

# Intel CPUs continue to get stuck, Microsoft is forced to release up to 7 different updates for Windows 10

This is not the first time Microsoft has had to release an update to patch the Intel CPU, but this time it has released seven different updates for each version of Windows 10, rather than sharing the same version. previous times.

Intel CPUs continue to catch bugs, which Microsoft recently had to release a microcode update for Intel CPUs to fix.

This is not the first time Microsoft has had to release an update to patch the Intel CPU, but this time it has released seven different updates for each version of Windows 10, rather than sharing the same version. previous times.

So, if you find your CPU on the list of affected, users must check their device is running Windows 10 operating system version how much. From there, select the appropriate patch for the version of Windows 10 you are using to download and install. Windows 10 will not make itself available to you as before.

Microsoft released up to 7 different updates for Windows 10 to patch vulnerabilities on Intel CPUs.

List of affected Intel CPUs includes:

1. Denverton (Atom C3000 series).
2. Sandy Bridge, Sandy Bridge E and EP (2000 and 3000 series).
3. Valleyview (Atom Z3000 series).
4. Whiskey Lake U CPUs (8000U series, 5000U series, and 4200U series).

If your CPU is on the affected list above, select one of the updates for each Windows 10 version below to download and install:

### **Windows 10 version 1903/1909: KB497165**
