

## 'Insurance' data for businesses

Backing up data is likened to insurance investments for the future. Enterprise data is an important asset and is easily lost by problems of hardware failure or unpredictable natural disasters. This can be a sales contract, an accounting file, marketing information, email and customer information.

**Backing up data is likened to insurance investments for the future. Enterprise data is an important asset and is easily lost by problems of hardware failure or unpredictable natural disasters. This can be a sales contract, an accounting file, marketing information, email and customer information.**

Backing up data is a way to intelligently protect enterprise achievements against those losses. IBM® Tivoli® Storage Manager Suite For Unified Recovery (IBM TSM SURE for short) is the leading solution for centralized data backup and recovery, automatically minimizing the risks associated with data loss. This high-end software helps businesses manage more data with less infrastructure and simplified operations. IBM TSM SURE helps businesses save money, improve the safety of data.

Towards an automated, professional backup solution, saving storage infrastructure for businesses is the outstanding advantage of IBM TSM SURE. With 'disk to disk' data transfer method, it is possible to backup directly to disk and tape to help reduce backup time and reduce server load. IBM TSM SURE only copies new or changed files from previous backups to save space and storage infrastructure. Not only that, this solution also helps to check the integrity of the stored data as well as to check the safety of data transmission that prevents problems during the backup process.

In addition, IBM TSM SURE stores data smarter with the ability to clean up tapes to remove expired files and leave space for new data, saving significant amounts of tape usage.

With 24/7 data access capabilities, IBM TSM SURE is flexible in backup data objects including: TSM Extended Edition, TSM for SAN (for LAN-Free backups), TSM for Databases, TSM for Email, TSM for Virtual Environments, TSM for ERP, TSM Space Management, Fastback, Fastback BMR, Fastback for Exchange.

TSM for SURE product package for businesses with a total storage capacity of less than 100 TB.

In addition to Windows, businesses can install this software on many other operating systems such as Unix, Linux, etc., creating maximum flexibility in different working environments.

In 2011, IBM TSM SURE was voted the best data backup and recovery solution organized by CRN (US technology news site).

IBM TSM SURE products are officially distributed by FPT Distribution Co., Ltd. through agents nationwide.

Especially from now until December 31, 2012, customers will receive up to 50% off and receive the new 32GB iPad worth 18,057,600 VND when buying this professional backup solution.

To experience the product, demo demonstration as well as the most thorough consultation, enterprises can contact hotline: 0985.938.004 or email: [HuyHM@fpt.com.vn](mailto:HuyHM@fpt.com.vn) (Mr.Huy).
