

Invite to play the super exciting 3D version of the dinosaur lost its life game right on the web

Not only is it beautiful, but this 3D version of the dinosaur game is also extremely attractive, and will definitely bring you a completely new experience.

The online dinosaur game is extremely famous in the world. As long as you have a computer or laptop without an internet connection, you can play it anytime and anywhere.

In the game, the player's task is to control the dinosaur to jump and avoid obstacles such as cacti, birds. However, if you feel this version of the dinosaur game is too simple and boring. Then you can try the 3D version that TipsMake introduces below. Not only is it beautiful, but this 3D version of the dinosaur game is also extremely attractive, and will definitely bring you a completely new experience.

1. Step 1: Go to Google's completely new 3D version of the dinosaur game website. You may have to wait a bit for the game to load completely.
2. Step 2: Click on the line Click to Start The Game.

Chrome T. Rex Dinosaur Game 3D

Try:

- Checking the network cables, modem, and router
- Reconnecting to Wi-Fi
- Created by Abraham Tugalov

• [Click to «Start the GAME»](#)

ERR_INTERNET_DISCONNECTED

1. Step 3: The game's interface will appear and the gameplay remains the same, but the only difference is that the game's perspective has become 3D. You just need to control the dinosaur to jump and avoid obstacles by pressing the spacebar.

At first, you won't get used to the new perspective and will feel a bit sore on your eyes, so losing the first few matches is understandable. But then, you will definitely survive longer.

Try this interesting game to have a completely new experience with Google Chrome's dinosaur game. Don't forget to share with everyone the score you achieved by commenting at the end of the article.
