Features of IObit Uninstaller

Keeps PC clean and tidy

Is your Windows PC running slow after installing a bunch of software? Have you ever installed a program but it came bundled with a bunch of other software? IObit Uninstaller 12 will solve these problems for you. It is designed to remove any unwanted software and even bundled software with just one click. Besides, the

expanded database can help users remove stubborn software 5 times more efficiently and 30% of leftover software in half the time than before. That can give users a much cleaner PC.

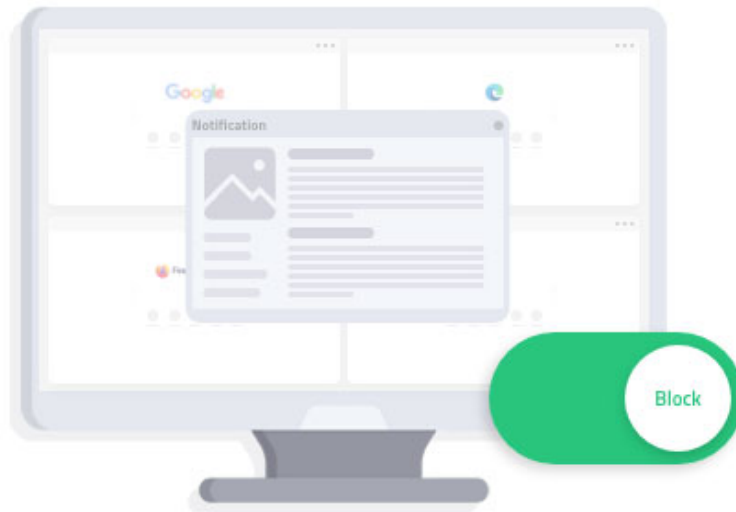

Safe and smooth browsing

Malicious toolbars and plug-ins can record or steal your browsing data, as well as slow down your browser. IObit Uninstaller 12 can remove browser plugins and toolbars to protect user privacy. And the expanded database can identify more malicious plugins and toolbars on Chrome, Firefox, Edge, and Internet Explorer.

Additionally, the new **Browser Notification Block** feature can help users turn off annoying pop-up notifications while browsing online, helping to give you a smoother online environment.

Surf the web securely and without distractions

Are you bothered by spam notifications and pop-ups that keep popping up? You may want to stop them from appearing on a website or all pages on browsers that you have accidentally enabled. Check **Disturbing Notifications** before scanning. The tool will list all the pop-ups that you have allowed on Windows Apps and websites. With just one click, all these annoying pop-ups and notifications will be disabled on Chrome, Edge, Firefox, Opera and all Windows apps. Now you can enjoy a safer, faster and smoother web browsing experience.

Ensures a fast and healthy system

IObit Uninstaller 12 not only uninstalls programs but also cleans up leftovers. When it detects left-linked files, folders, and registry, it will display them on top of the program list to remind you to clean them up in time. In

addition, it can remind you of available updates for all software to ensure the program is safe from attackers looking for weaknesses to infiltrate your PC.
