

iPhone 7 has a wave loss error that Apple will fix for free

The iPhone 7 models that fail to connect to the mobile network, even within the coverage area, will be provided with a free repair program from Apple.

The iPhone 7 models that fail to connect to the mobile network, even within the coverage area, will be provided with a free repair program from Apple. According to Apple's statement, problems in the components on the motherboard caused the iPhone 7 to display a "No Services" message instead of connecting to an existing mobile network.

Apple will make free repairs to customers who have this problem, and those who fix this problem and have paid will also be offered a suitable refund method via mail.

According to Apple, the affected iPhone 7 models bear the numbers A1660, A1780 and A1779, produced in the period from September 2016 to February 2018. They are mainly sold in China, Hong Kong, Japan, Macao and the US. Customers can check the number on the back of the device to see if their device is affected.

Model number	Country/Region
A1660, A1780	China
A1660	Hong Kong Macao U.S. (includes Puerto Rico and U.S. Virgin Islands)
A1779	Japan

Apple's free repair program only applies to iPhone 7. To ensure the iPhone is eligible for free repair, Apple will check all previous services to ensure that it is affected by the problem. above mentioned.

Before fixing the wave loss error, iPhone 7 needs to fix other problems if there are such as cracked screen.

For repairs, customers can contact authorized Apple service providers, go to Apple Store stores or contact Apple support.

Apple only applies this free repair program to the affected iPhone 7 models sold within two years.
