

Instructions to delete history viewed on KMPlayer

KMPlayer is one of the most popular audio and video listening software. So do you know how to delete the video and audio history seen in KMPlayer?

KMPlayer is a name that is so familiar to anyone looking for multimedia entertainment software. Like VLC or GOM Media Player, KMPlayer supports users to view all video formats, especially in sharp 3D video mode.

Some KMPlayer tips will help you a lot when using software to watch videos like:

1. Adjust the speed of watching videos in KMPlayer
2. Common shortcuts for KMPlayer need to know
3. 2 simple ways to block ads in KMPlayer

In this article, we will guide the procedure to delete history. If your computer is commonly used and meets with "curious" people, it is also recommended to clear the history on KMPlayer. The network administrator will show you how to delete any previously viewed videos or mp3s with "not easier" operations.

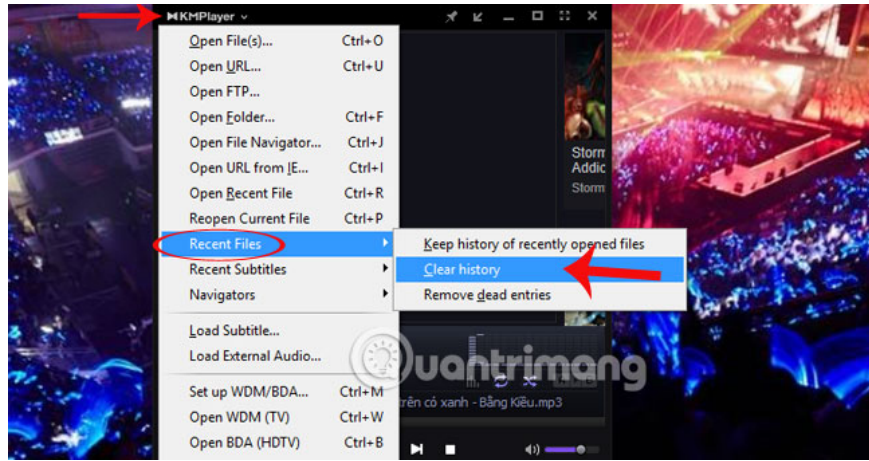

1. Download the new KMPlayer software version
2. Download KMPlayer for Android
3. Download KMPlayer for iOS

Step 1:

Start the KMPlayer program.

Step 2:

Click on the word **KMPlayer** at the top, select **Recent Files** then click **Clear History** .

Step 3:

On the main screen showing **Clear History of Recent Files** means you can delete all video viewing history.

The operations are simple and don't take too much of your time.

Refer to the following articles:

1. 7 ways to download videos on Youtube quickly and simply
1. 10 easy video editing applications on Android
1. One more way to download YouTube videos on computers and phones without using software?

Hope the above article is useful to you!
