

Invite to admire iPhone folding screen with beautiful design hard to resist

The iPhone fold screen will be called iPhone X Fold, owning two screens, a fold-in design and a square camera with three lenses.

The iPhone fold screen will be called iPhone X Fold, owning two screens, a fold-in design and a square camera with three lenses, as imagined by designer Antonio De Rosa.

When folded, Apple's smartphone uses an external screen with rabbit ears, a 6.6-inch size and a display rate of 93.6%. The back of the device is equipped with a 3-camera cluster: 1 lens capable of shooting with wide-angle with a resolution of 12 megapixels, a 12 megapixel telephoto lens and a standard 16 megapixel lens.

When in the open state, iPhone X Fold becomes a tablet with an 8.3 inch screen with overflow design (96.6% display rate). 'Perforated' dual-camera device with 10 megapixel and 8 megapixel sensors.

iPhone X Fold has two optional versions with memory of 512 GB or 1 TB. The starting price for Apple's folding smartphone is \$ 1,999, higher than Samsung's Galaxy Fold (\$ 1,980).

Instead of a rectangular box like before, iPhone X Fold will be placed in a triangle box.
