HD-DVD burner, Intel's latest Penryn processor and up to 1 Terabyte of storage is one of the most advanced features that has appeared on some of the recently exhibited laptops at the Electronics Exhibition. International Consumer CES this year.

Gateway P-Series FX Edition: For gamers

This laptop series is designed specifically for fans of games and entertainment. They are equipped with 17-inch LCD monitors, nVidia GeForce 8800M GTS compatible DirectX 10 graphics cards, which are among the strongest. Along with the latest 802.11n Wi-Fi standard, Gigabit Ethernet wired LAN, along with HDMI port and eSATA ports. The flagship P-171XL FX version of the series is equipped with the Intel Mobile Extreme X7900 processor, 400GB hard drive, and HD-DVD drive for \$ 3,000 (in the US). Other models range in price from \$ 1,350 to \$ 2,000. Gateway will launch this FX laptop market this month.

Qosmio G45-AV690: Penryn chip and HD-DVD burner

Electronics firm from Cherry Blossom Toshiba has updated features for gaming laptops and powerful multimedia applications. The company's latest, \$ 3,199 Qosmio G45-AV690, is the first laptop to use Intel's latest Peryn mobile chip, which has integrated an HD-DVD drive (previously only equipped with an HD-DVD drive only. read). On the other hand, this 1080p system is equipped with an HDMI port to connect to external HDTVs, as well as an HDTV tuner for direct viewing and recording of content. This is also the first laptop to support Toshiba's Regza Link feature, which can control other Regza Link devices such as TVs and remote controls. Moreover, nVidia GeForce 8600M GTS graphics card supports DirectX 10 technology, the most advanced technology for Microsoft games.

Asus M50: 1 Terabyte memory capacity

If this laptop still does not have enough space for your data, then it will be . bundled! Asus has just released the M Series laptop family, including three models: M50 (illustration), M50S (adding TV tuner) and M70. In particular, all three are equipped with two Hitachi Travelstar 5k500 hard drives with a total capacity of up to 1 TeraByte. The M50 has a 15.4-inch screen with a light sensor to automatically adjust the screen brightness; nVidia GeForce 8600M GTS graphics card, HDMI port and a webcam can rotate 240 degrees.

Fujitsu LifeBook T2010: Access to super-fast broadband network

This laptop hybrid tablet is equipped with a 12.1-inch LED backlight display. This is the first laptop to support high-speed HSUPA (High-Speed Uplink Packet Access) capability from AT&T. The device weighs only 1.59 kg, and Fujitsu assured that its battery can remain active for 11 hours. Sensitive information is securely protected by security loops such as fingerprint login, TPM chip, and smart-card slot. The starting price of the product is \$ 1,599, not including AT&T BroadbandConnect service contract. The product will be available in the market in March.

Lenovo IdeaPad Y701: ThinkPad game machine!

Lenovo's IdeaPad Y710 changes the traditional notion that the ThinkPad family is only for enterprise environments. Now Lenovo is bringing ThinkPad into consumer territory with a 17-inch widescreen desktop-replacement product that is friendly to the game. The Y710 is equipped with 4.1 speaker system, touch-sensitive media control buttons, ATI's Radeon HD high-definition graphics card, HDMI port and a Blu-ray drive option. It is also built-in Webcam with face detection software. The product has started to be sold at a starting price of \$ 1,199. The 15-inch version and the Y510 family cost a minimum of 799 USD.

Fujitsu LifeBook U810: Ultraportable laptop

U810 is a laptop-based hybrid with a 5.6-inch LED backlight. As T2010, the product is also supported by AT & T's high-speed HDUPA network technology to keep you online when you leave the Wi-Fi hotspot.

Lenovo confirmed that its 4-cell battery allows it to work continuously for 5.5 hours. The U810 is also equipped with security features such as fingerprint reader. This laptop has just been commercialized with a starting price of 999 USD not including AT&T HSUPA service fee. The model supporting BroadBandConnect service will be available in March.

HP Pavilion tx2000: Attractive tablet

If you need a laptop that is good for both work and entertainment, think of HP's latest Pavilion tx2000, which currently has a starting price of \$ 1,299. Laptop has a 12-inch widescreen (widescreen) screen that can be rotated 180 degrees and can be covered on the keyboard to turn into a true tablet. It is equipped with software that supports QuickPlay multimedia applications, as well as a remote control that can easily be hidden in ExpressCard slots. When working, a fingerprint reader and a rechargeable stylus assist you in entering data and erasing data.

Lenovo U110: Red compact laptop

This laptop features red and delicate patterns as well as touch-sensitive controls above the regular keyboard. Weighing more than 1 kg, the U110 uses an 11.1-inch screen and has a built-in Webcam. It has two options for using a 64 GB SSD semiconductor drive or 120 GB hard drive. Because of the lack of an integrated optical drive, you have to have a USB built-in for flexible backup and data exchange. The price of the U110 has yet to be announced, but the company promises to market it by the end of March.

HP HDX 9000: Redesign of Dragon

If HP's large 20-inch screen with the Dragon last year resonated, this year it has continued to upgrade this product to new heights. HDX 9000 is equipped with a new processor, supports 1080p video, advanced nVidia GeForce 8800M GTS graphics card and DirectX 10 technology optimized for games.
