

iPhone 3G has problems with iOS 4

Apple is investigating reports of the latest iPhone operating system causing problems for iPhone 3G users after a series of complaints on Apple customer support forums as well as tech blogs. .

Apple is investigating reports of the latest iPhone operating system causing problems for iPhone 3G users after a series of complaints on Apple customer support forums as well as tech blogs. .

An Apple spokesman told the Wall Street Journal that Apple was interested in the reports and was considering the issue.

Reports on issues related to iOS 4 were overshadowed by the iPhone 4 phone crash caused by antenna design errors that led Apple to give away free rubber covers for all. customer. But since iOS 4 was released at the end of June, users' concerns have flooded Apple forums.

Accordingly, **the most common complaint is the slower iPhone 3G phone after being upgraded to iOS 4** . In addition, there were complaints about the iPhone 3G dropping battery quickly and becoming too hot. User complaints about common issues such as slower and battery life are not unusual, but using iOS4 on the iPhone 3G seems to make these problems worse when but some users can hardly use this phone anymore.

It seems that iOS 4 is less interested in iPhone 3G users

' *From a dream, this phone is constantly annoying me. I will upgrade to iPhone 4 but I feel angry when Apple forces me by making my iPhone 3G unused.* ", a user wrote on the Apple support forum titled " *Slower iPhone 3G after upgrading to iOS4* ".

Apple's latest iPhone operating system is a strong operating system and at this time, the new iPhone 3G is two years old. iOS4 may not be compatible with the first iPhone version (2G) but it should be compatible with iPhone 3G and iPhone 3GS, although some features like multitasking feature don't work on the iPhone 3G version.

Mobile Gadgeteer blog site on *ZDNet* said that Apple should advise users not to upgrade iPhone 3G. The Unofficial Apple Weblog (TUAW) has officially made recommendations for those who have not yet upgraded their iPhone 3G that ' *don't upgrade your iPhone 3G to iOS4* '.
