

Instructions to remove the All apps option on Windows 10 Start Menu

On Windows 10, Start Menu is designed quite modern and friendly. In the left pane, users will see some useful programs and quick access options and All Apps options. When you click on the All Apps option on the Start Menu, will display all the programs you have installed on the system.

On Windows 10, Start Menu is designed quite modern and friendly. In the left pane, users will see some useful programs and quick access options and All Apps options. When you click on the All Apps option on the Start Menu, will display all the programs you have installed on the system.

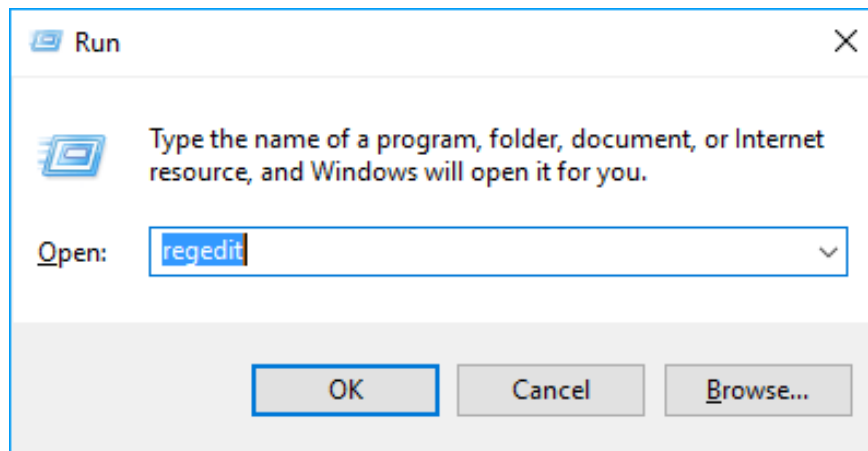

Assuming that for some reason you want to remove the All Apps option on the Start Menu, you can use Registry Editor or Group Policy Editor to remove the All Apps option on the Start Menu.

1. Use Registry Editor to remove the All Apps option on the Start Menu

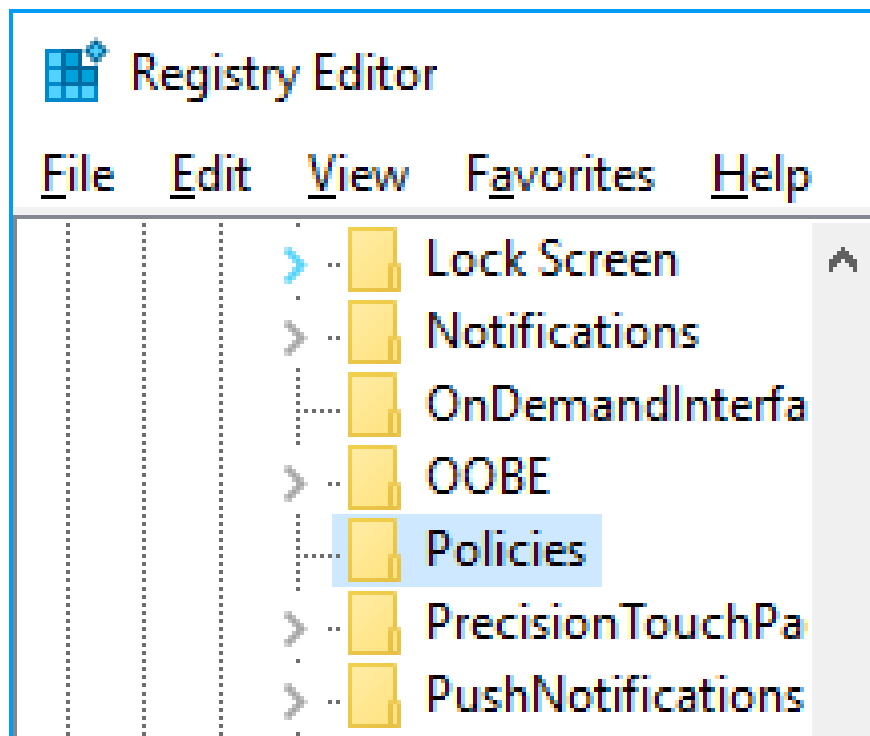

To remove the All Apps option on the Windows 10 Start Menu using the Registry Editor, all you need to do is create a new value.

To do this, first press the **Windows + R** key combination to open the Run command window, then enter **regedit** in the Run command window and press **Enter** to open the Registry Editor.

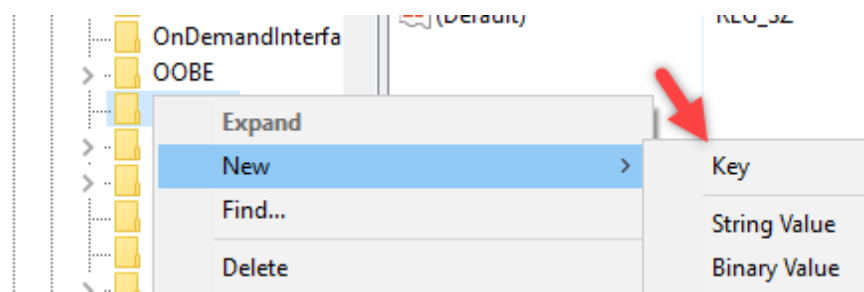

On the Registry Editor window, navigate to the key:

HKEY_CURRENT_USERSOFTWAREMicrosoft WindowsCurrentVersionPolicies

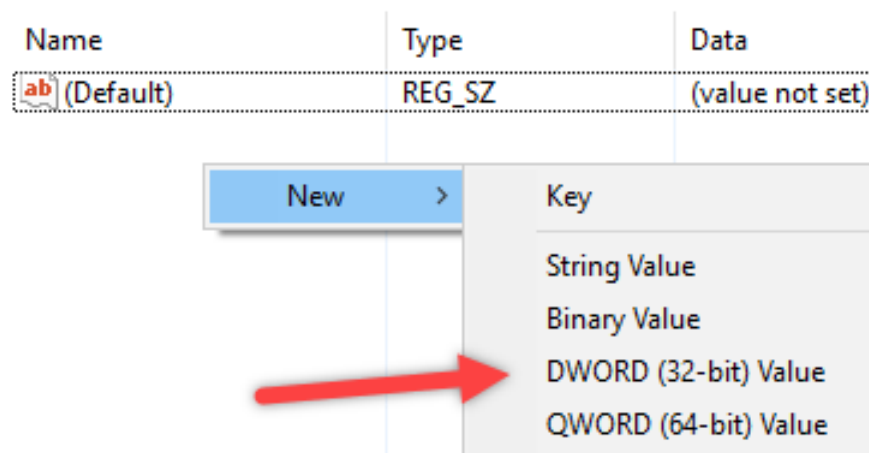

Here you right-click the **Policies** key, select **New** and then select **Key** to create a new key.

Name this key **Explorer**.

Next right-click on the right pane, select **New => DWORD (32-bit) Value** to create a new DWORD.

Next name the Value you just created as **NoStartMenuMorePrograms** and then press **Enter** .

Name	Type
(Default)	REG_SZ
NoStartMenuMorePro...	REG_DWORD

By default, the new Value you just created is set to 0 in the Value Data frame, your task is to change this value. To do this, double click on the value you just created to open the Edit value window. Here you reset the value in the **Value Data** frame to **1** and then click **OK** to save the change.

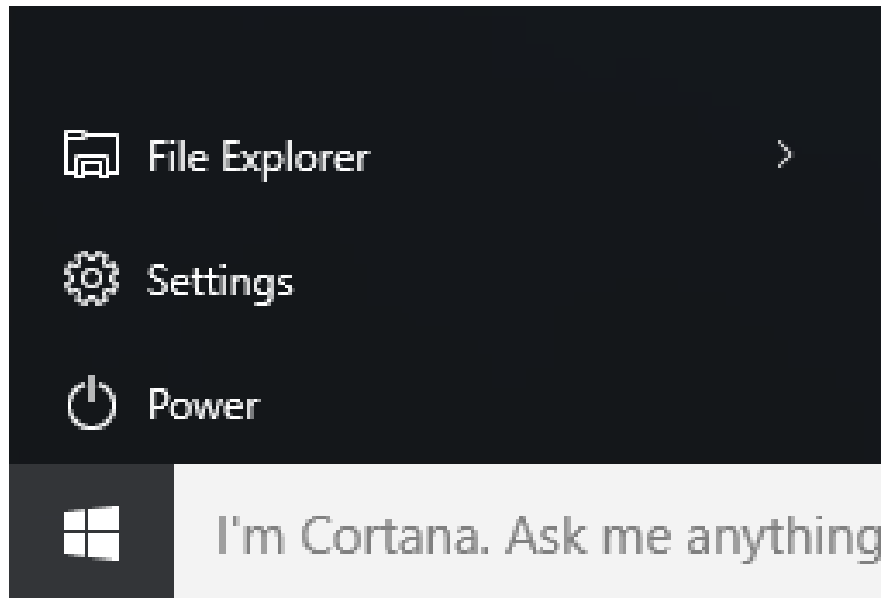

Value name:
NoStartMenuMorePrograms

Value data:
1

Base
 Hexadecimal
 Decimal

OK Cancel

Finally proceed to restart your computer and check on the Start Menu, the All apps option (all applications) is now completely gone.

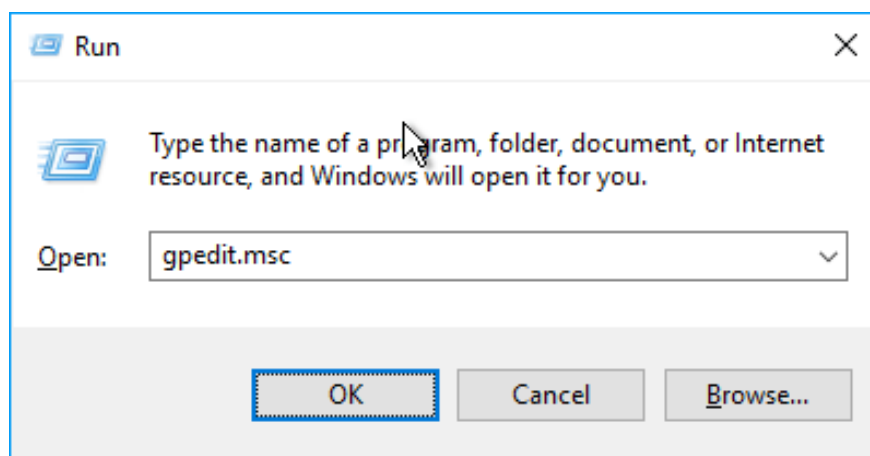

If you want to re-display the All apps option on the Start Menu, follow the same steps and change the value in the Value Data box to **0** or simply delete the new Value you created.

2. Use Group Policy Editor

If you use Windows Pro or Enterprise version, you can use Group Policy Editor to remove the All Apps option on Start Menu.

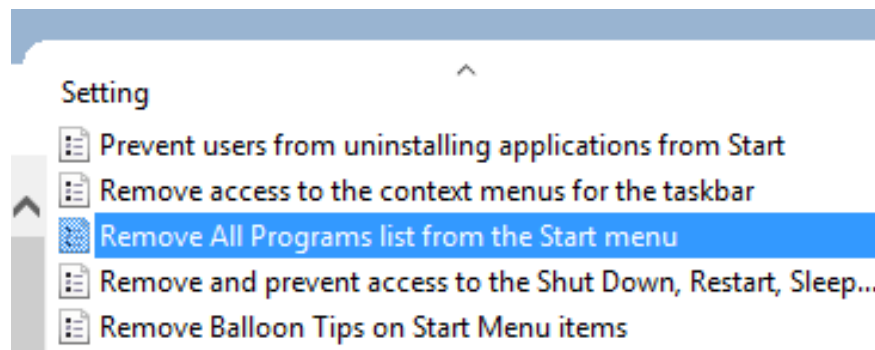

First, press the **Windows + R** key combination to open the Run command window, then enter **gpedit.msc** in the Run command window and press **Enter** to open the Group Policy Editor.

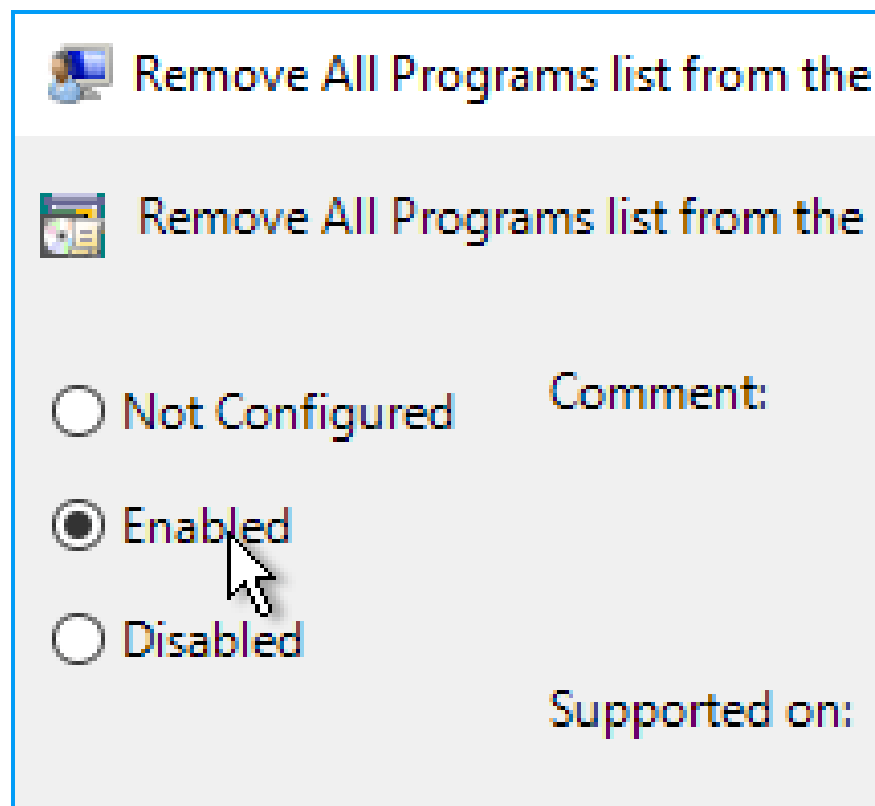

Next on the Group Policy Editor window, in the left pane you navigate to the key:

User Configuration -> Administrative Templates -> Start Menu and Taskbar

Find and double-click **Remove All Programs list from the Start menu** in the right pane to open the options properties window.

On the properties window of the option, click **Enabled** , then click **OK** to save the changes.

Just restart your computer or log out and log back in to see the All Apps option disappeared on the Start Menu.

If you want to re-display the All Apps option on the Start Menu, follow the same steps, then on the properties window click on **Disabled** or **Not configured**.
