

Instructions to deactivate NameDrop on iPhone

The new NameDrop feature on iOS 17 allows us to quickly share information and contacts by bringing Apple devices close together.

The NameDrop feature on the iPhone can be turned on or off depending on the needs of each person when needing to share information or not. If you want to cancel or enable the NameDrop feature on iPhone very simply, follow the instructions below.

How to cancel NameDrop feature on iPhone

Step 1:

First, the user accesses **the Settings section** on the application and then clicks on **the General settings** .
