

Interesting applications come from heat blowers (heat generators)

Hot air gun is a specialized hand tool capable of peeling paint and varnish, forming, welding and making hot air shrinkage Besides, this tool also brings many other benefits. more, please join us in the following article:

With just a hot air blower, you can do a lot of different interesting things. Here are 11 useful applications from the heat detector that surely everyone who wants to see now wants to own such a versatile tool.

Wrap plastic film

You can use the hand held machine to wrap the plastic film when wrapping the gift. So the present will become more neat, more stylish and more beautiful.

Remove welds by fusing

Fusing to remove welds with hot air guns is one of the common applications made by many mechanics. With this application, people often choose high temperature.

Dry the paint

The paint has just been scanned but wants to dry immediately to keep the aesthetics of wood and new walls, the use of heat exchanger is simple and easy to do, both easy to implement and save time and quickly Protect the new paint finish.

Remove old paint

It is so interesting that this versatile tool not only dries up the new paint but also removes the old paint layer, which is both fast and safe without the use of cleaning solutions.

Plastic welding or bending plastic pipes

With the allowable temperature of the hot air gun, you can use this tool to weld PVC materials and tighten the glue or to bend water pipes with a simple operation - Use a gun along with a special cable, it is possible to bend PVC pipes at any angle without the help of adhesive or elbow. Not only convenient but also much faster when saving time.

Connect plastic tarpaulin

Use a slit end attached to the heat end of the gun, then place the two edges of the plastic tarps and quickly press it with the roller after you have finished.

Suitable for making large tents, tarpaulins, used in transporting by waterproof trucks or tarpaulins for swimming pools, or any job that requires large plastic tarpaulins.

Soften glue

Hard residual hard glue to peel off by hand? So, let's try the hot-air steamer! Simply put, this tool will melt the adhesive with hot heat, helping you clean the surface quickly.

You can also use this tool to peel off decals, posters, .

Upholstery

The cushioned material is mainly made of vinyl material so just using the heat from the heat machine will make the plastic soft and quick to wrap around the object.

Make candles

The heat exchanger can create a perfect candle by flattening the rough surface of the wax (easily removing damaged parts).

Flattening the surface of the material

For small ugly protrusions, you can remove it yourself with a heat gun. Set in moderate heat mode and warm the necessary position, then quickly apply dry ice to cool the metal surface quickly. This simple process will make the convex concave return to its original flatness.

Coal furnace group

If the coal group is traditionally like using firewood, you can use a heat exchanger to blow the hot air directly into the coal to help the furnace group quickly create smoke.

Some types of guns are cheap and genuine, below 1,000,000 VND

Black & Decker KX1800 hot air blower

1. Capacity: 1800W
2. Wind speed: 500 - 650 liters / minute
3. Temperature: 300 - 580 degrees Celsius
4. Power cord length: 3m
5. Product weight: 1kg
6. Brand: America
7. Made in China
8. Warranty: 6 months

Total TB1206 heat blower

1. Capacity: 2,000W
2. Temperature: 350 - 550 degrees Celsius
3. Product weight: 0.95kg
4. Brand: Germany
5. Made in China
6. Warranty: 6 months

To find a good, genuine heat detector, you can refer to the following 2 reputable addresses:

1. META Hanoi: No. 56 Duy Tan, Dich Vong Hau Ward, Cau Giay - Tel: 024.35.68.69.69.
2. META TP. Ho Chi Minh City: No. 716-718 Dien Bien Phu, Ward 10, District 10 - Tel: 028.38.33.33.66.
