

# Instructions to set wallpaper for Messenger

Instructions to set wallpaper for Messenger. On Messenger of Facebook Web, we will use an extension developed by Vietnamese on Google Chrome.

One of the plus points of the Chat Zalo tool is that it can change the chat background image very nice and interesting. Messenger has gone through a lot of different updates but the developer has yet to update the wallpaper setting feature for chat. However, do not worry because we have a lot of support tools to set the wallpaper for Messenger. In this article, Software Tips will send you how to set the wallpaper for Messenger.

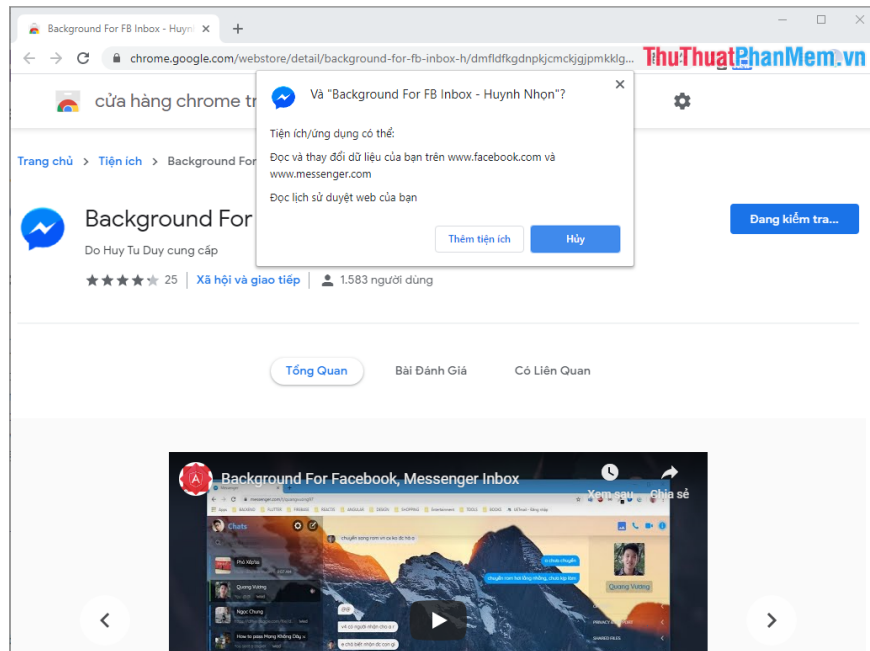

## 1. Set wallpaper for Messenger PC

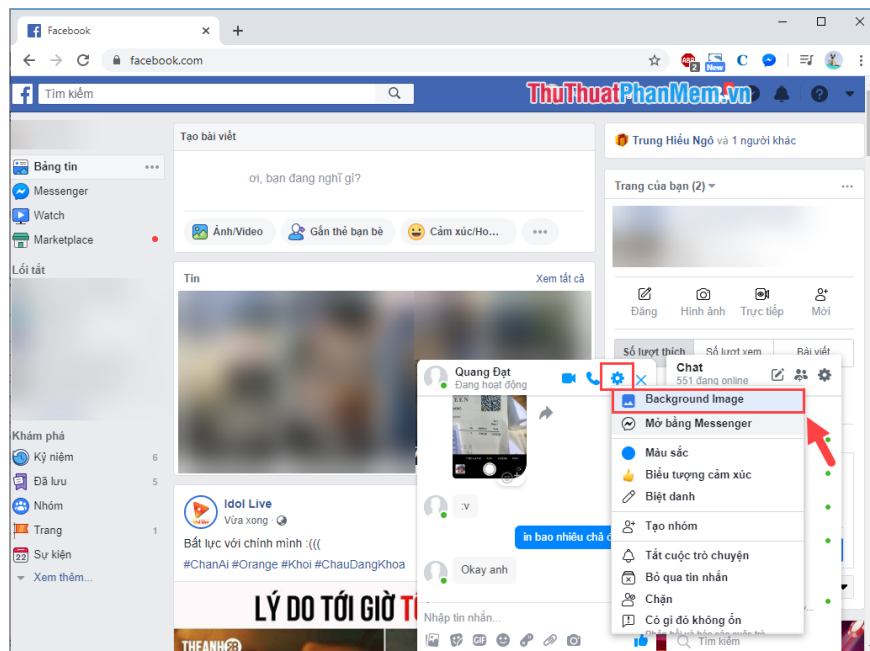

On Messenger of Facebook Web, we will use an extension developed by Vietnamese on Google Chrome.

**Home:** Background For FB Inbox

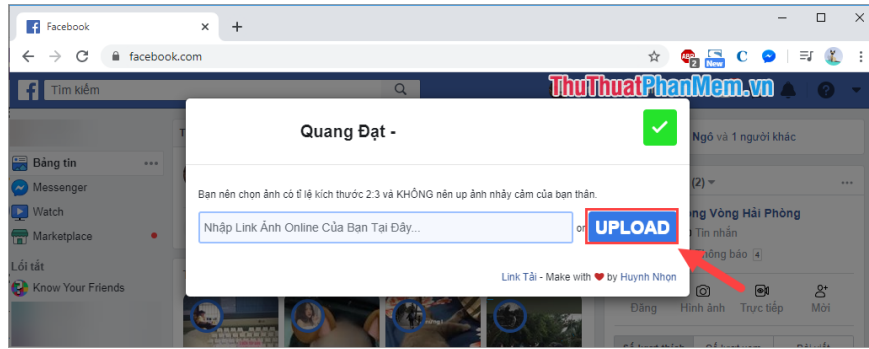

**Step 1:** You proceed to the home page and select **Add utility** to install.

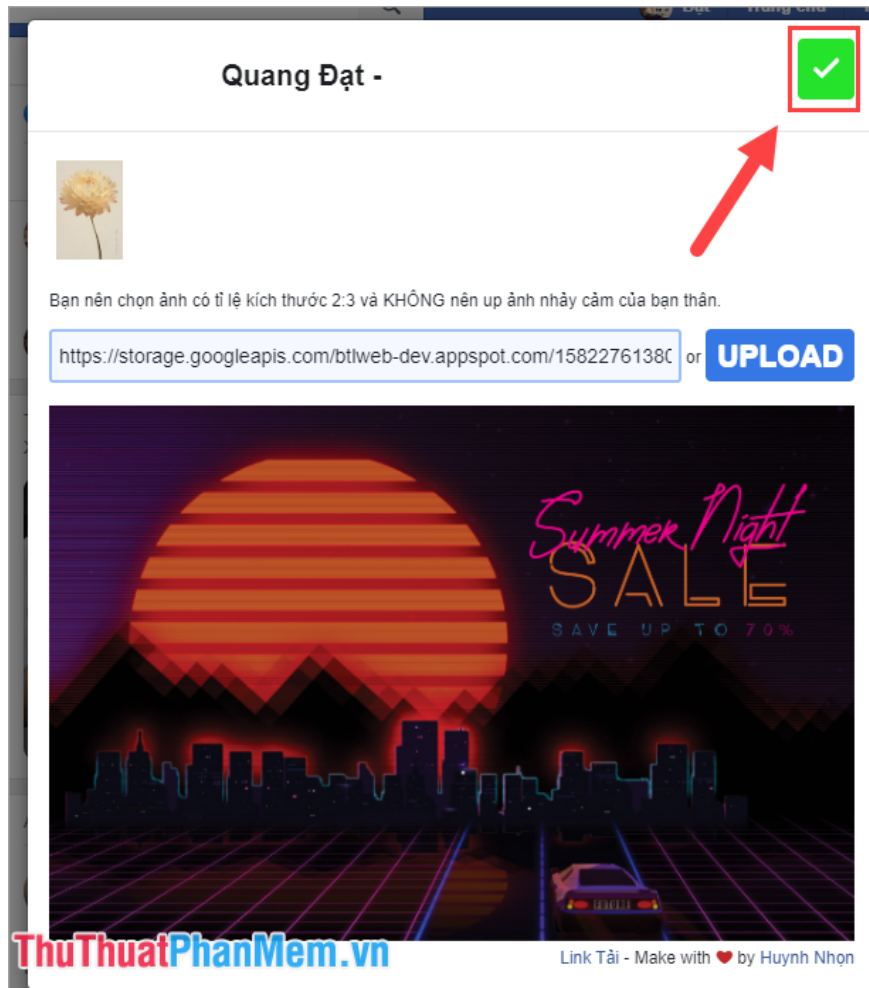

**Step 2:** After adding the extension, restart Google Chrome for the extension to be installed. Next, you open any conversation and select the **Settings** icon -> **Background Image**.

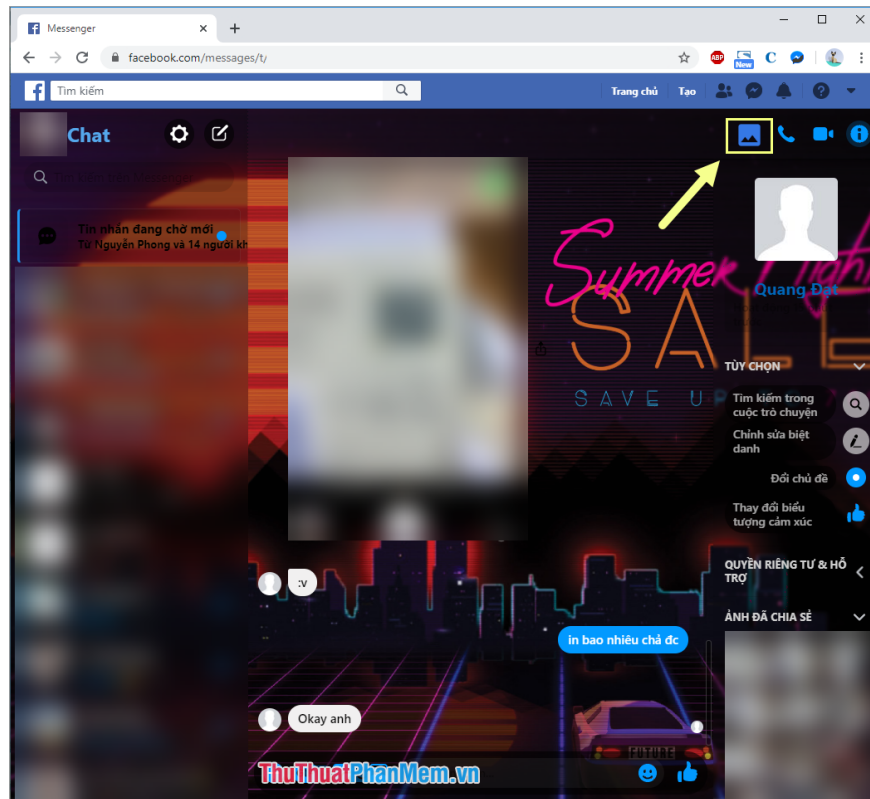

**Step 3:** You can use the **URL Link Photo Online** or select **Upload** to upload photos from your computer. Please note the image size is 2: 3 to be more beautiful.

**Step 4:** After selecting the image is finished, you press the **button V** to complete. The system will automatically save the image and set as a Messenger background.

And this is our result after changing the background of the Messenger conversation. To change another wallpaper, you can select the **Image** icon on the toolbar.

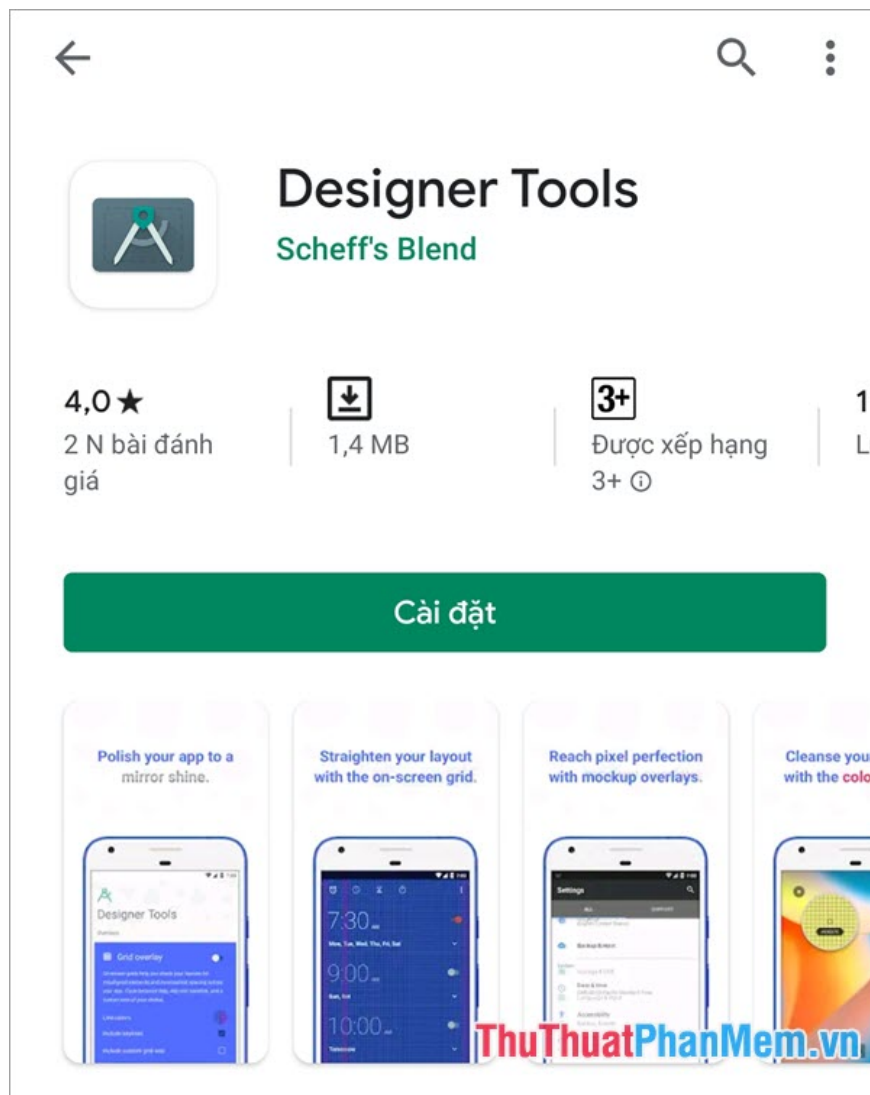

## 2. Install wallpaper for Android Messenger

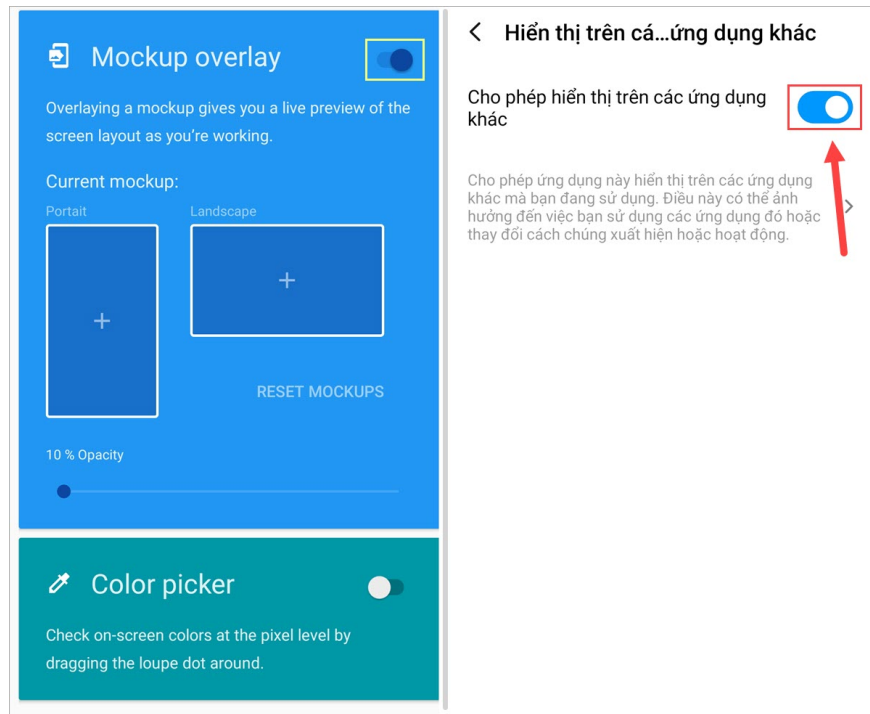

Android has a lot of software advantages and thanks to that, we can use Designer Tools to change the wallpaper for Messenger. On iOS, there is no software that can change the wallpaper for Messenger, this is a big loss.

**Home:** Designer Tools

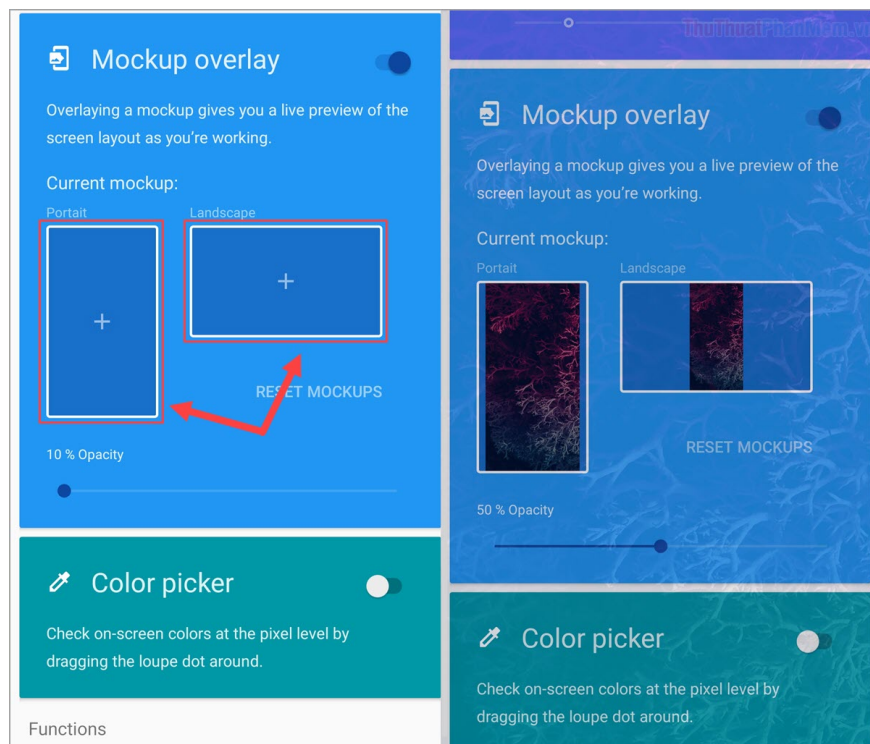

**Step 1:** You proceed to the homepage to **install** the software and use.

**Step 2:** After the installation is complete, you launch the software to use. You go to the **Mockup Overlay** section and **activate** them, there will be a request from the system to display the **overlay** image data and you also enable them.

**Step 3:** Then, you click on **Portait** and **Landscape** to select the image as the background for Messenger. You note that choosing photos for Portait is similar to Landscape (1 photo for both parts).

**Step 4:** After that, you can adjust the **Opacity** to show the density of Messenger background.

## Mockup overlay

Overlaying a mockup gives you a live preview of the screen layout as you're working.

Current mockup:

Portrait

Landscape

RESET MOCKUPS

50 % Opacity

And finally we get the following result:

In this article, Software Tips showed you how to set the wallpaper for Facebook Messenger. Good luck!
