Lưu thay đổi | Hủy

Mạng liên kết: Không có mạng liên kết.

Step 3: Immediately afterwards, a new notice board will appear. Check the **Logout** box from recent devices, to log out of Facebook from all used devices. Click **Continue**.

Đã đổi mật khẩu

Nếu bạn cho rằng ai đó có thể biết mật khẩu cũ của mình, bạn nên đăng xuất khỏi mọi điện thoại, máy tính khác và kiểm tra các thay đổi gần đây cho tài khoản của mình.

Đăng xuất khỏi các thiết bị khác
Tiếp theo, chúng tôi sẽ giúp bạn kiểm tra các thay đổi gần đây.

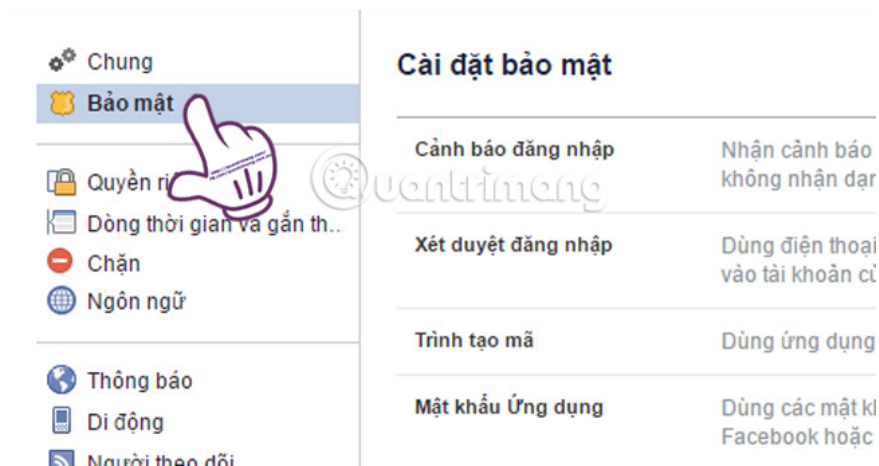

Duy trì đăng nhập

Tiếp tục

Step 4: Facebook will display an option page that allows you to review and set up security on Facebook. We can skip this step. If you want to press **Start** to do it.

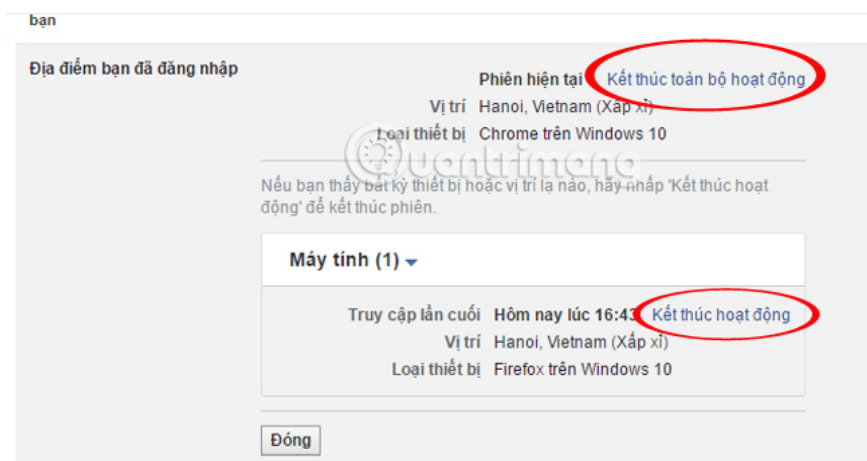

Step 5: To increase the assurance that no device is logged into your Facebook account, at the General account settings interface, click on **Security**.

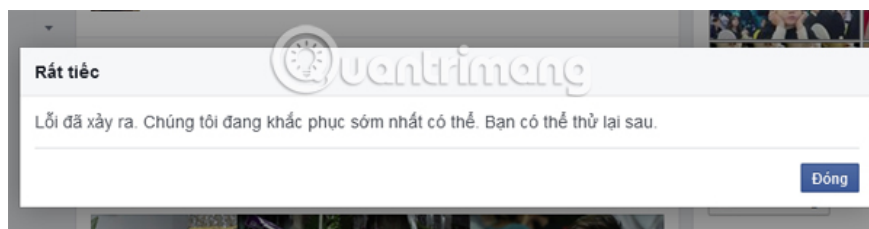

Step 6: Scroll down and select the **Location** you have logged in.

Soon, you will see the device is accessing the account and location. Click **End activity** for all locations currently displayed by Facebook, even with Facebook Messenger.

If the other party continues to have any actions on Facebook, the following error message will be reported:

After completing the steps, we have exited the Facebook account remotely and prevent the bad guys from taking advantage of our account. In order to avoid being hacked, during the use process you should avoid malicious links, ads of unknown origin and have definitely enabled 2-layer authentication to make it safer for your account.
