

Instructions to delete 0, hide 0 in Excel

When working on Excel, with statistics tables with 0, users can completely hide or hide the number 0 with the tools available on the system.

There are many cases when working with data statistics in Excel, users are forced to hide or delete 0, so that they can see and view the whole table data more accurately. If you delete manually, it will take a lot of time, especially for multi-cell statistical tables with a value of 0, then manual removal is not feasible. Some cells with the formula delete the number 0 manually, users must re-create later when changing the calculation.

However, on the Excel table, there is a hidden value of 0 that you do not need to use external tools, or find each cell in the table to press delete 0. In the following article, we will guide you to read how to hide zeros in Excel spreadsheets quickly.

1. 10 ways to recover corrupted Excel files
2. Forgot password protected Excel file, what should you do?
3. How to combine multiple cells into 1 in Excel does not lose data

Ways to hide 0 in Excel

In the table below, I will take the example of a transcript and hide the value by 0.

The screenshot shows the Microsoft Excel 2007 interface. The ribbon includes Home, Insert, Page Layout, Formulas, Data, Review, and View. The active cell is D10. The spreadsheet contains the following data:

	A	B	C
1	Họ và tên	Chuyên cần	Điểm lý thuyết
2	Nguyễn An	2	0
3	Trần Thị Hạnh	0	5
4	Nguyễn Tú Anh	1	3
5	Mai Hà Phương	0	0
6	Phạm Tuấn Hưng	2	0
7	Bùi Công Đức	2	3.5
8			
9			

Method 1:

This will apply to versions of Excel 2007 and above.

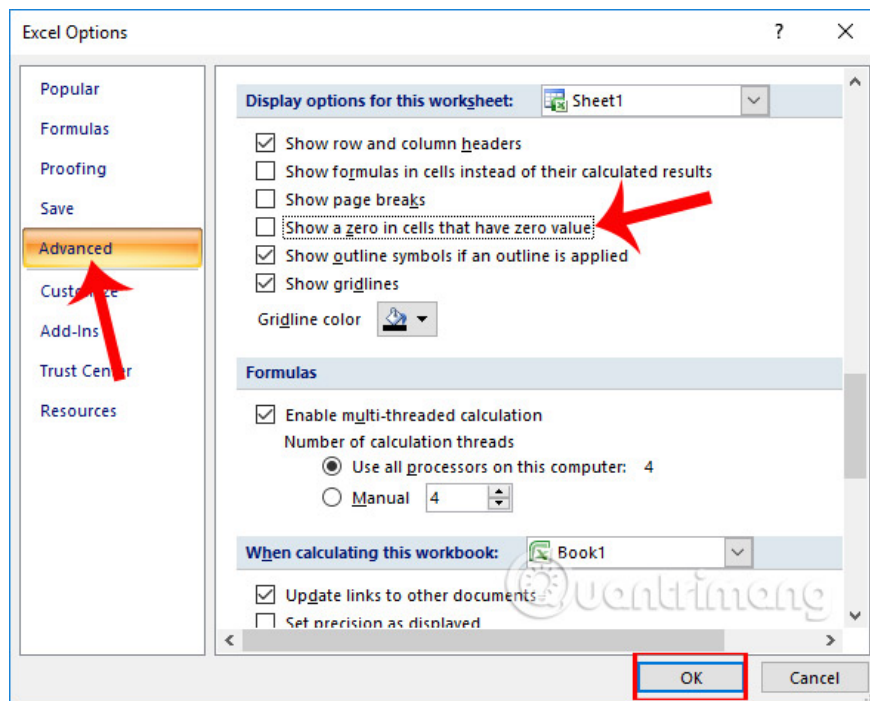

Step 1:

At the spreadsheet interface, we will click on **the Office icon** above and then select to **Excel Options** .

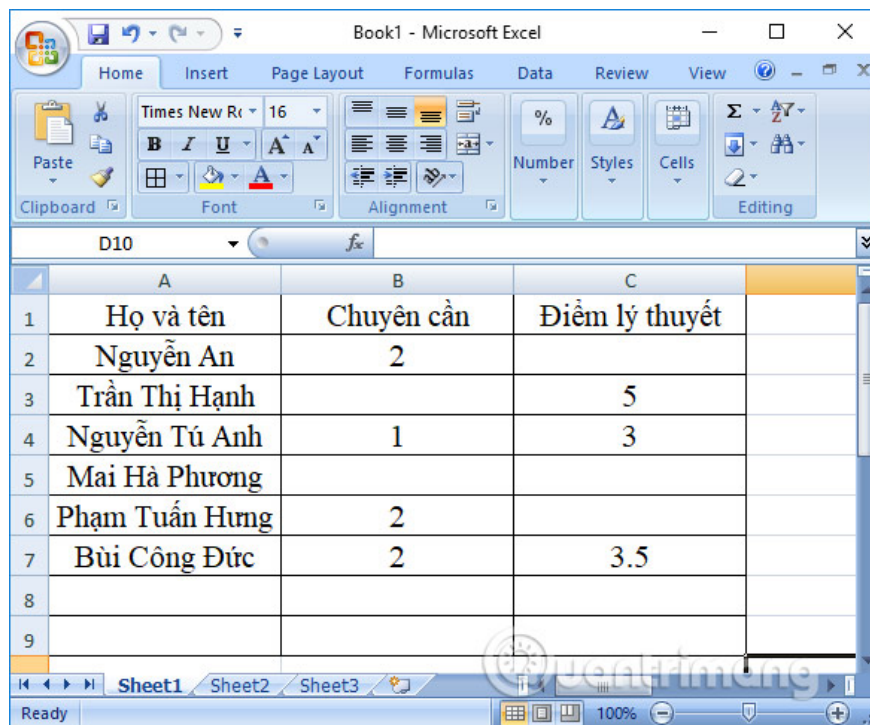

Step 2:

In the new interface, users click on the **Advanced** item in the options list to the left of the interface. Look at the content on the right of **Display options for this worksheet** , **uncheck the box at Show a zero in cells that has zero value** .

As a result, the data table will hide all cells that have zero values ??as shown below. To re-display the number 0, simply select the Show again with a zero in cells that has zero value.

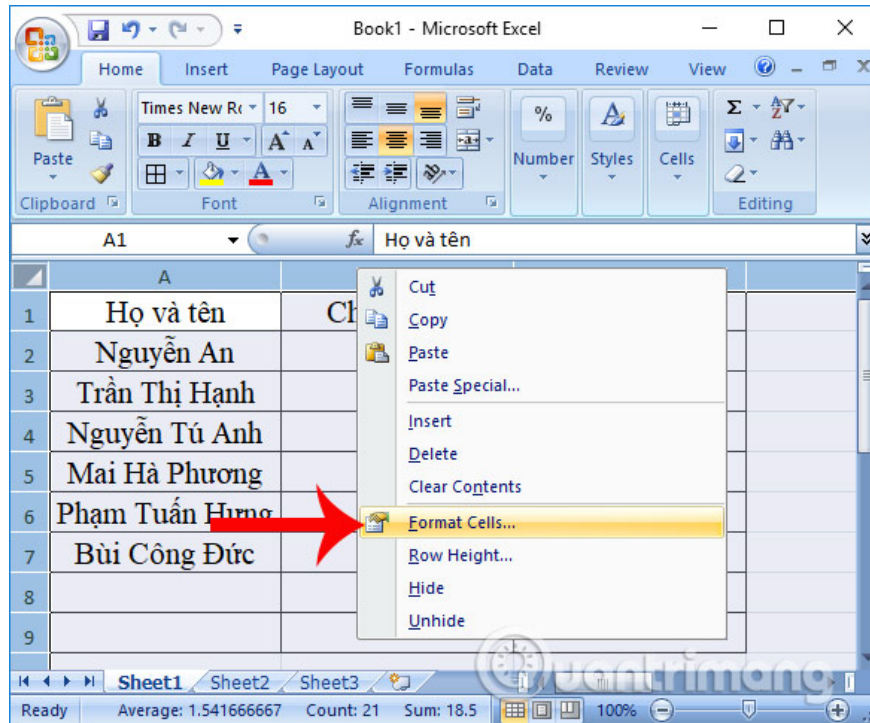

Method 2:

We will adjust directly in the data table on Excel via Format Cells.

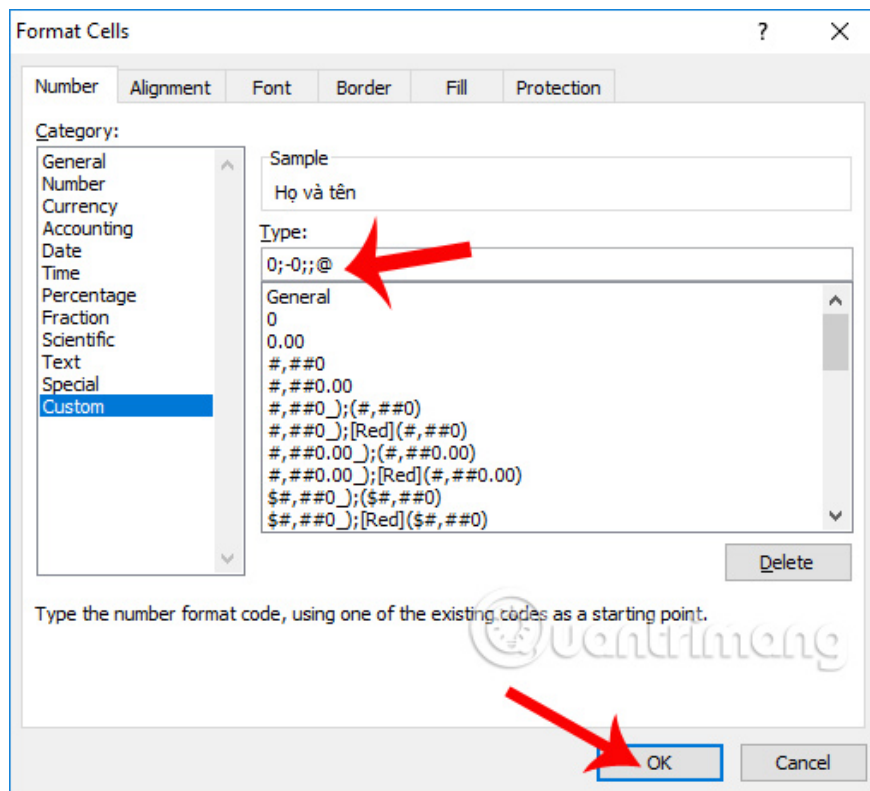

Step 1:

The user chooses the area to hide 0, but in the article is the entire data table. Then right click and choose **Format Cells** .

Step 2:

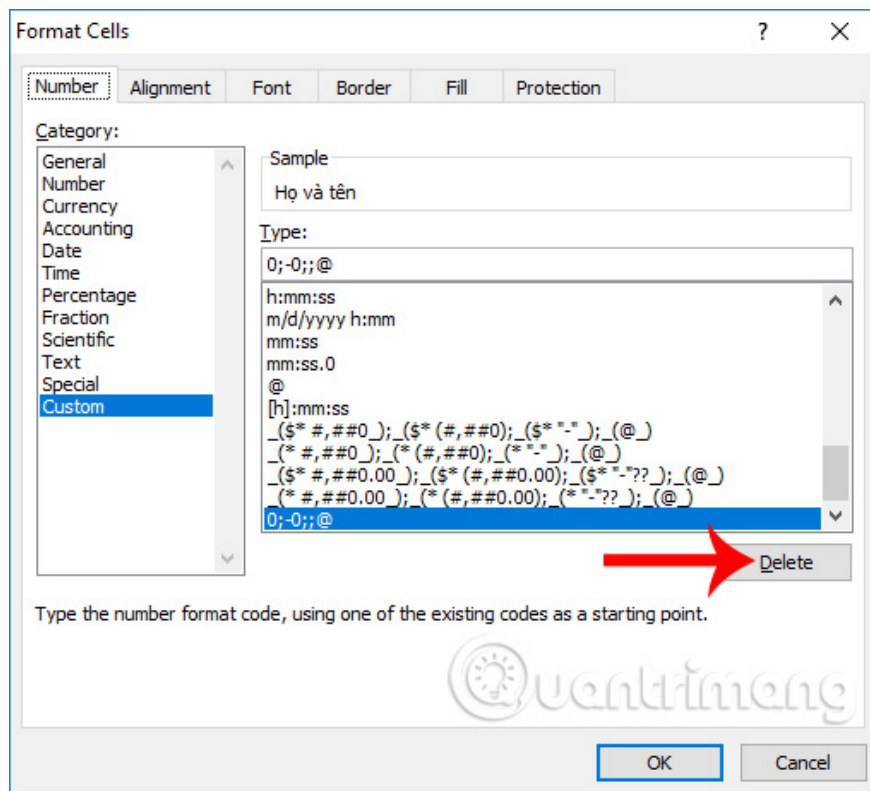

In the **Categorical** Format Cells dialog box, select the **Customs** item. Next, type **Type** in the box below the range **0; -0 ;; @** . Then click **OK** to save.

When returning to the data table, all 0 values are hidden.

	A	B	C
1	Họ và tên	Chuyên cần	Điểm lý thuyết
2	Nguyễn An	2	5
3	Trần Thị Hạnh	1	3
4	Nguyễn Tú Anh	2	4
5	Mai Hà Phương	2	4
6	Phạm Tuấn Hưng	2	4
7	Bùi Công Đức	2	4
8			
9			

If you want to show 0 again, just press Delete to delete the range 0; -0 ; @ in the Type section of the Format Cells table.

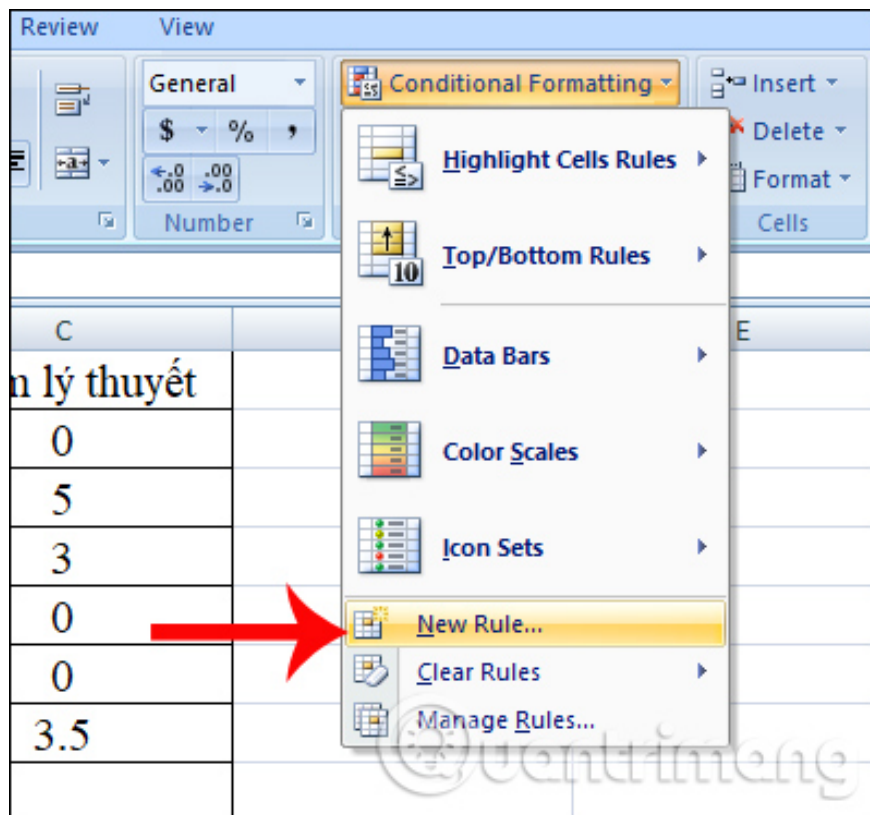

Method 3:

With this method, we will use the Format feature to hide hidden statistics table cells with a value of 0.

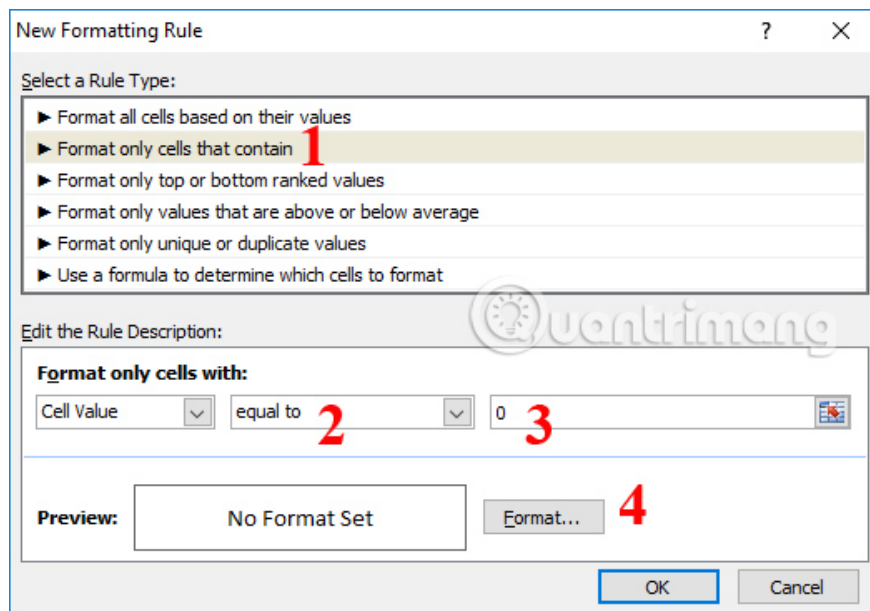

Step 1:

First we need to black out the entire statistics table, then click on the **Home tab** and then select **Conditional Formatting > New Rule** .

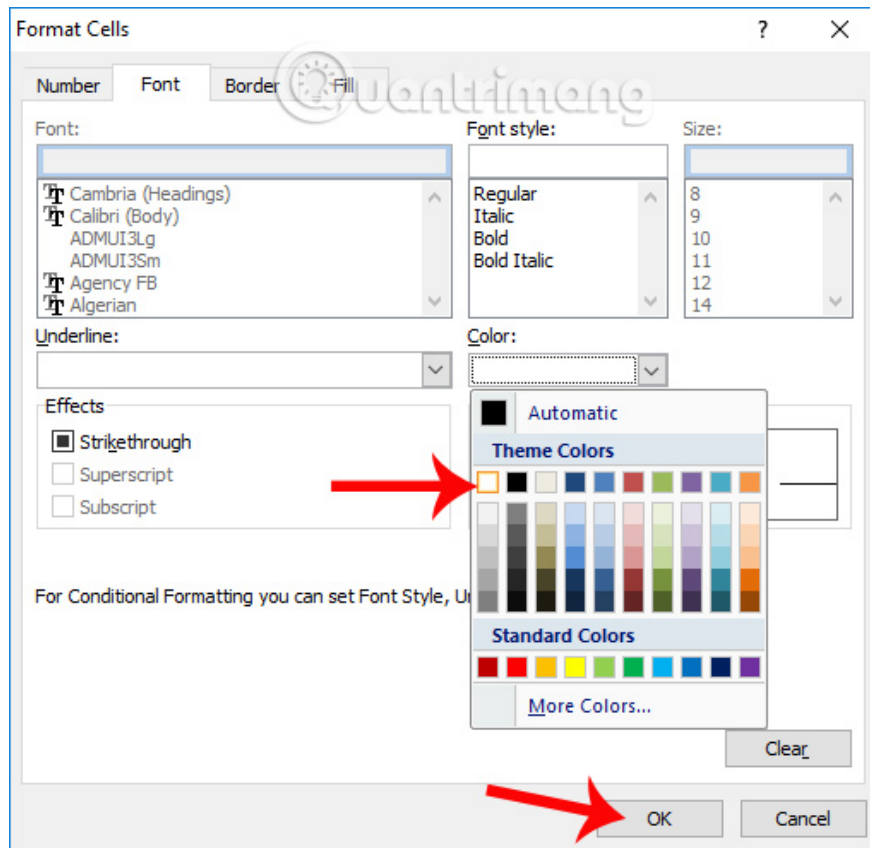

Step 2:

In the New Formating Rule dialog box, navigate to the line **Format only cells that contain** . Then select **Equal to big** , then enter **0** in the box next to it and select **Format** to reformat the cell.

Step 3:

Switch to Format Cells panel. In the Font tab, go to **Color** to change it to **white** , or you can choose any color that matches the Excel background color. Finally click OK to save.

Step 4:

Thus, the statistics table has also been hidden to zero. This way will convert the color value 0 to match the color of the Excel interface.

	A	B	C
1	Họ và tên	Chuyên cần	Điểm lý thuyết
2	Nguyễn An	2	
3	Trần Thị Hạnh		5
4	Nguyễn Tú Anh	1	3
5	Mai Hà Phương		
6	Phạm Tuấn Hưng	2	
7	Bùi Công Đức	2	3.5
8			
9			

When we black out the entire table, we see a zero as shown below.

	A	B	C
1	Họ và tên	Chuyên cần	Điểm lý thuyết
2	Nguyễn An	2	0
3	Trần Thị Hạnh	0	5
4	Nguyễn Tú Anh	1	3
5	Mai Hà Phương	0	0
6	Phạm Tuấn Hưng	2	0
7	Bùi Công Đức	2	3.5
8			
9			

To redo the number 0, you do the same as the above steps also black out the whole table but move the value in 0 to black, or the color created for the previous zero.

Above are 3 ways to handle statistics table, hide all 0 in Excel table. Depending on the version of Excel you are using, as well as the convenience to use, we choose one of the above ways to hide all the 0 in the data table.
