Did you know that the Windows 10 Start Menu can be easily customized to make it easier to use for your needs? If you are still wondering how to edit the Start Menu interface then follow this article. TipsMake.com will guide you to customize the Menu in the simplest and easiest way.

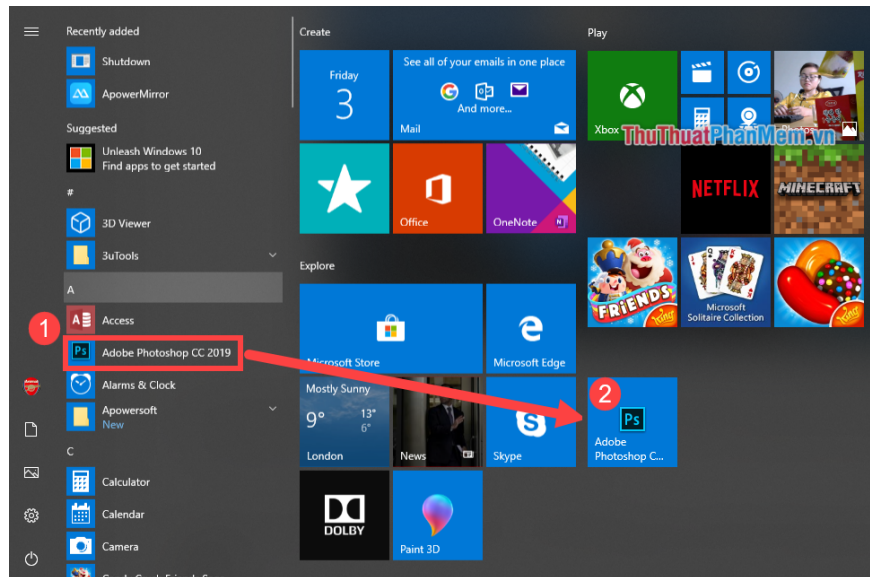

Did you know that the Windows 10 Start Menu can be easily customized to make it easier to use for your needs? If you are still wondering how to edit the Start Menu interface then follow this article. *TipsMake.com* will guide you to customize the Menu in the simplest and easiest way.

## 1. Add favorite apps

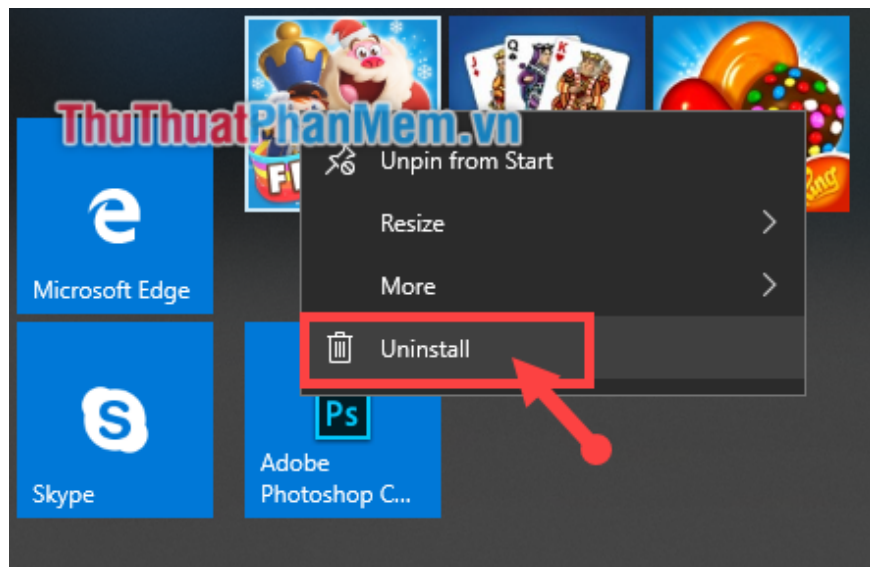

Instead of having to rummage through each time to find an application in the Start Menu, you can now pin the app to the top to make it easier to serve your work needs by:

- (1) Find the app to pin in the Start Menu.
- (2) Hold down the left mouse button on the application, then drag and drop the application onto the front page of the Menu.

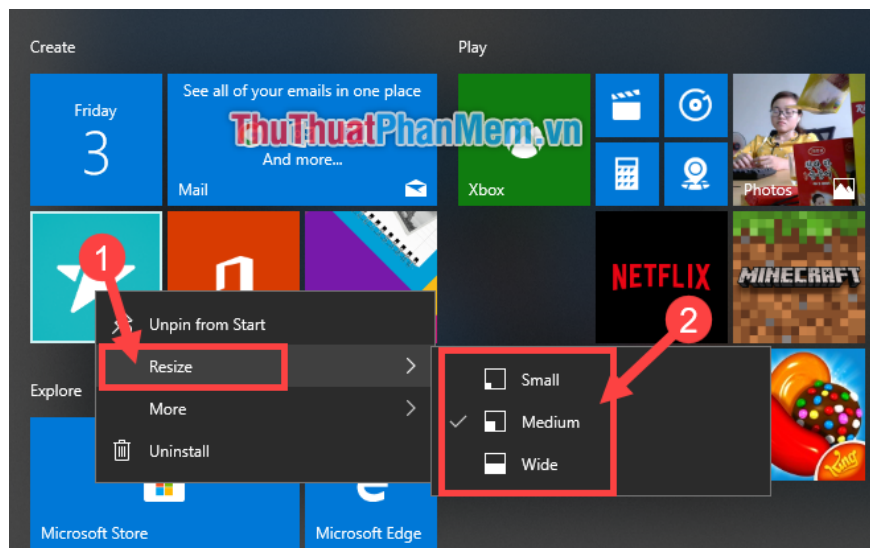

## 2. Delete some applications from the Start Menu

Deleting the application that appears in the Start Menu is extremely simple, right-click the application you want to delete -> then select *Uninstall* .

## 3. Resize display application

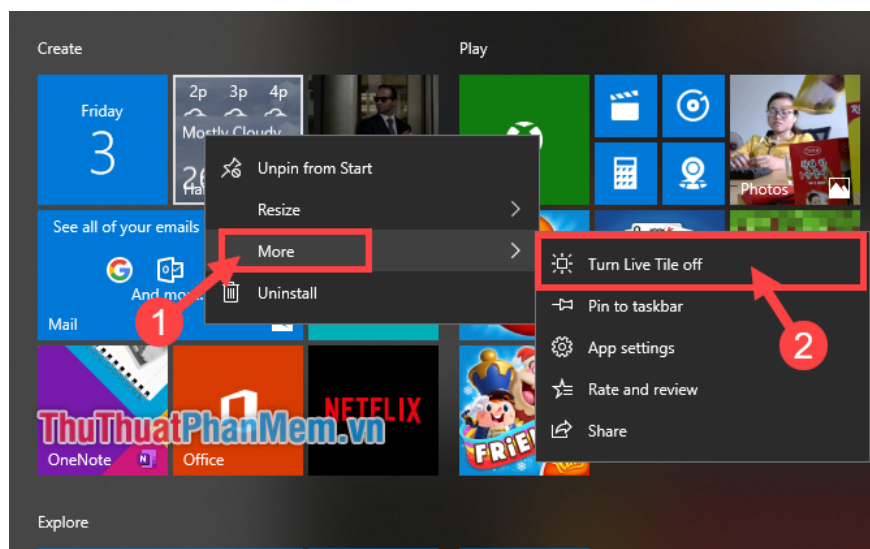

To resize the application icons to be able to display more applications, right-click the application that needs resizing -> select **Resize** -> Customize the size you want.

## 4. Turn off the application live tile update feature

Some applications will automatically update and display annoying effects such as News, One Note . To get the Live update feature you do the following:

- (1) Right-click the application you want to turn off Live Tile, select **More** .
- (2) Click on **Turn Live Tile off** .

However, some applications such as Weather or Calendar should allow them to automatically update to bring more accurate information.

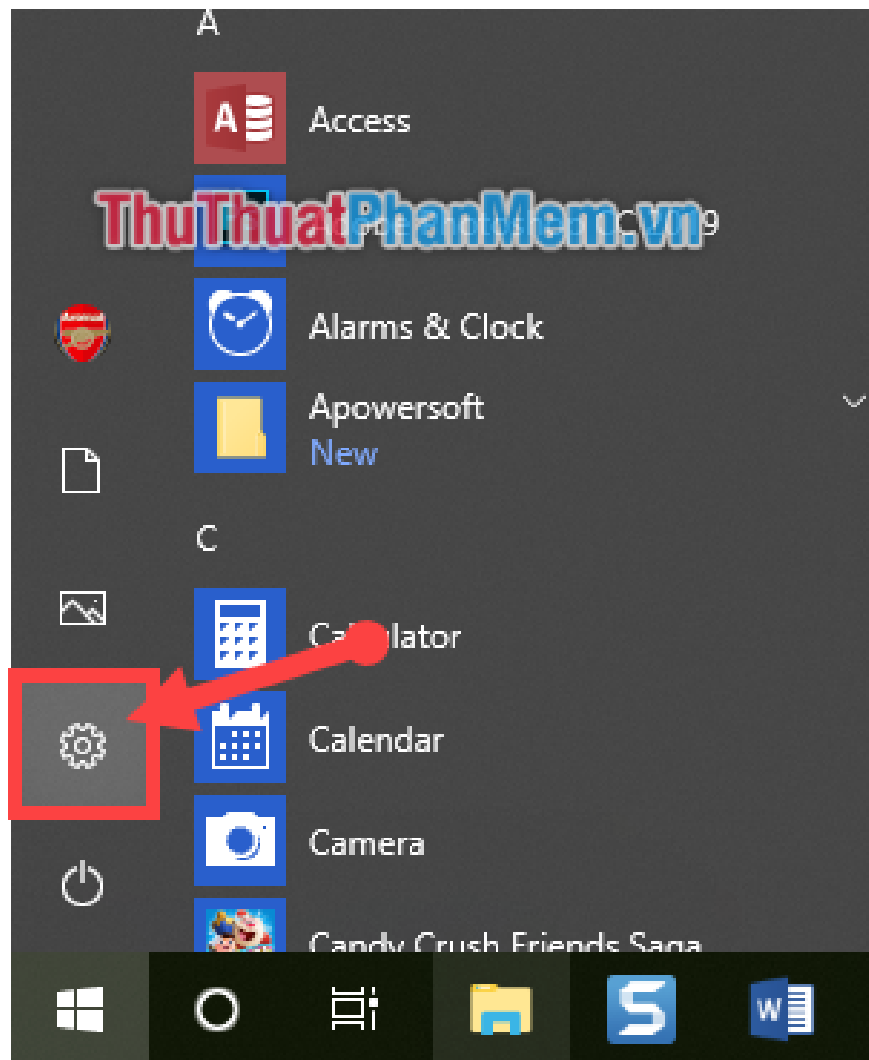

## 5. Arrange applications into groups

You find the application, drag and drop them into a group. The group name can then be changed to facilitate later management:

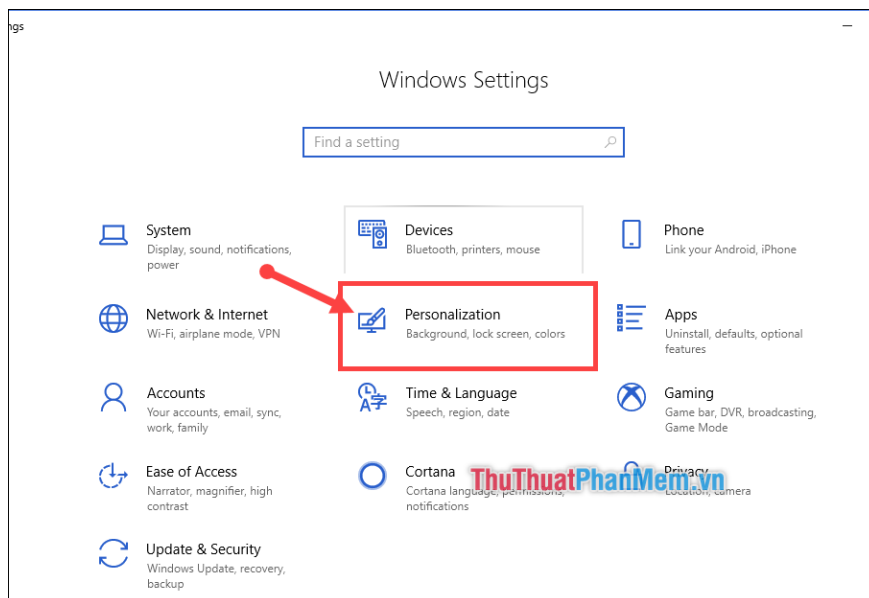

## 6. Change the color of the Start Menu bar

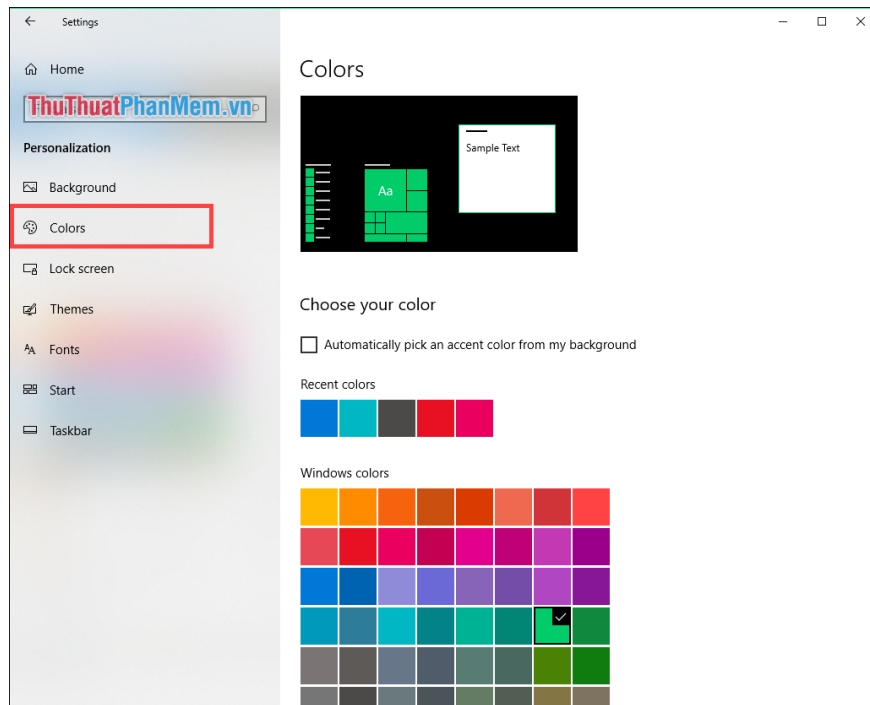

**Step 1** : Open the **Start Menu** , select **Settings** .

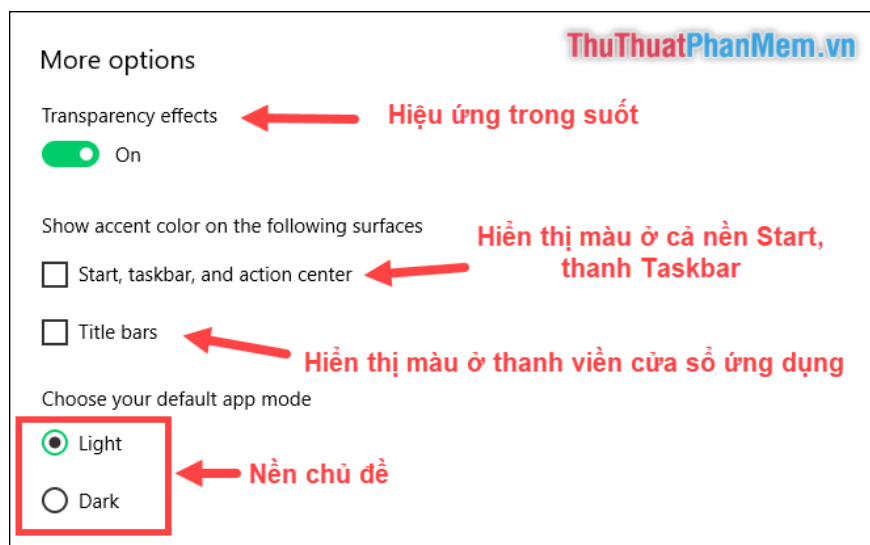

**Step 2 :** In the window **Settings** , select **Personalization** ( **Personalization** ).

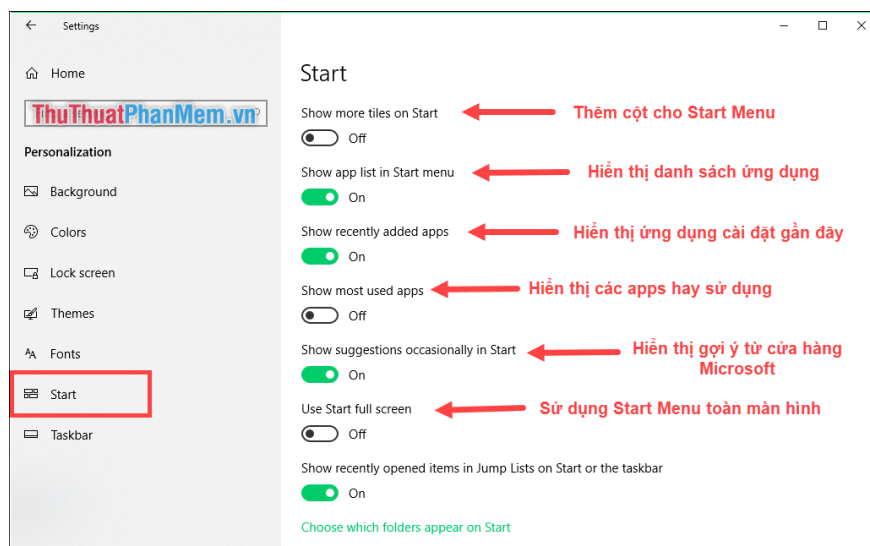

**Step 3** : Here you select the **Colors** section, then the menu color option according to your preferences.

In addition, when you scroll down there are also some options such as:

**7. There are also a number of other options for the Start Menu**

Now with the above tips, you will make your Start Menu richer and more convenient for you. Thank you for watching the article!
