

Invite to admire Windows 10 style macOS, very interesting

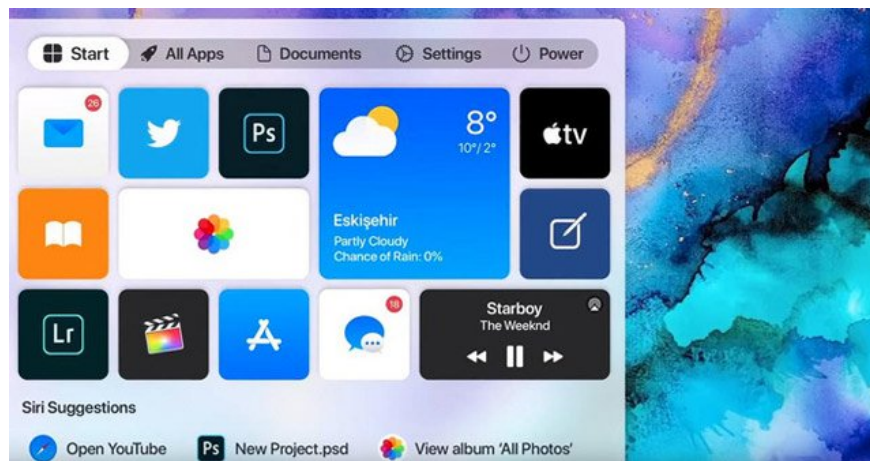

Kamer Kaan Avdan has implemented a Windows 10 version concept with improvements introduced by Apple in macOS.

In the operating system market, Windows and macOS are considered to be the rivals of the past. To help their products gain an advantage over rivals, both Apple and Microsoft are trying to develop new features.

Microsoft is trying to turn Windows 10 into an operating system that serves every customer. The technology giant has equipped Windows 10 with a range of features to support work, play games, can run on a variety of devices and is optimized for touch.

Microsoft's new direction on Windows 10 has been supported by many users, but there are some suggestions that it should learn from Apple to make Windows look softer, like macOS.

To satisfy the dreams of some users, Kamer Kaan Avdan has implemented a Windows 10 version concept with improvements introduced by Apple in macOS.

In this concept, the Start menu is improved with Apple-designed live tiles, with rounded corners. Appeared iMessage, Apple's messaging platform on Windows. The redesigned Action Center, while inspired by Apple's Control Center, is perfectly suited for Windows 10. The slider to adjust the screen brightness on the Action Center is sure to make Microsoft fans more excited than the current brightness adjustment slider.

1. Decode the 'leaf' icon that appears in the Windows 10 task manager
2. Microsoft sent a 'closed screen' notification to persuade Windows 7 users to upgrade to Windows 10
