

Invite to admire the iPhone 2X build with a unique slider screen design

This build gives users a whole new perspective on the new generation iPhone in the future.

The ConceptsiPhone account recently posted a video of the build of the iPhone X2 with a unique slider design, the screen overflowing completely on all four sides. This build gives users a whole new perspective on the new generation iPhone in the future.

In order to optimize the front display space, the iPhone X2 is designed with the same screen as the Xiaomi Mi Mix 3 or Honor Magic 2 products.

The front camera has a resolution of 48 MP and the Face ID face detection sensor will be placed in the slide area hidden under the screen. The TrueDepth camera cluster of the iPhone X2 in this build has been designed to be slimmer and more compact than before.

In this build, the fingerprint sensor is integrated into the Apple logo on the back.

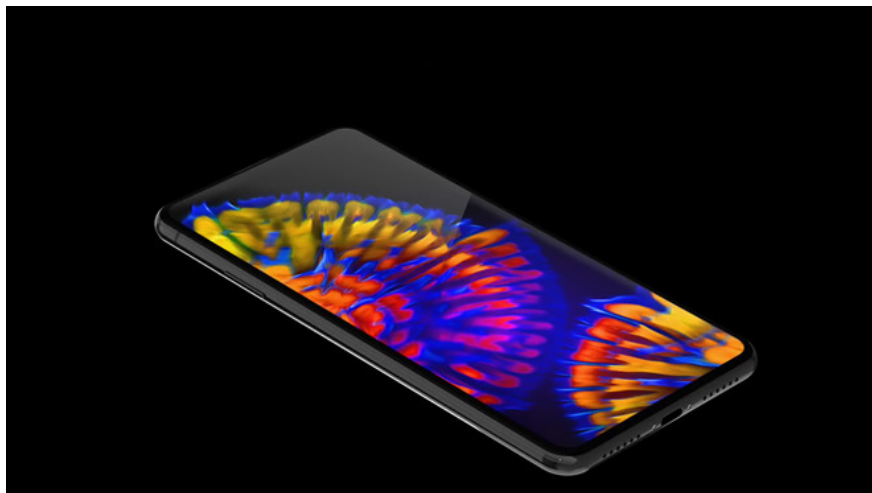

The iPhone X2 has a full screen overflow on all four sides and has a resolution of 3,000 x 1,386 pixels.

The main camera system with 4 24 MP resolution lenses, capable of taking 3D photos stored in an area.

iPhone X2 will be equipped with Apple A13 processor and support fast charging with USB-C charging port.
