

Instructions to hide Taskbar in 2 steps

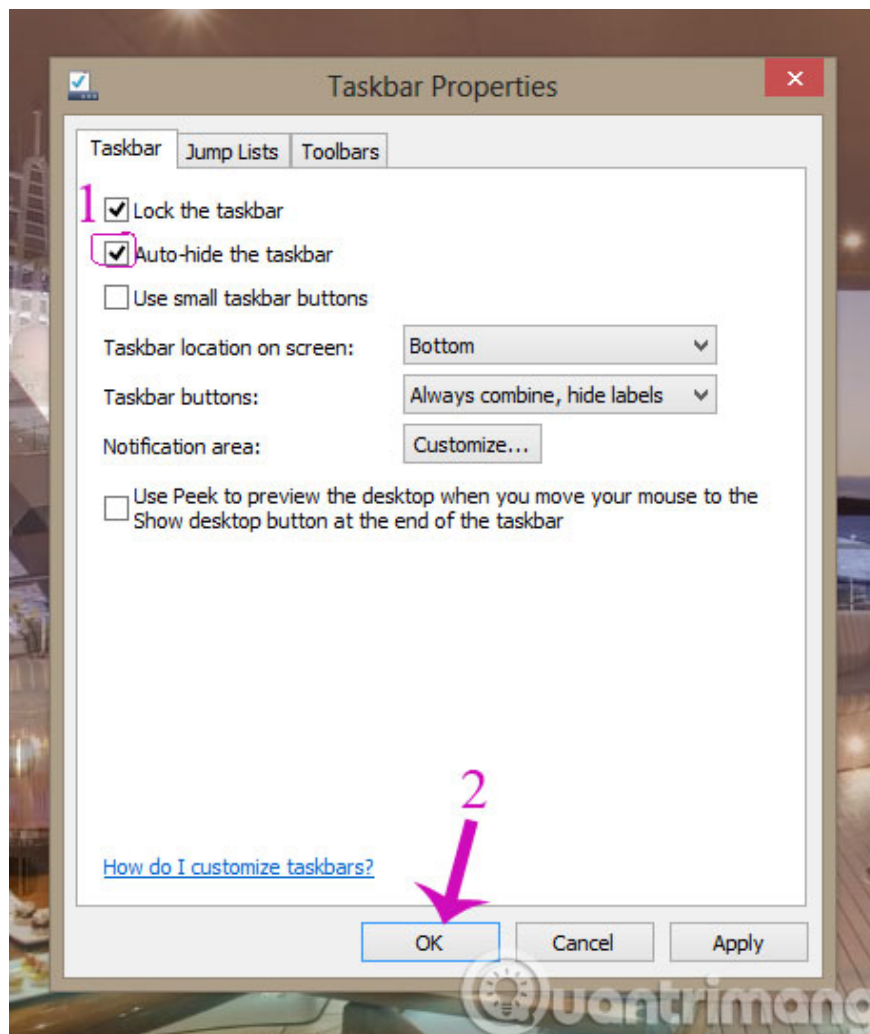

You want to take a picture or shoot the Desktop screen but feel entangled because of the appearance of the Taskbar. And you want to temporarily put it away for work but do not know how to do it? Please refer to our instructions to hide / show the Taskbar below.

You want to take a picture or film a Desktop screen but feel entangled because of the "appearance" of the Taskbar. And you are trying to temporarily "save" it to work, but don't know how to do it? Please refer to our instructions to hide / show the Taskbar below.

Step 1 : From the **Desktop** , right-click on the **Taskbar** , select **Properties**

Step 2 : At the **Taskbar Properties** window, check the **Autohide the Taskbar** option and click **OK** .

Now that you look at the bottom of the screen, the Taskbar is hidden, you have to move the cursor to that position, it will show up.

To display it again, you can remove the **Auto-hide the taskbar** option .
