

# Instructions to enable Hey Copilot command Windows 11

On Windows 11, you can invoke the Copilot chatbot with the Hey, Copilot voice command to communicate with the AI ??assistant. However, this feature is disabled by default, so users are forced to enable it manually.

On Windows 11, you can call the Copilot chatbot with the voice command "Hey, Copilot" to communicate with the AI ??assistant. However, this feature is disabled by default, so users are forced to enable it manually. The Hey Copilot command is applicable to Copilot version 1.25051.10.0 and above. Here are instructions to enable the Hey Copilot Windows 11 command.

## How to enable Hey Copilot command Windows 11

### Step 1:

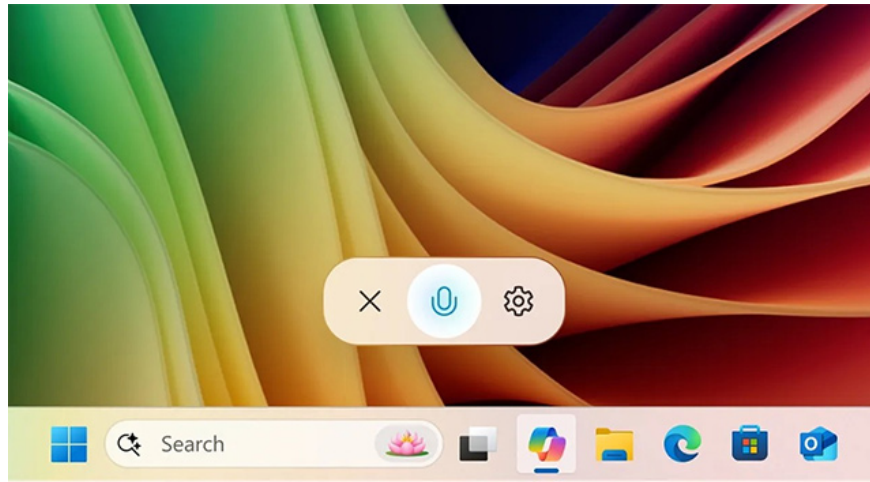

At the Copilot interface on Windows 11, click on **the sidebar icon** and then click on **your profile picture** . Then the user **selects Settings** in the displayed list.

### Step 2:

Go to the settings interface, scroll down to **the Listen for Hey, Copilot setting** and then **enable it to use** .

Once you've completed the steps, you can summon Copilot with the 'Hey, Copilot' voice command, similar to the previous feature available with Cortana for Windows 10. You can also ask Copilot many questions you care about, such as 'Hey, Copilot, what's the weather today?'.

You can always end the conversation by clicking the X button in the interface or waiting a few seconds without speaking.

If you don't want to use this Hey Copilot command anymore, just turn off the Listen for 'Hey, Copilot' setting in Copilot settings on Windows 11.

This feature is available since Copilot version 1.25051.10.0 and will be rolled out to everyone in the near future.
