

Intel - Comprehensive solutions, handling all technological challenges

Comprehensive solutions to solve technological challenges from INTEL with an extremely rich ecosystem

Intel Corporation (Integrated Electronics) was founded in 1968 in Santa Clara, California, USA. In the early days, Intel was a company specializing in manufacturing products such as microprocessors for computers, motherboards, flash drives, network cards and basic computer components. Intel's products are increasingly diverse and complete.

Over time, Intel has continuously changed from quality, personnel and applied the most advanced and modern technological changes into its products. To date, Intel has always been a pioneer in the computer components industry, especially computer chips. You can see advanced technology solutions from Intel at the landing page: <https://hanoicomputer.com/intel>

1. PC Gaming Using Intel CPU

With advanced technology in building microprocessors, as well as contributing to creating "monstrous" gaming machines, Intel Gaming PCs meet all the requirements of: Multi-purpose, flexible price, good hardware compatibility, optimized for gaming. You can refer to more at:

In addition, the SUMMER PROMOTION program 'BUY INTEL NUC - GET A WIRELESS MOUSE KEYBOARD FOR FREE' is still being extended until June 25 at TipsMake nationwide. Hurry up to own an INTEL NUC product now.

3. Intel Processor - High Stability and Outstanding Performance

With a wealth of accumulated experience and quality products spanning all segments, Intel is leading the way in becoming the world's largest desktop microprocessor manufacturer.

a) Intel® Core™ Processor

1. Work, play, and create with serious performance, integrated graphics, and 4K display support

b) Intel® Xeon® Processor

1. Get powerful performance and scalability for cloud computing, advanced analytics, and artificial intelligence.

c) Intel® Pentium® Processor

1. Accelerate 2-in-1 mobile devices, laptops, desktops, and all-in-one (AIO) PCs with feature-rich integrated processors

d) Intel® Celeron® Processor

1. Supports basic consumer applications, HD video and audio, and web browsing with reliable performance and great value.

You can refer to more Intel processor products available at TipsMake here: https://www.hacom.vn/cpu-intel?other_filter=in-stock&sort=price-desc

4. Intel SSD - Leading Technology and Performance

Intel SSDs deliver speed and perfect compatibility with motherboards, delivering super-fast performance.

7. vPro Platform

In addition to the exciting technology products in the Intel ecosystem, the company also brings users significant improvements with the Intel vPro® platform - Designed for Business. The superior Intel vPro® platform delivers great experiences for both end users and IT teams—no matter where they work.

Featuring a new processor architecture that delivers enterprise-class performance, comprehensive hardware-based security features, and an optimized user experience, 11th Gen Intel® Core™ vPro® mobile processors and Intel® Xeon® W-11000 processors for mobile workstations create a superior computing platform for business.

a) Trusted Platform

PCs based on the Intel vPro® platform meet the demands of today's dynamic business environment. The cutting-edge Intel vPro® platform features built-in advanced security solutions, powered by an architecture that delivers performance to boost employee productivity while helping to lower total cost of ownership.

Enterprise-grade performance

- Increase productivity and improve employee experience wherever work happens.

An integrated, more secure platform

- The Intel vPro® platform provides more robust protection for valuable corporate assets with comprehensive hardware-enhanced security features.

Modern IT Management Capabilities

- Cost-effectively manage devices from initial provisioning to decommissioning, no matter where the device is.

Reliable and stable platform

- Cross-industry validation of rigorous use cases and hardware interoperability help keep the system stable, even in changing system environments.

b) Intel vPro® Platform Advantages

With business-class laptops based on 11th Gen Intel® Core™ vPro® processors and mobile workstations based on Intel® Xeon® W-11000 processors, businesses can empower their employees to get more done—anywhere—with innovations that deliver:

1. Enterprise-grade performance for incredible productivity and collaboration
2. Comprehensive security features based on the hardware your business uses
3. Optimal user experience across the enterprise

The Intel vPro® platform is a cutting-edge platform for business. Through a suite of integrated and complementary products and technologies, IT has the tools it needs to help secure business devices and data, simplify systems management, and help employees work efficiently from anywhere.

This granular level of asset control also enables IT to better implement corporate policies—including custom imaging, security service activation, and device provisioning—and confidently manage the complexities of the machine lifecycle. The Intel vPro® platform is also flexible and scalable, allowing IT teams to customize devices to meet the unique requirements of end users across industries.

By investing smartly in effective IT solutions that enable IT teams to work smarter, businesses can innovate better, increase overall efficiency, ensure business continuity and grow.
