

Invite to admire the concept model Sony Xperia Slide, smartphone with two impressive sliding screens

Recent designers shared a visualization of the design Sony Xperia Slide that looks like two smartphones connected by a side-slide hinge.

Two-screen phones can become a trend since 2019 with the participation of several companies including Samsung, Huawei, Xiaomi, Oppo, Motorola and LG. Recently, Sony has also officially participated in this race but different from the idea of ??two-screen phones that appeared as double-fold, the company's two-screen smartphone uses sliding design.

Recent designers shared a visualization of the design Sony Xperia Slide that looks like two smartphones connected by a side-slide hinge. Two screens can slide horizontally to form a large 8-inch 4K screen.

In terms of configuration, the designers visualized the Sony Xperia Slide which will have 8GB of RAM, internal memory with options of 128GB / 256GB / 512GB. In addition, the two-screen smartphone is also equipped with a 13MP selfie camera integrated AI artificial intelligence, dual stereo speaker system, fingerprint sensor under the screen.

Please see the video below for more details about this Sony Xperia Slide concept.
