

# Instructions to record screen video on Windows 7 without software

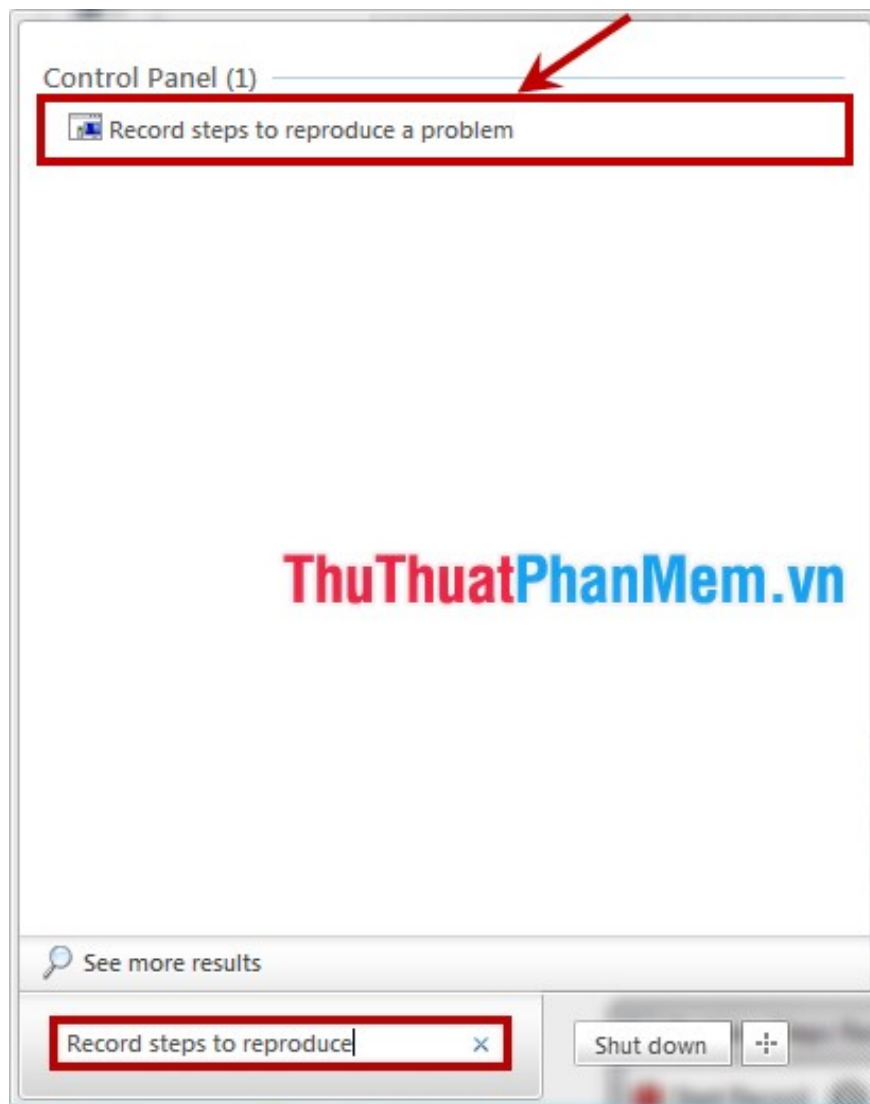

The following article guides you to record the Windows 7 computer screen without wanting to install any supporting software.

Currently returning to the computer screen is not too difficult because there is a lot of software that supports returning to the screen. But most software charges, if you do not buy the copyright, when you record, record the screen will display the logo of that software.

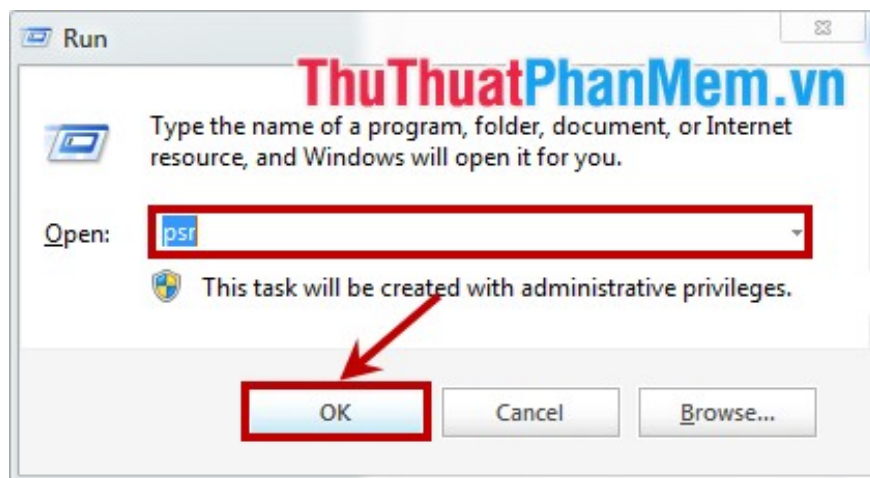

Therefore, you want to return to the operation on the Windows 7 computer screen without wanting to install any supporting software.

The following article guides you to record the Windows 7 computer screen without software.

**Step 1:** Click the **Start Menu** and enter the keyword *Record steps to reproduce* in the *Search programs and files box* and open the **Record steps to reproduce a problem** .

Or you press **Windows + R** key combination and enter the command *psr* and click **OK** .

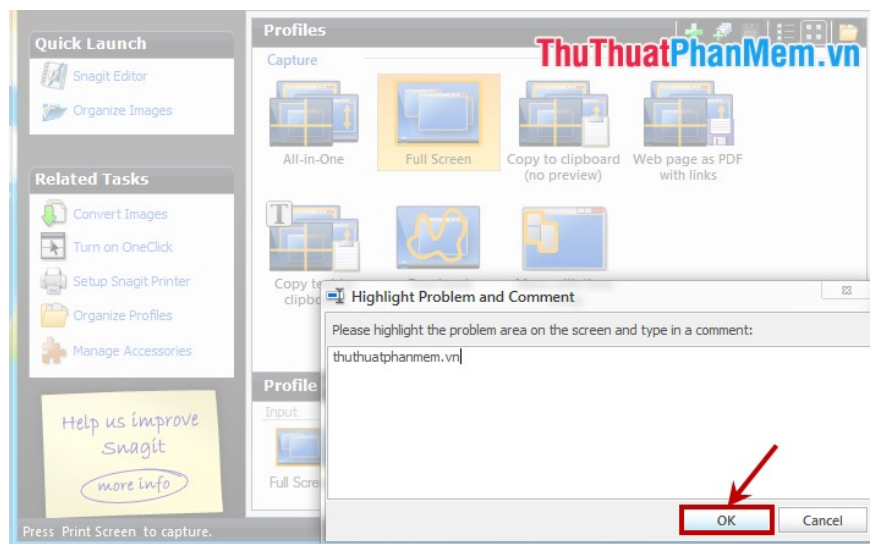

**Step 2:** On the computer, the **Problem Steps Recorder** dialog box will appear , click **Start Record** or **Alt + A** to start recording.

**Step 3:** While returning to the screen operation, between each operation you can click **Add Comment** to add notes for that operation.

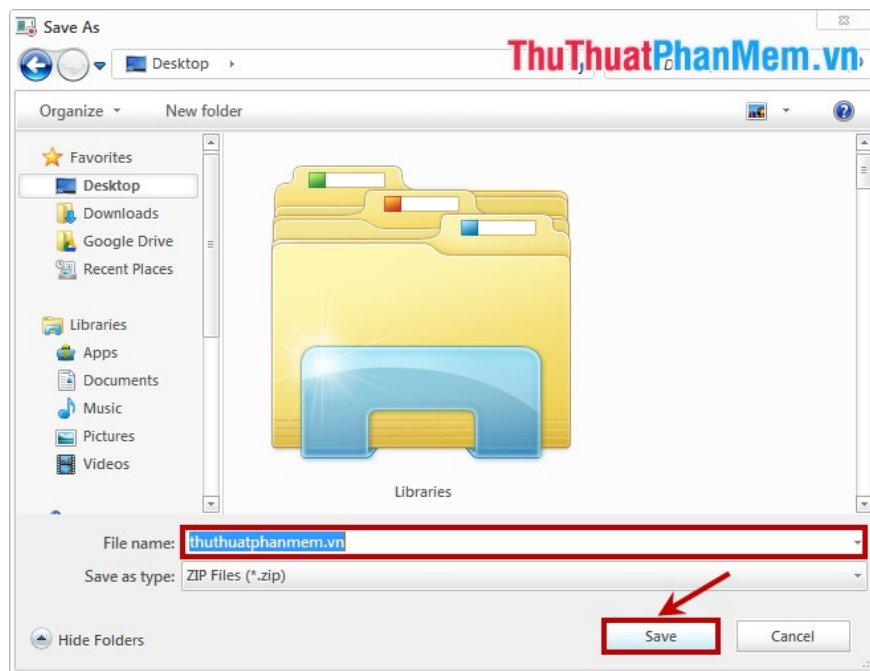

**Highlight Problem and Comment** dialog box appears, enter the content of the note and click **OK** to complete.

**Step 4:** After the recording is complete, press **Stop Record** (or press **Alt + O**).

The **Save As** dialog box appears, select the folder containing the file, enter the file name in the File name and select **Save** to save.

The file is saved in .Zip format when you extract it will be a Problem file with the date and time you recorded. The Problem file format is .mht this is a type of web format. You can view with Word with each image in Word is an operation that you just recorded.

You can also watch it as a slide show.

This file contains all the steps and information that was recorded to help you describe the problem to others.

Before sharing this file, you should verify the following:

- The steps below accurately describe the problem.
- There is no information below or on any screenshots that you do not want others to see.

Passwords or any other text you typed were not recorded, except for function and shortcut keys that you used.

You can do the following:

- [Review the recorded problem steps](#)
- [Review the recorded problem steps as a slide show](#)
- [Review the additional details](#)

Very simple, you can return to the computer screen without using the software. Good luck!
