

# Instructions to reset Windows Store application on Windows 10

Windows Store application on Windows 10 integrates thousands of free apps, in addition users can buy games, movies, music, TV shows. However, quite recently, many users have reflected that during use, opening Windows Store often hangs and even closes immediately after opening. During the process of downloading and installing the game, an application from the Store often fails.

Windows Store application on Windows 10 integrates thousands of free apps, in addition users can buy games, movies, music, TV shows. However, quite recently, many users have reflected that during use, opening Windows Store often hangs and even closes immediately after opening. During the process of downloading and installing the game, an application from the Store often fails.

To fix these errors, the best solution for you is to reset the Windows Store. In the article below, Network Administrator will guide you how to reset Windows Store application on Windows 10.

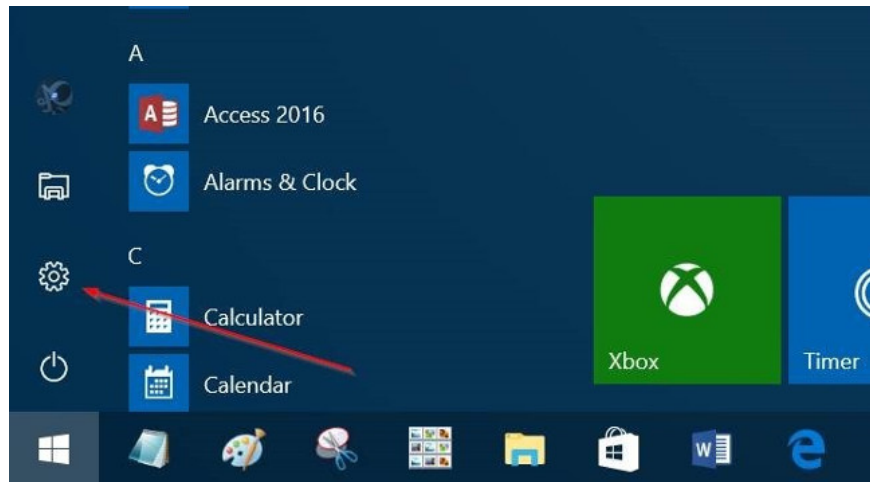

## Reset the Windows Store application on Windows 10

Follow the steps below to reset the Windows Store application on Windows 10:

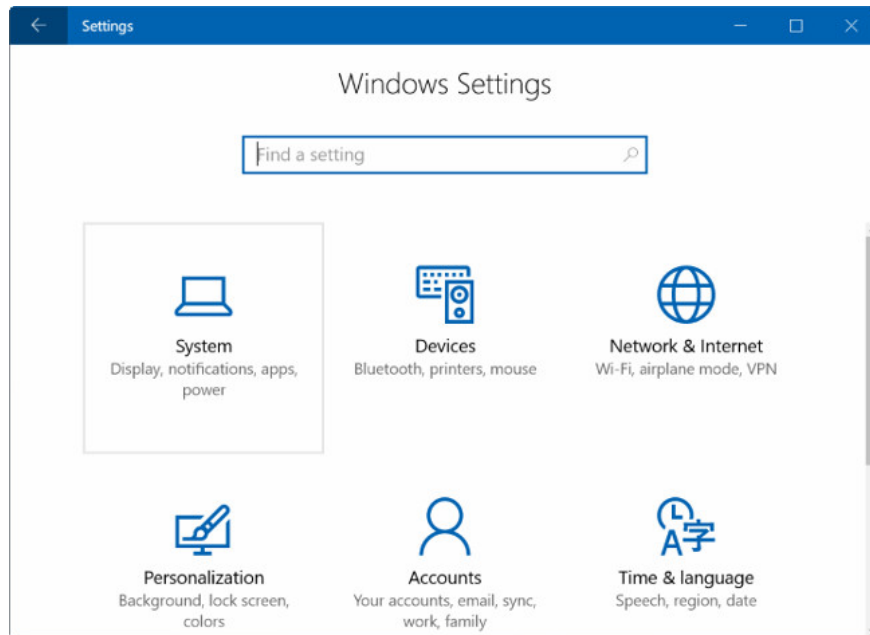

### Step 1 :

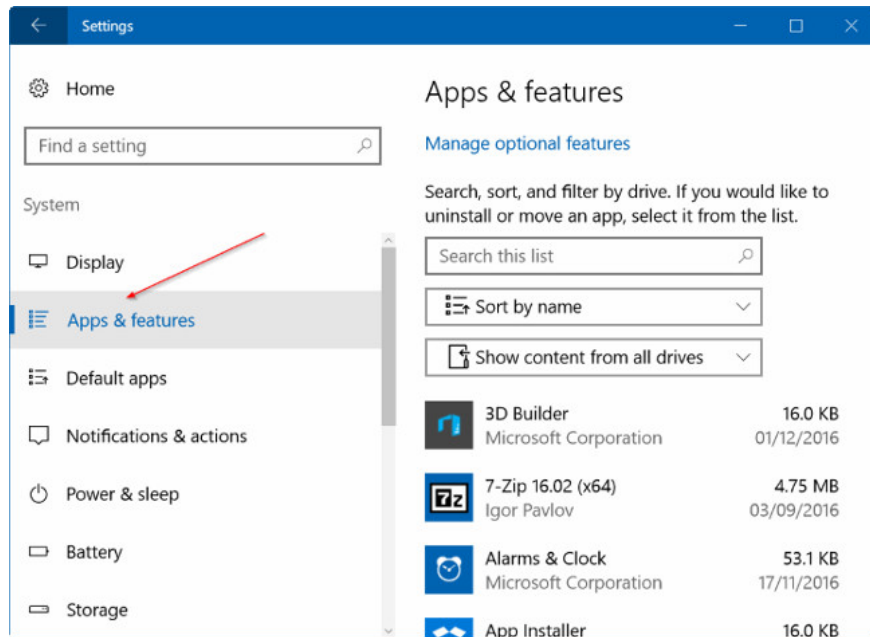

Open the **Settings** application by clicking the Settings icon on the Start Menu or pressing the **Windows + I** key combination.

**Step 2 :**

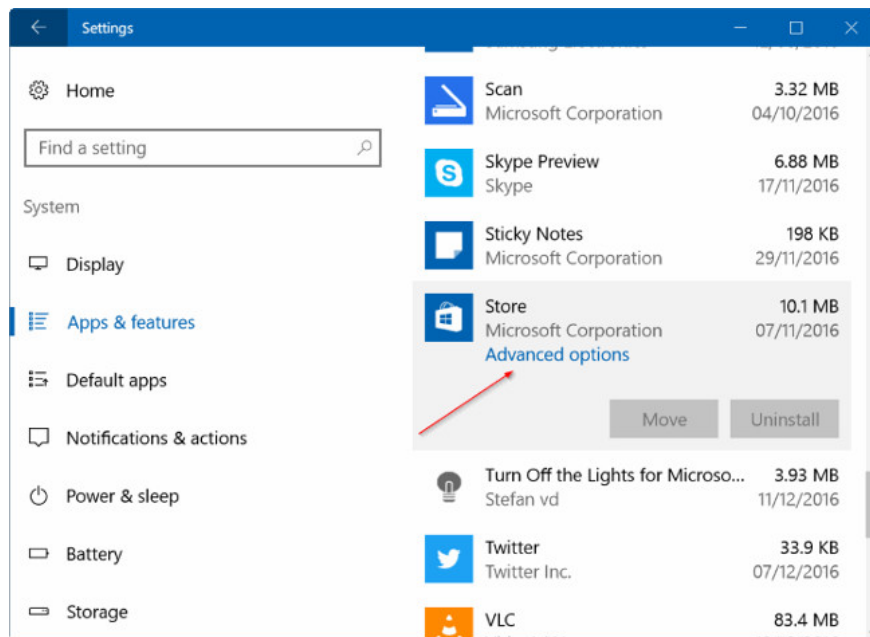

On the Settings window, find and click the **System icon** , then click **Apps & Features** . You will now see all installed applications and computer applications.

### Step 3 :

Click on the **Store** application to see the **Advanced options** link. Your task is to click on the **Advanced options** link.

### Step 4 :

On the ' *This dialog will permanently delete the data app's on this device, including your preferences and sign-in details* ', click **Reset** . Then click the Reset button again to reset the Windows Store application.

Settings

## Store

### Storage usage and app reset

App: 0 bytes  
Data: 10.0 MB  
Total usage: 10.0 MB

If this app isn't working right, reset it.
