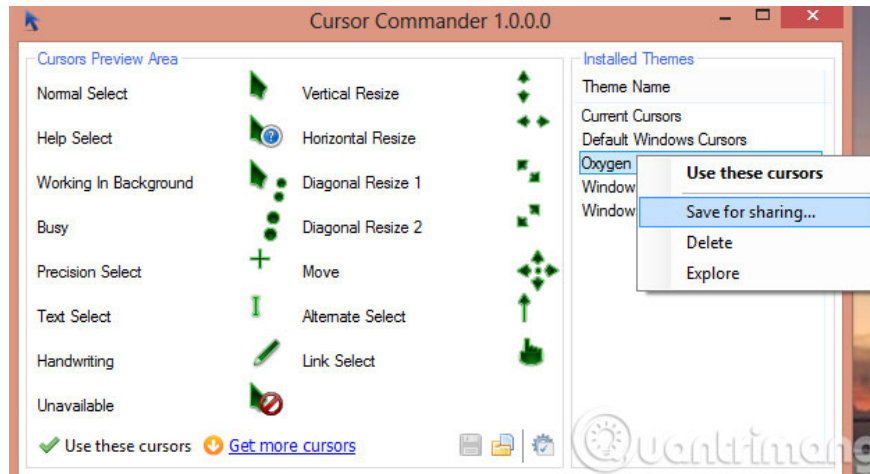

**Step 6 :** Go back to the Cursor Commander interface, click on the **Load CursorPack file** icon . and navigate to the ". CursorPack " file you just **extracted** and click **Open** to add it.

**Step 7 :** Cursor Commander will extract and display the name, as well as the preview icons of the mouse interface package you just added. When you're satisfied, click on the interface name and click on the option **Use these cursors** to apply.

**Step 8 :** Cursor Commander also supports users to "export" the personal interface package that you have just "created" to share by right-clicking on the interface package name in the **Theme Name** section and selecting the **Save for sharing** command. .

1. Add Copy to folder and Move to folder in the right-click menu
2. Surf the web more effectively with the mouse wheel
3. The basic steps of fixing cursor cursors flutter in Windows

**Good luck!**
