

# Instructions to change the interface on Windows 11

Windows 11 brings a lot of outstanding features, not only from the feature but also the interface is also greatly refined by Microsoft.

However, if you are not very satisfied with the theme on Windows 11, let's change the appearance of the Windows platform by the following:

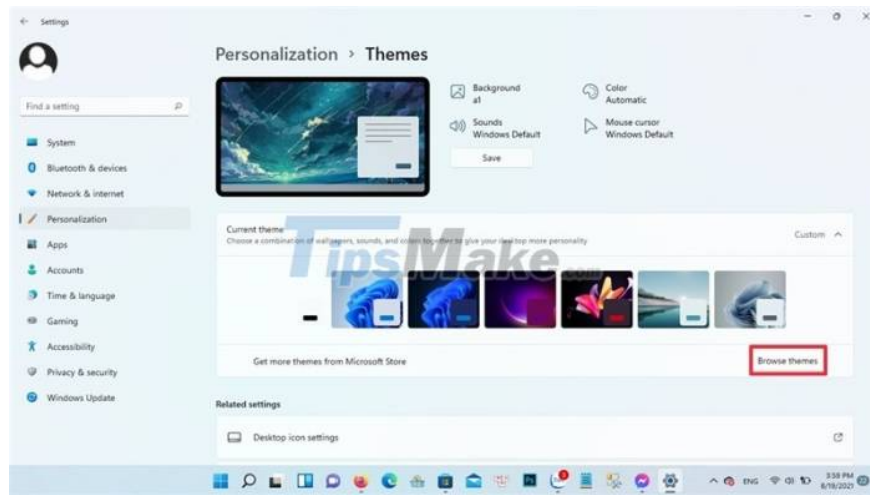

## How to change the look of Windows 11

Step 1:

Open Settings > Personalization > Themes

Step 2:

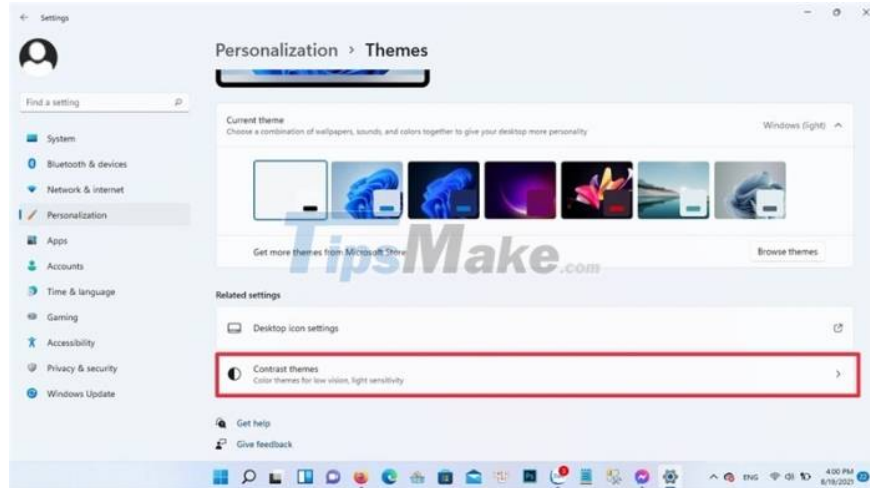

When accessing themes, you have a lot of options to change the look and feel on Windows 11. Or if you want more, you can click Browse themes to get more choices from the Microsoft Store.

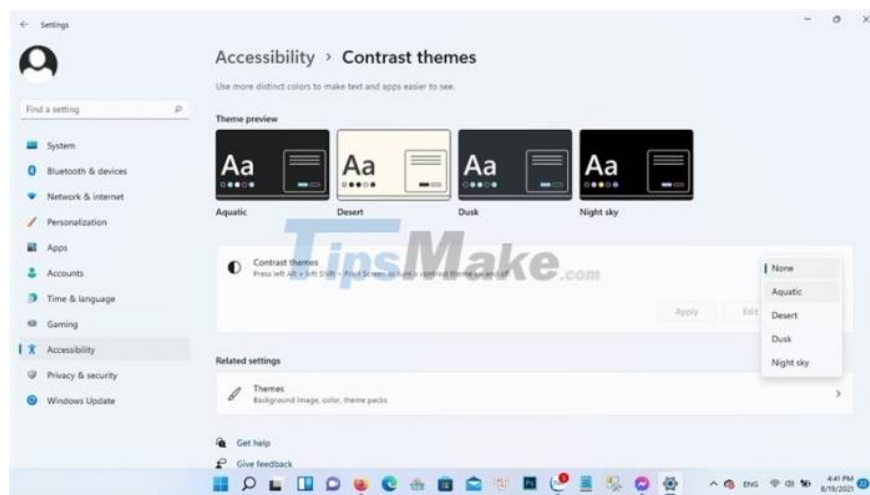

At Microsoft Store, there are not only paid themes, but also many completely free themes for users. After choosing your favorite theme, you can click download.

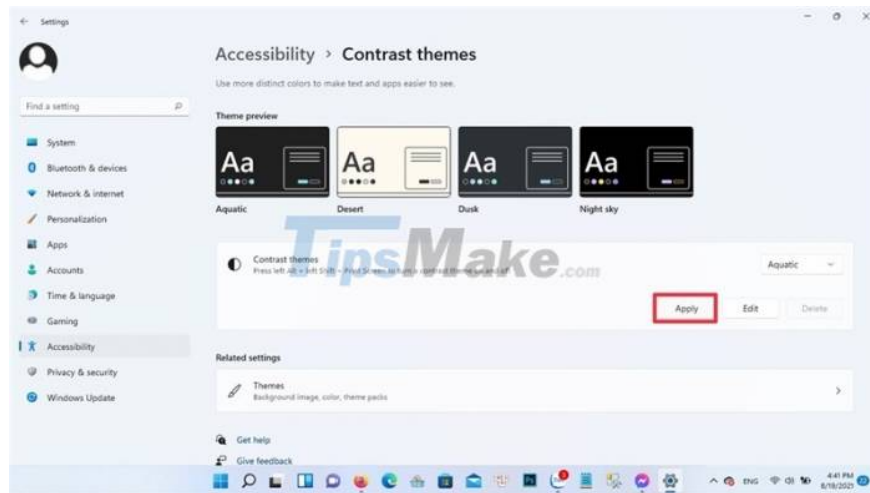

Step 3:

In addition, you can further customize the interface to fit each different theme you download. By going to Settings > Accessibility > Contrast themes.

In this section, you can choose from available themes such as Aquatic, Desert, Dusk or Night Sky.

Step 4: After selecting, click Apply to put on a new layer of clothing for your Windows laptop/PC.

Try to experience a new interface on the Windows 11 platform to your liking.
