

# Instructions to fix Skype do not show online status

Like Yahoo, Facebook, Skype also has the function of displaying Online mode when logging into account. However, there are many users complaining that their account does not display Online notifications. Please refer to the article below to learn how to fix this error.

Like Yahoo, Facebook, **Skype** also has the function of displaying Online mode when logging into account. However, there are many users "complaining" that their accounts do not display Online notifications. Please refer to the article below to learn how to fix this error.

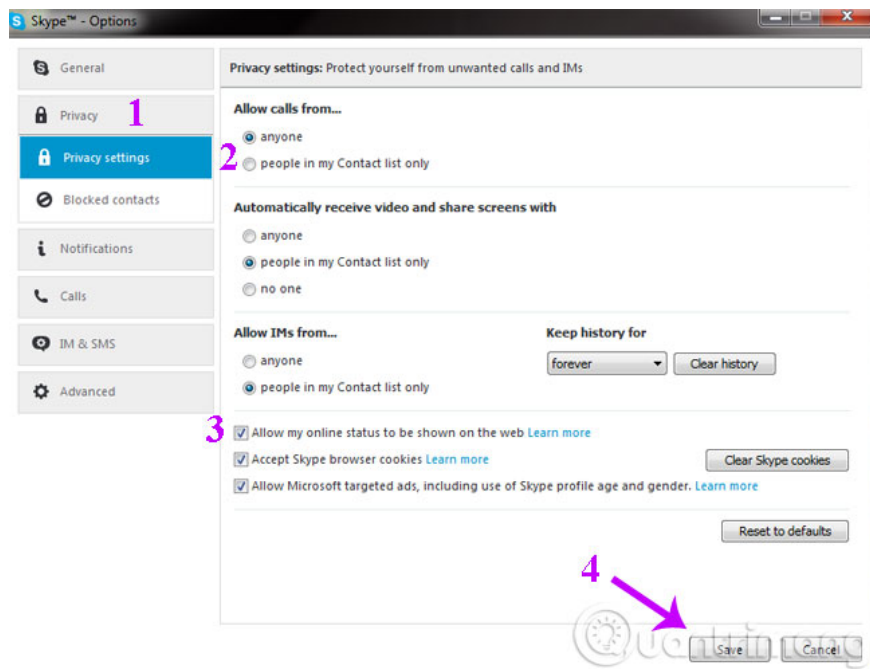

1. How to delete chat history on Skype
2. Instructions to retrieve Skype password
3. How to use Skype on the web

**Step 1 :** At the Skype interface, click the **Tools** menu, select **Options** . (or press **Ctrl +,**)

**Step 2 :** When the **Skype - Options** window appears, go to **Privacy >> Privacy settings** to reset privacy.

Then look to the right side of the screen and enter the words **Allow my online status to be shown on the web** to display the status online on the Web. Finally click **Save** to save the settings.

Conversely, if you want to log in offline, just uncheck the words **Allow my online status to be displayed on the web** , then click **Save** .

With just 2 simple steps, you can overcome the situation of not showing Online status on Skype. Very interesting, aren't you?

**Good luck!**
