Smartphone Tycoon is a simulation game about the fierce competition of the smartphone market that is being released for free on both Android and iOS platforms. With unique and creative gameplay, Smartphone Tycoon is currently attracting an adult player even though it has just been released in the mobile game market not long ago.

Like other simulation games, Tycoon Smartphone will play a wealthy investor who wants to set up a phone manufacturing company with the ambition to dominate the mobile market. First, you will have to embark on branding, offering unique ideas for the company's first phone models as well as business strategies. Your opinions will determine the company's success or bankruptcy.

Tycoon Smartphone simulates quite the basic elements of the phone business as well as the fierce competition of this segment. Graphics in the game are quite detailed with simple tones, not too picky. The sound system is similar to the player's actions.

Do Smartphone Tycoon is a free game, so have ads included. In order to opt out of advertising, players must spend a certain amount of money through the in-app purchase feature. In addition, to unlock the entire feature you can buy the Premium version.
