

# iOS 14 officially launched globally, iPhone users need to do to be able to install?

Apple has officially released iOS 14 version although the new iPhone 2020 has not been released.

Recently, during Apple's new product launch event, CEO Tim Cook said that the official versions of iOS 14, iPadOS 14 and watchOS 7 will be released globally tomorrow, September 17.

Earlier, at WWDC 2020 in June, Apple officially launched iOS 14 and iPadOS 14 for the iPhone and iPad compatible with iOS 13. This version brings many changes and features. new for Apple's iPhones and iPads.

Meanwhile, iPads supported to upgrade to iPadOS 14 include: iPad Pro 12.9 inch (4th generation), iPad Pro 11-inch (2nd generation), iPad Pro 12.9-inch (3rd generation), iPad 11-inch Pro (1st generation), 12.9-inch iPad Pro (2nd generation), 12.9-inch iPad Pro (1st generation), 10.5-inch iPad Pro, 9.7-inch iPad Pro, iPad (7th generation), iPad (generation 6), iPad (5th generation), iPad mini (5th generation), iPad mini 4, iPad Air (3rd generation), and iPad Air 2.

To prepare to upgrade to iOS 14, there are a few things you should do:

**Clean up the internal memory:** If your iPhone has no memory or too low memory is only about 1- 2 GB of free memory, the first thing you need to do is delete unused applications, as well as Images are not important in the camera to free up space.

**Fully charge your battery:** While you can still charge and update iOS 14, it's best to fully charge your iPhone before updating to a new iOS. It is advisable to limit the updating and charging as it can cause your iPhone to overheat, even explode ( *PhoneArena* once reported).

**Data backup:** Even though this is the official version of iOS 14 from Apple, there are still minor technical issues to avoid, if you feel unsure, then it's better to create a *backup*. (backup) data for nothing, it still does not affect data in the machine.
