

Intel will bring the laptop price down to only VND 6 million

The new low-cost Intel Atom processor line not only helps laptops cost less but the tablet also has just over 3 million VND.

The new low-cost Intel Atom processor line not only helps laptops cost less but the tablet also has just over 3 million VND.

Intel expects to reduce the price level for current laptops and tablets.

In the **second quarter financial results** announcement, Brian Krzanich, CEO of Intel, said the company will cut the price of half of the Intel Atom processor line for mobile products and price notebooks. cheap. As a result, future laptop models will cost only **300 USD** (equivalent to over 6 million VND) and tablet is from **150 USD** (more than 3 million VND).

"We are putting a lot of effort and hope into the Atom chip , " said Brian Krzanich. Intel representatives also said the price of laptops that support touch screens and hybrid designs will also drop to around **\$ 400**.

The world's largest processor manufacturer also believes with great technological improvements. The number of tablets with Intel Atom Bay Trail chips will be four times higher than the first quarter of this year.

Intel's latest report showed that the company had revenue dropped from **\$ 13.5 billion to \$ 12.8 billion** over the same period last year.
