

Invite to admire the Samsung Galaxy Stick concept with a pole roll screen like LG's TV

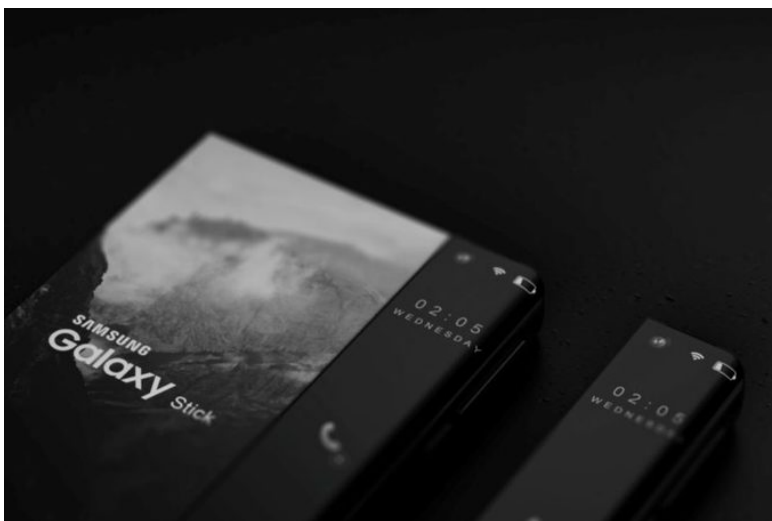

If you are looking forward to a breakthrough in smartphones, the Samsung Galaxy Stick concept has a polar scrolling screen like LG's TV shared by Yaho Design designers below that will probably please you somewhat.

If you are looking forward to a breakthrough in smartphones, the Samsung Galaxy Stick concept has a polar scrolling screen like LG's TV shared by Yaho Design designers below that will probably please you somewhat.

According to Yaho Design designers, the idea of ??Samsung's future flexible screen smartphones was inspired by LG's roll-screen TV models on display at CES 2019 in Las Vegas (USA). the begin of the year.

In this concept, the Samsung Galaxy Stick has an overflowing and expandable screen that looks like a mini TV controller thanks to its flexible scrolling screen.

When rolled, its screen will roll straight into the empty body.

Galaxy Stick's body is thicker than a regular smartphone, but narrower.

Galaxy Stick also has a secondary screen on the camera body that allows users to directly perform operations on them such as answering messages, calling, fingerprint touch .

1. See the impressive BOE's 12.3-inch screen
2. This is a durable smartphone, falling from a height of 31km above the ground but only slightly damaged on the screen glass.
