

Invite to admire Concept Galaxy Note 10 with perforated screen, 4 beautiful cameras

Recently, designers at Concept Creator built a Concept of the Samsung Galaxy Note 10 with 4 cameras and a border-over screen.

Recently, designers at Concept Creator built a Concept of a Samsung Galaxy Note 10 with 4 cameras and a borderline screen based on leaked information about this smartphone. Accordingly, the Galaxy Note 10 will be equipped with the most modern hardware along with the extremely luxurious and delicate design.

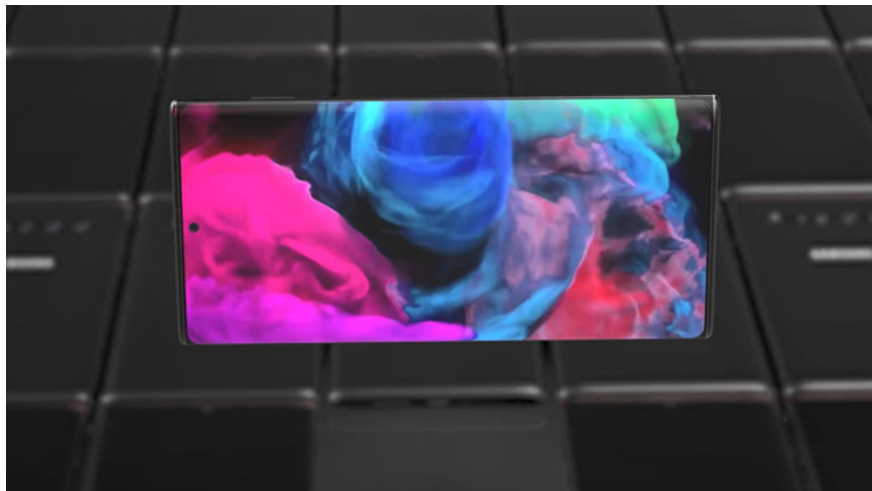

This Galaxy Note 10 has a fairly square shape, sturdy. The screen of the device is also curved overflow to the 2 edges like 'predecessor'.

Note 10 also owns the Infinity-O design, but unlike the recent Galaxy S10, the camera's selfie is located in the middle of the upper corner.

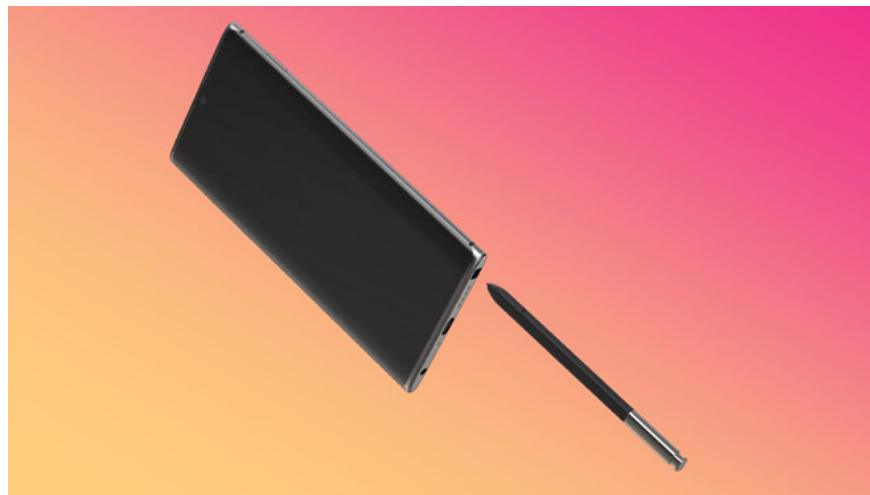

This smartphone shows vibrant, vivid, realistic and high brightness colors thanks to its Super AMOLED panels.

The back of the machine is made of glass. System of 4 rear cameras (including a normal lens, a super wide-angle lens, a telephoto lens that supports optical zoom and a ToF camera) is placed horizontally.

The S Pen is equipped with many new features, capable of detecting the correct pressing force, and still placed on the bottom edge.

The power of the machine comes from the most powerful Snapdragon processor from Qualcomm. In addition, you also support 5G and AI technology.

You can admire the construction of the Samsung Galaxy Note 10 in the video below:
