

Instructions to quickly download multiple photos at once to your device on iOS

If you've ever used iOS's Safari browser, you'll be very tired when you want to save the image of your website, especially when you want to save multiple photos. So how to improve this?

If you've ever used iOS's Safari browser, you'll be very tired when you want to save the image of your website, especially when you want to save multiple photos. So how to improve this?

Today, the Network Administrator has found a solution to help you overcome this situation: using the application named Save Images - Downloader for Safari, this application is quite interesting and is free to download. So what are you hesitating for, but don't quickly own it about your device to use.

Usage is as follows:

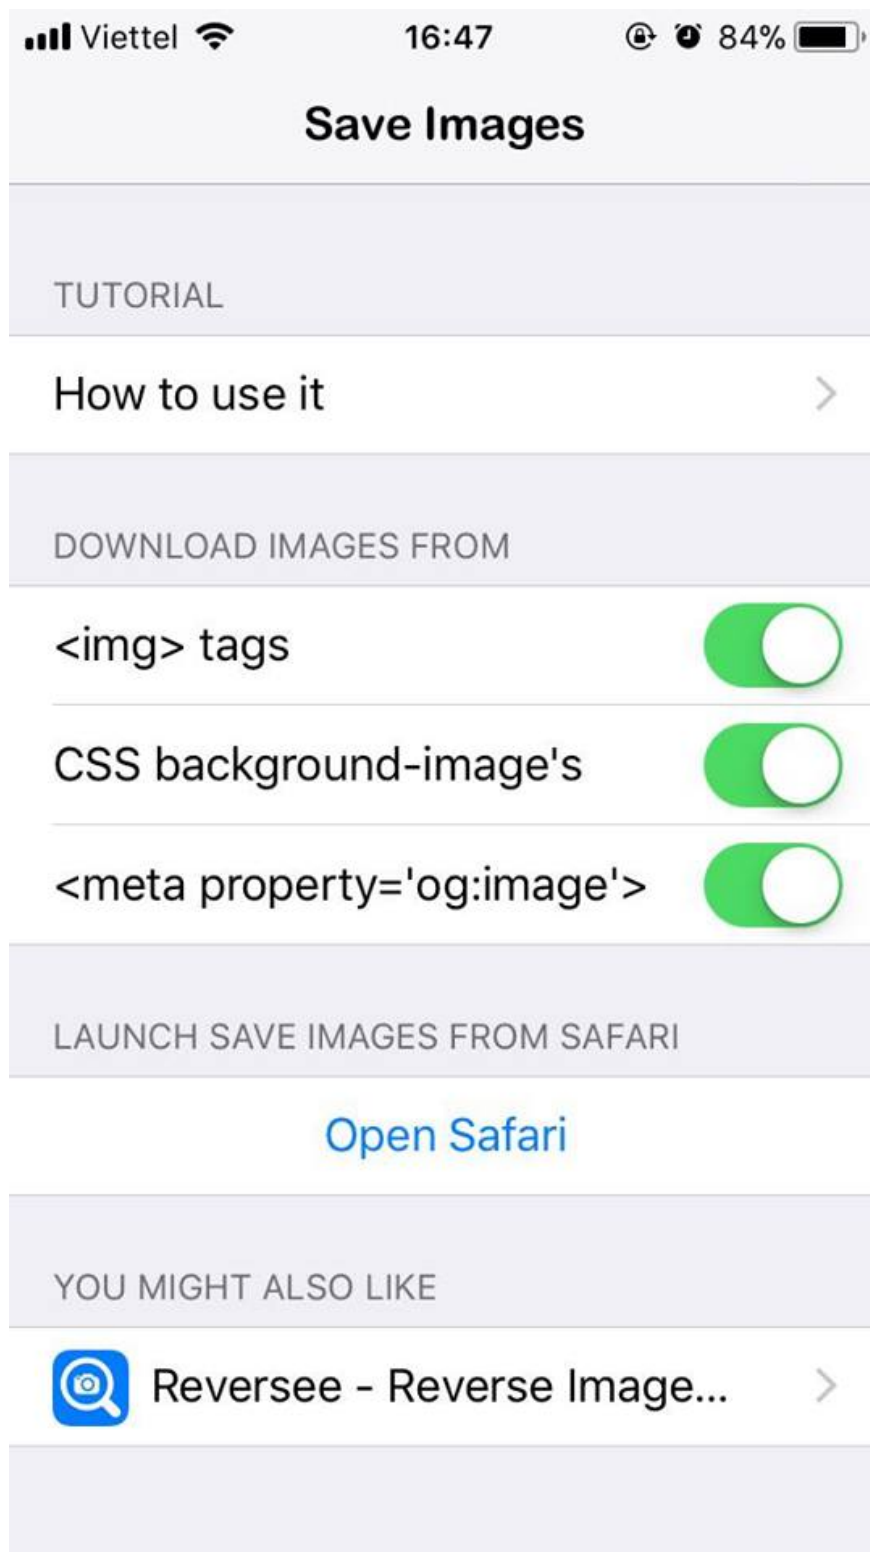

Step 1:

First you need to download the application to your computer to use, you can access Appstore or link below to download.

1. Download the Save Images - Downloader for Safari application

Step 2:

After downloading, you access the application to start, now you will see the system has 3 items available for you as shown below.

Step 3:

Now you click on the word Open Safari, the system will now take you to Apple's home page, now click on the Share button in the middle of the screen, then drag right and select the **Add** item. Now you just need to turn on **Save images** to finish.

So you have activated, now try a page to download the test image, here I go to a cute baby photo gallery on Safari browser.

Step 4 : You can find photos right on Safari, select the image item, then click **Share> select Save images** .

Search bar: duy ni
Filters: TẤT CẢ, HÌNH ẢNH, VIDEO, TIN TỨC

Options: Mới nhất, GIF, Độ phân giải cao

- à o à o
