

Invite to download Luminar beta for Windows - Best Imaging Software 2017 on macOS

A company specializing in developing iOS applications with many users named Macphun has just put Luminar, 'powerful photo editing software' on Windows as Beta.

This application has won the IPA award for Best Imaging Software 2017 (the best photo editing software), supported by advanced image editing technology created by MacPhun itself, giving users RAW image processing original, supports a variety of cameras.

1. Download Luminar Beta

This software is designed to make complex photo editing more enjoyable and comfortable, bringing more than 1000 bonus tools, allowing users to be creative with available overlay, preset tools or ideas. shape.

Luminar photo editing software on Windows with many photo editing tools

Users can use the Beta now, while the final version will be available on Windows in November 2017. Watch the video famous photographer Matt Granger introduces this software in the video below.

Luminar will not be cheap, costing between \$ 60 and \$ 100, but the release of this software on the Windows Store also shows that this app store is increasingly being accepted, which brings new and attractive applications in Lately year. Users register to use the Beta [here](#).
