

Instructions to delete Siri data from iCloud on iPhone or iPad

You do not want iCloud to store data of Siri? Follow these instructions to remove Siri's data from iCloud on iPhone.

You do not want iCloud to store data of Siri? Follow these instructions to remove Siri's data from iCloud on iPhone.

Siri learns how you use it and offers appropriate suggestions. And if you allow the application to access iCloud, you will receive similar suggestions on devices synced with an Apple ID account. For example, if you connect an iOS and macOS device with the same Apple ID, Siri will use the learning feature to provide personalized recommendations for both devices. It is quite useful, but due to privacy issues, you may want to delete Siri data from your iOS device.

1. How to turn off voice control on iPhone

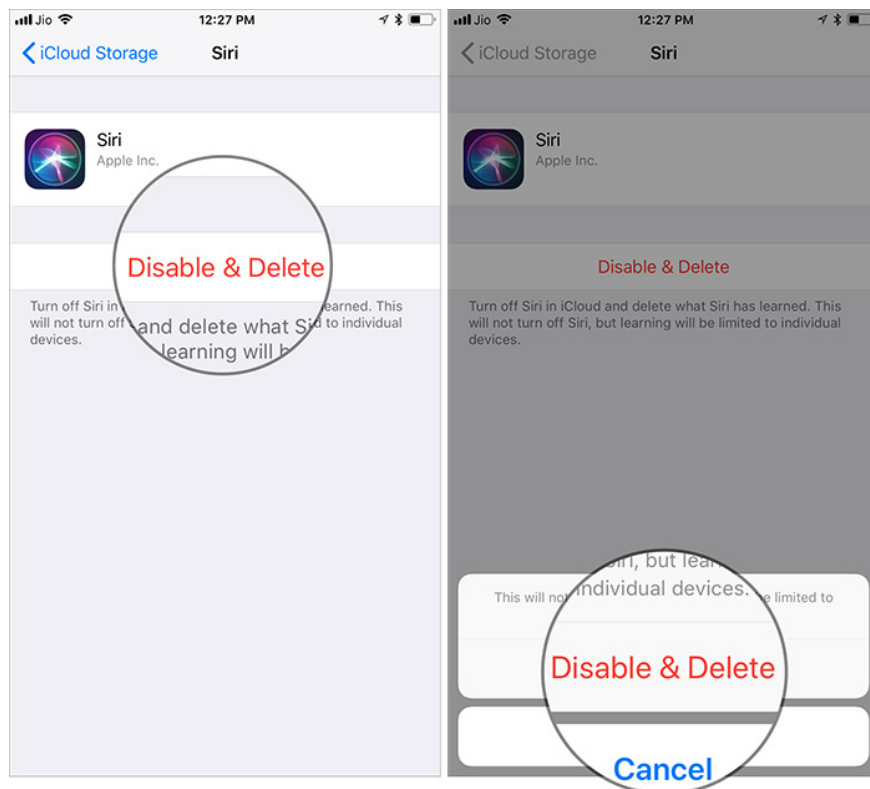

How to disable Siri in iCloud and delete the data it has stored

Step 1. Open the **Settings / Settings** app on your iOS device.

Step 2. Touch the **Apple ID** icon ? **iCloud** ? **Manage Storage** . Next, scroll down and select **Siri** .

Step 3 . Finally, select **Disable & Delete** and confirm.

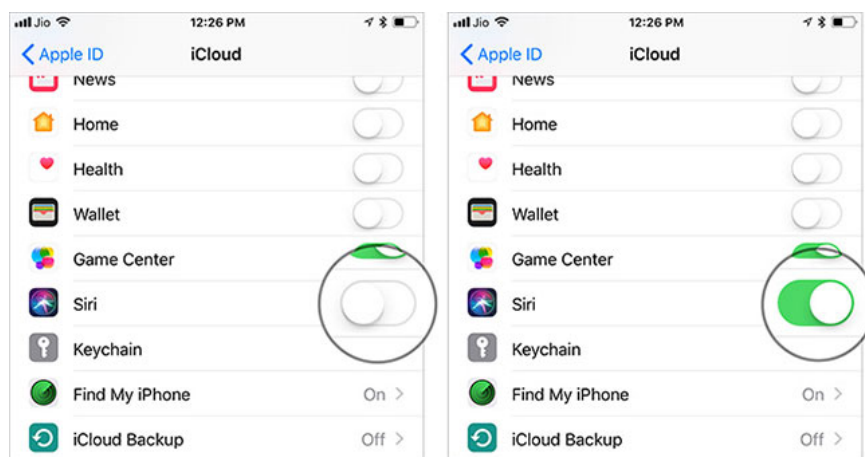

So you have deleted Siri data from iCloud with iOS device. This does not disable Siri, but limits the learning data on the device that is not stored on iCloud.

If you Siri continue to store learning data on iCloud, just go back to Settings and turn on the switch next to Siri.

How to turn on backing up Siri data in iCloud on iPhone and iPad

Step 1 . Open the **Settings** application ? **Apple ID banner ? iCloud .**

Step 2. Now, turn on the switch next to Siri.
