

# Instructions to send HD images, high quality photos, high resolution on Zalo

Currently on Zalo has support for users to send high quality HD images with friends quickly. You just need to check the HD box as the image will be significantly improved.

Currently, messaging applications, voice calls all support sending images to friends. This supports a lot of users when we want to send photos to friends as soon as we text each other. And now, Zalo has supported sending high quality HD images to friends. The image will be more quality than the original image we want to send. So how to send HD images to friends on Zalo? Follow the tutorial below of Network Administrator.

## Step 1:

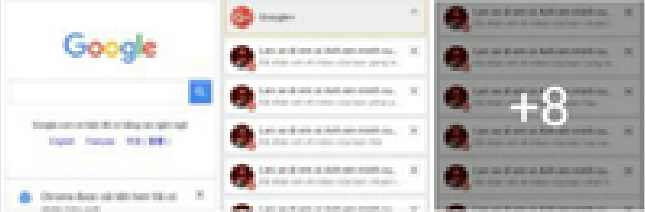

At **the chat dialog** interface with friends, click on **the plus icon** on the right side of the screen. Soon, you will see the image in the gallery on the device. If you want to find more images, swipe the screen up, or down.
