

Instructions to turn off the creation of the Facebook security code on the phone

Many people think that turning off Code Generator can be done on the phone. However, you still have to do this on your computer. Here, we will guide you how to turn off the Code Generator security code generator on the Facebook application for your phone:

When you lend or sell your phone to others, the security on your phone is very important. Especially, turning off the Code Generator generator on **Facebook** for Smartphone applications is very necessary.

1. Guide to creating Facebook fanpage quickly
2. How to change simple Facebook password
3. Instructions to add emoticons on Facebook

Many people think that turning off Code Generator can be done on the phone. However, you still have to do this on your computer. Here, we will guide you how to turn off the Code Generator security code generator on the **Facebook** application for your phone:

Step 1 : You login to your Facebook account and click on the drop down arrow icon in the upper left corner, select **Settings**

Use Facebook as:

 Quản Trị Mạng 1 12

 My Experience 1

 Quản Trị Mạng...

See More...

Create Page

Manage Pages

Create Group

New Groups 200

Create Ads

Advertising on Facebook

Activity Log 24

New Feed Preferences

Settings

Log Out

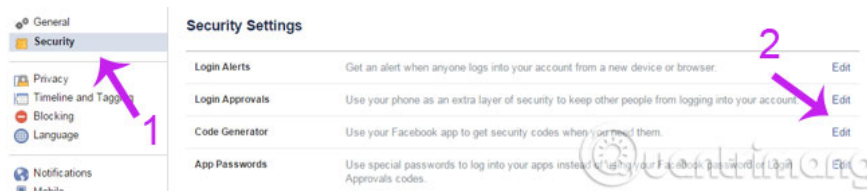

Help

Support Inbox

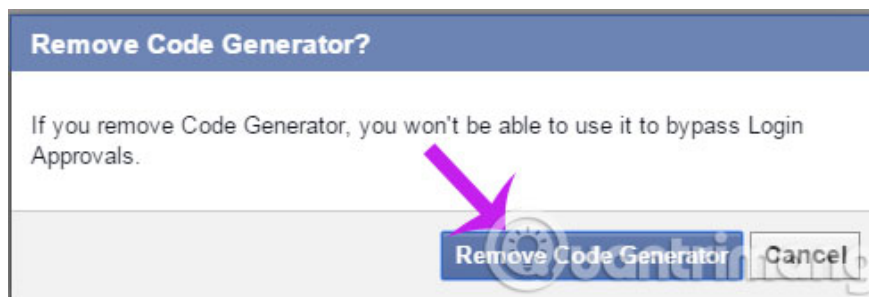

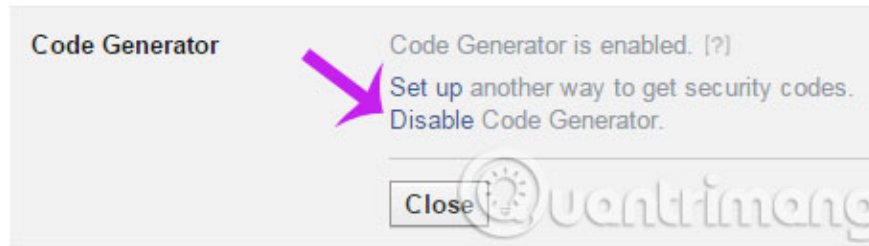

Report a Problem

Step 2 : When the new window appears, select the **Security** menu in the left column. Look at the right column, find the **Code Generator** section and click on the **Edit** link

Step 3 : Click on the link **Disable** and click **Remove Code Generator**

So you have completed the process of turning off the security code for Facebook on your smartphone.

Good luck!
