

Instructions to install Cuong Tieu Ngu theme for iPhone / iPad

Cuong Tieu Ngu theme set can be installed on iOS device. However, those who want to install and use this theme are jailbroken.

Cuong Tieu Ngu is a cartoon character that many of you mentioned recently. Viewers will be acquainted with the cute Cuong Tieu Ngu boy, or he can bring the boy to the smartphone through the Cuong Tieu Ngu theme on the iPhone / iPad. Compared to installing Cuong Tieu Ngu theme on a simpler Android device, the iPhone / iPad to jailbreak can be installed. Readers can refer to the tutorial on installing Cuong Tieu Ngu theme on iOS in the article below.

Step 1:

First of all, we need to install the Winterboard app on the device. Visit **Cydia** , at the **Search tab** you **type Winterboard keywords** and access. Click **Modify** in the right corner of the interface. Continue clicking **Install** to proceed to install Winterboard. When installing, you need to restart the device.

Step 2:

Next, download **file icon Cuong Tieu Ngu** for Winterboard on your computer according to the link below:

1. Download file Cuong Tieu Ngu icon

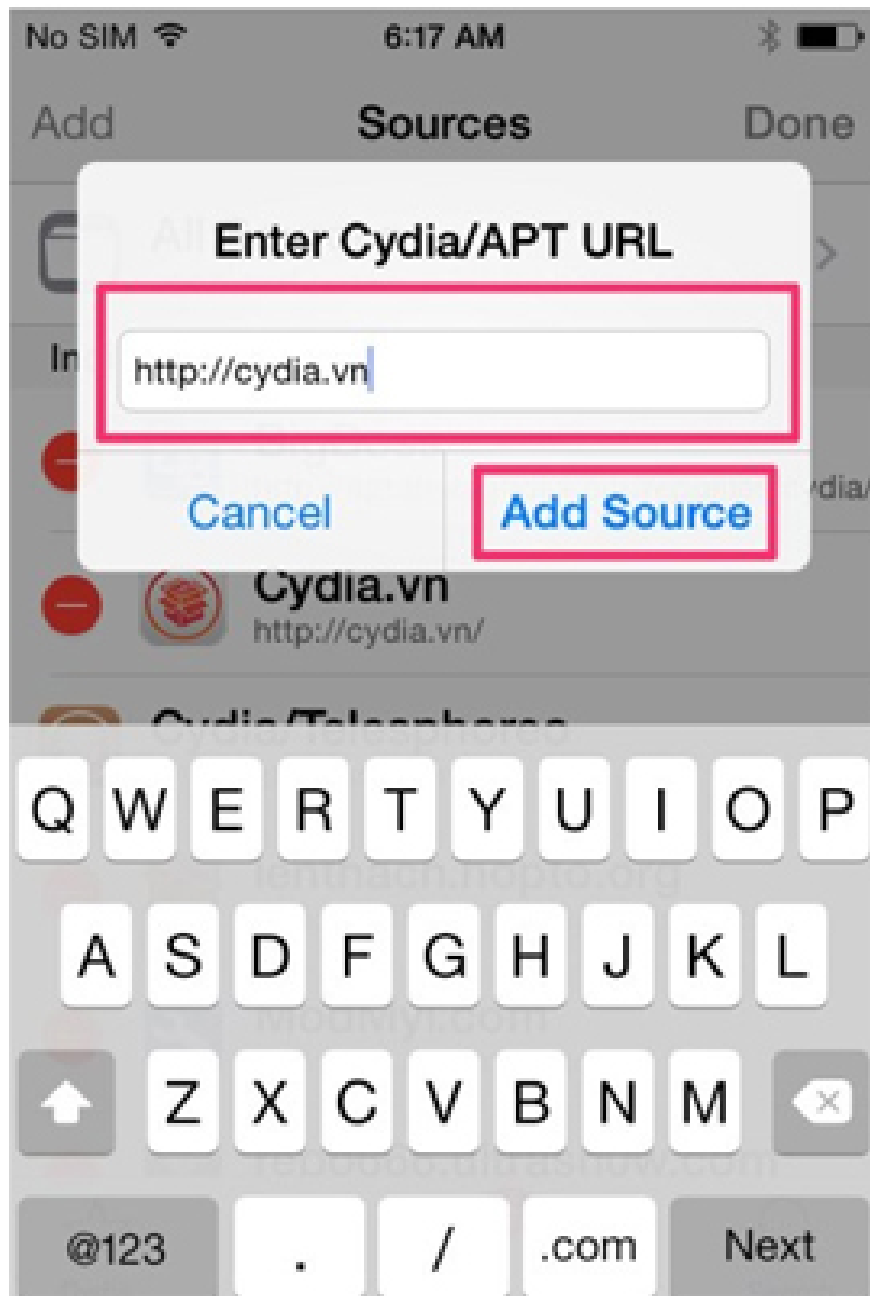

Step 3:

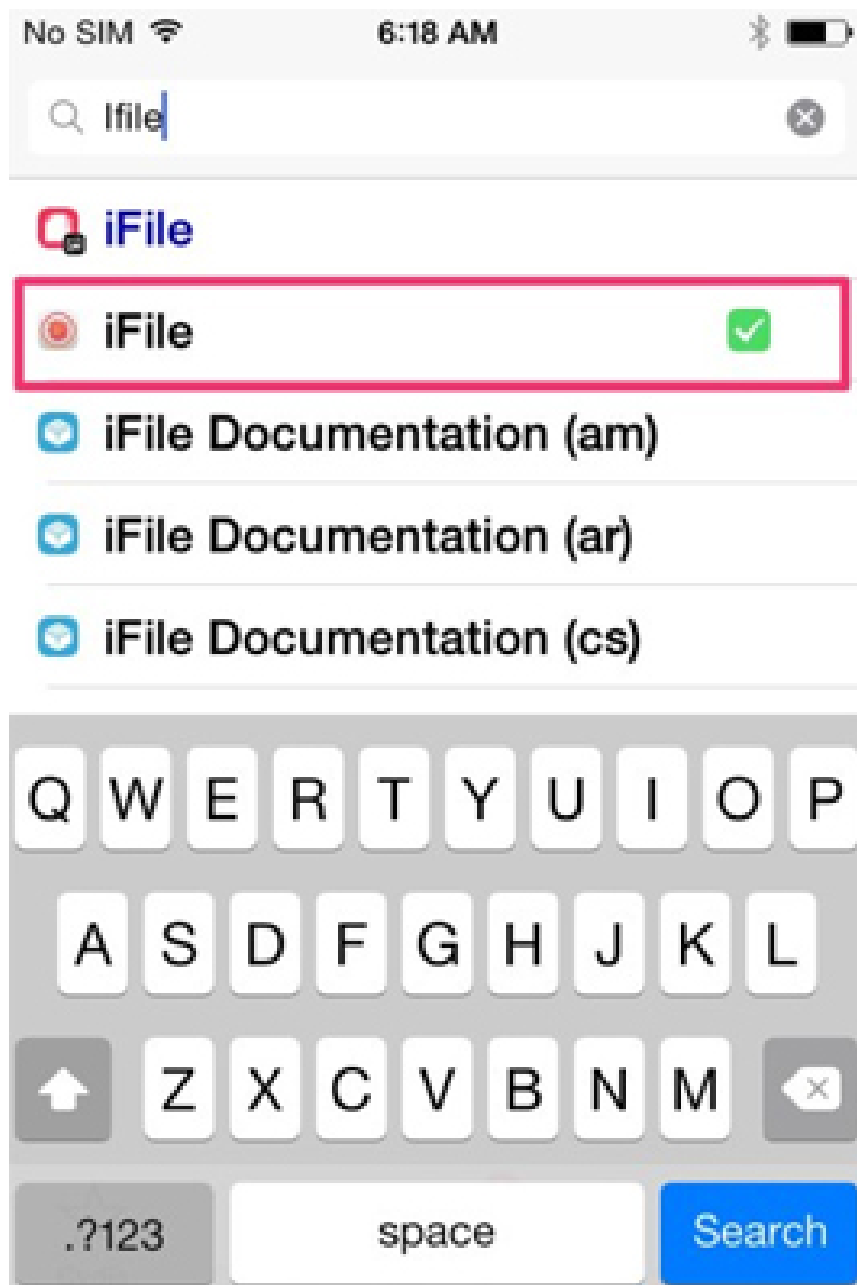

We continue to implement on iPhone / iPad. This step you will install the iFile application to copy and process the downloaded file icon on your computer to iPhone.

Users **access Cydia** , click the **Source tab** . Then, click on **Edit> Add** . Appears a small window, type Cydia.vn homepage address as below, then click **Add Source> Add Anyway** .

<https://cydia.vn/>

Wait for Cyadia to access and then switch to the **Search tab** and type the **keyword iFile** . We select iFile as shown below to proceed with the installation.

Step 4:

Next we will copy the icon file from computer to iPhone. **Connect 2 devices with 1 Wi-Fi network** . Click on **iFile** then select **the globe icon** at the bottom of the interface to create iFile connection.

At the **Web Server** interface, you will see **the IP address is http://192.168.1.7:10000** so we can access from iPhone to the computer.
