

Instructions to uninstall many applications at once on Windows 8.1

On Windows 8 operating system, Microsoft has simplified the process of uninstalling applications. Windows 8.1 not only allows users to remove many applications and programs at the same time, but also allows users to remove many sync apps on multiple computers.

Uninstalling applications from Store on Windows 8 is quite simple. Just right-click the application you want to remove in the application bar and then click Uninstall to remove the application from the computer.

Although you can right-click the program you want to remove on the Start Screen and select Uninstall, Windows will display the Programs and Features window, where you will continue to right-click the program name and application. You want to uninstall and select Uninstall.

On Windows 8 operating system, Microsoft has simplified the process of uninstalling applications. Windows 8.1 not only allows users to remove many applications and programs at the same time, but also allows users to remove many sync apps on multiple computers.

In the article below, Network Administrator will guide you through the steps to uninstall many applications at the same time on Windows 8.1.

Uninstall multiple applications at once:

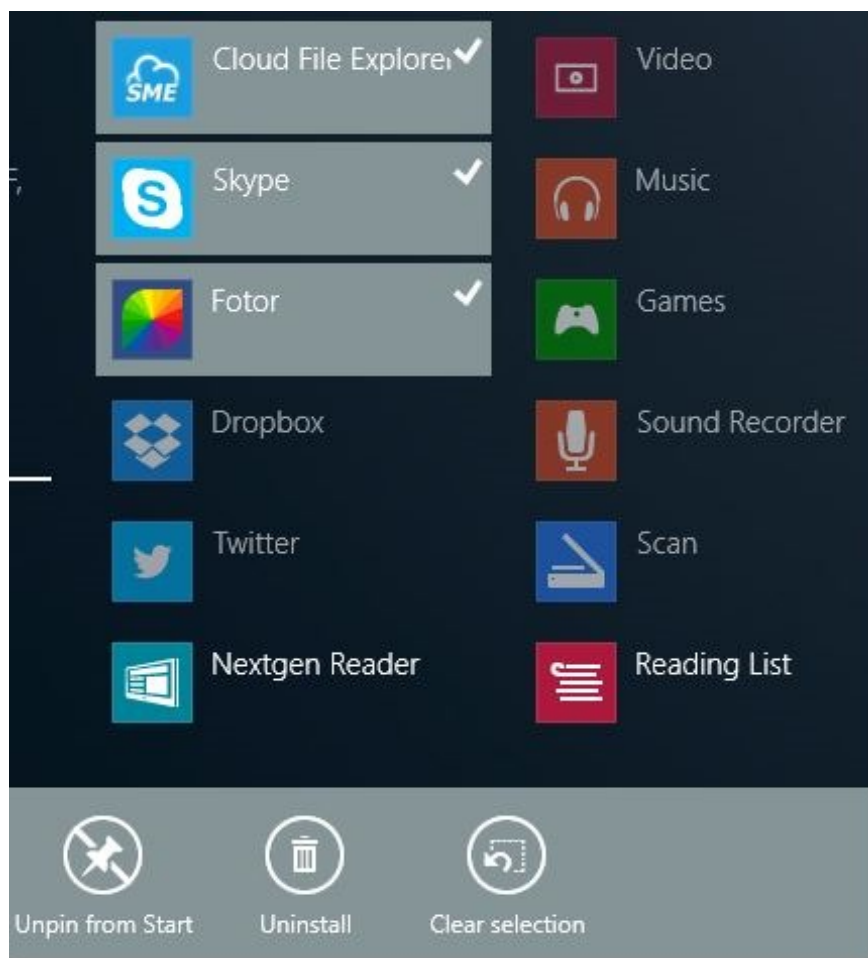

Step 1:

Click the arrow icon that appears when you move the mouse pointer to the lower left corner of the Start to open the Apps Screen or Start Screen.

Step 2:

Select all apps that you want to uninstall. To do this, right-click on all the tile apps you want to uninstall in the app bar at the bottom of the screen.

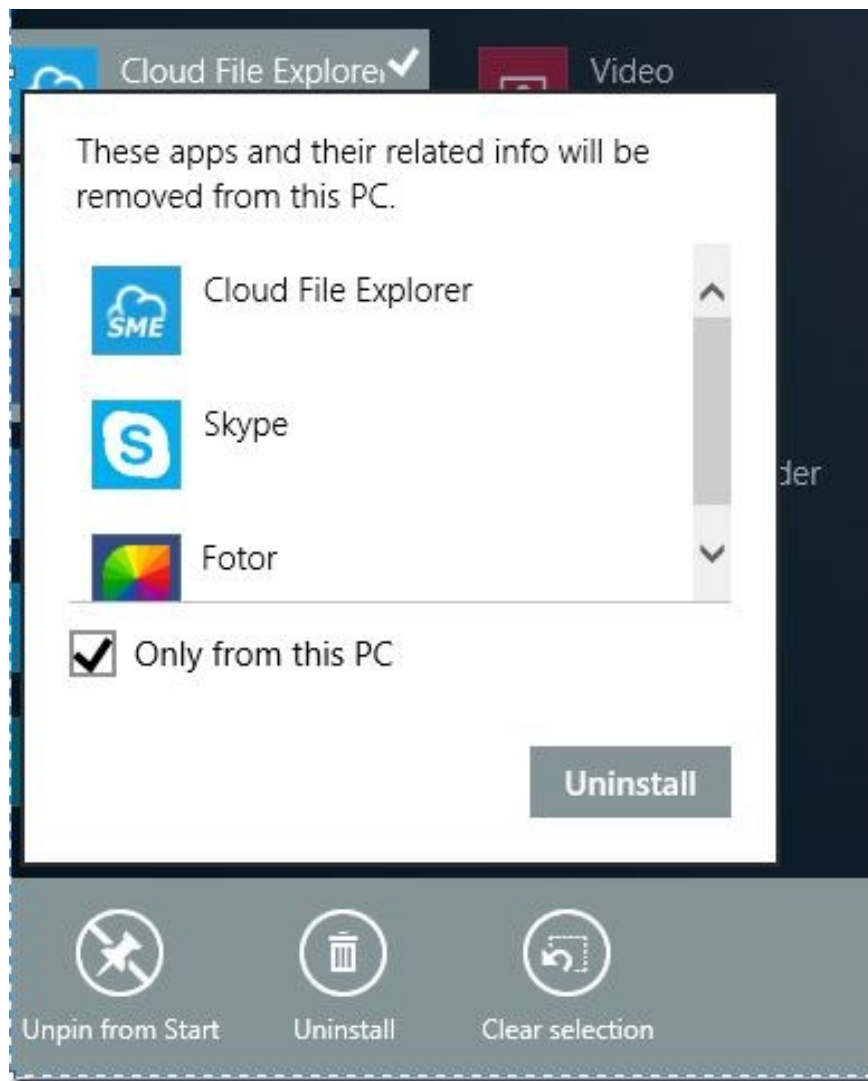

If you're using a tablet, the touch device just touches the application tile and then swipes up.

Step 3:

Click the **Uninstall** icon on the application bar to see the names of the applications you have selected on a small menu.

Check the **Only** option **from this PC** if you do not want to uninstall the selected applications from the sync computer.

Step 4:

Finally, click **Uninstall** to uninstall the selected applications.
