

iPhone has no duplicate entries [Latest Fix]

iPhone has no duplicate items and this situation is happening on iOS 16, 17? Don't worry, TipsMake will clarify this case further.

iPhone has no duplicate items and this situation is happening on iOS 16, 17? Don't worry, TipsMake will help you understand this situation better.

The Duplicates album is always a favorite in the Photos app available on iPhone. Thanks to this section, you can know duplicate photos and can group photos or delete unnecessary photos. But many 'Apple' users are now complaining that after updating to iOS 16, **the iPhone has no duplicate items** . Learn more about this condition in the next section!

Why doesn't the iPhone have duplicate entries?

iOS 16 brings many new features and for the Photos app, there are two notable new items: Photo Cutout allows users to cut out a subject of a photo and copy it elsewhere. And of course, the second new feature is **Duplicate Detection**.

Specifically, the Photos app will detect duplicate photos/videos contained in your albums. Then, put them in the **Duplicate** section located in the **Utilities** section. However, many users have reported that, after updating to iOS 16, they cannot see the Duplicate section, even when entering the Utilities section.

Cause iOS 16 has no duplicate entries

1. There are no duplicate photos in your photo album, so this item does not appear.
2. Besides, to get Duplicates, your iPhone needs to do something: index your photo library. And with an indexed Photos library, iOS 16 must then analyze photos and videos to find duplicates. According to Apple, the Detect process requires your iPhone to be locked and connected to a power source.
3. Additionally, depending on the tasks running in the background and the size of your photo library, the above process can complete quickly or it can take up to several days.

So it can be seen that if you do not fully meet the above requirements, it is understandable that the iPhone does not appear in the Duplicate section.

How does iPhone have Duplicate items?

Filtering duplicate photos on iPhone iOS 16 is easy with the Duplicate section. Therefore, it's annoying if you don't see this item appear. Don't rush, the tips below will help you fix this problem.

1/ Create at least one Duplicate photo

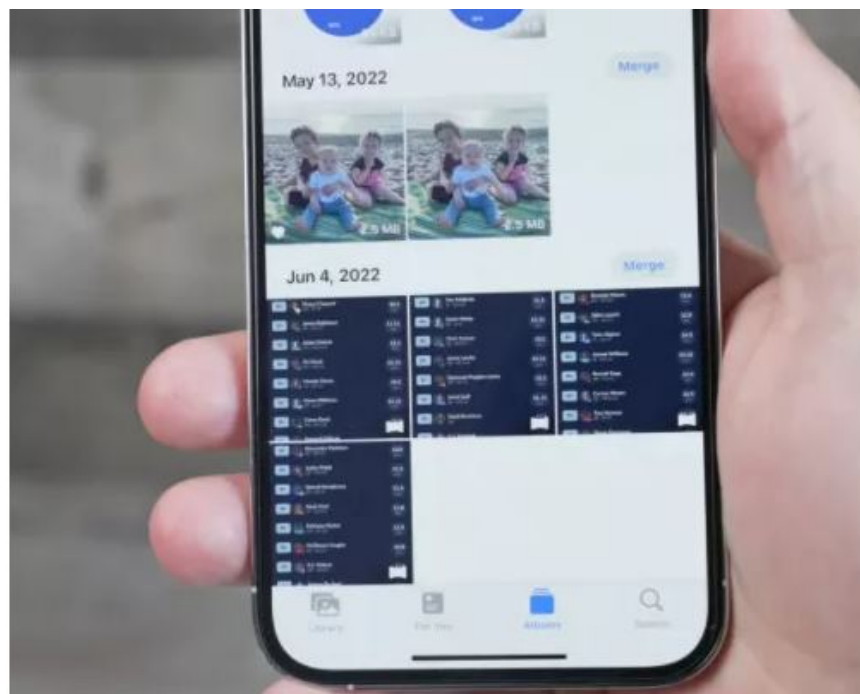

How can the Duplicate section appear when there are no duplicate photos/videos on your device? Therefore, iFan must first create at least one duplicate. Only then can there be data for the system to analyze and put in the Duplicate section.

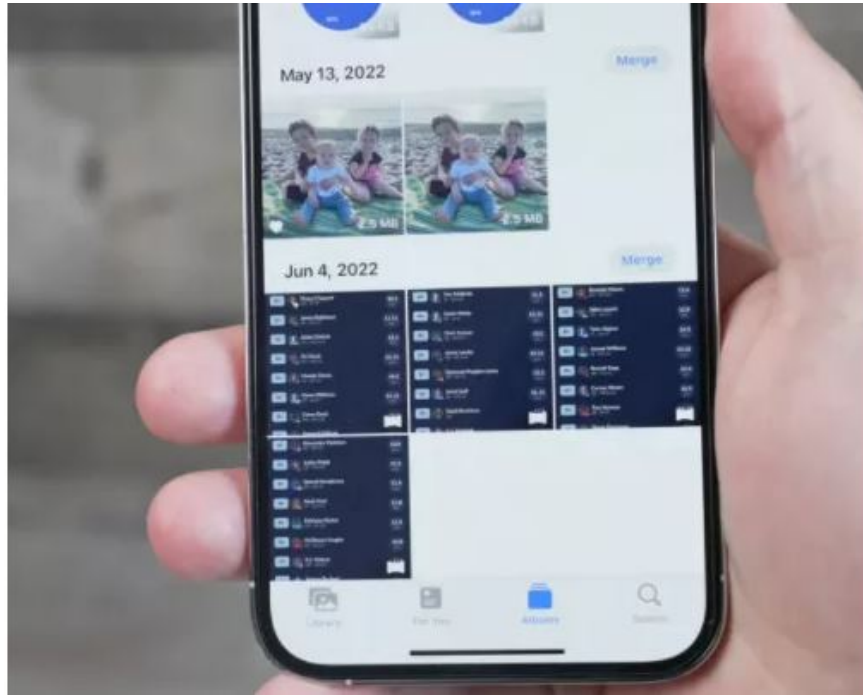

Solution: You create at least 1 copy of any photo/video on your iPhone (Go to Photos > Select any photo > Press 3 dots and select **Copy**) > Then, restart the device device and check to see if the Duplicate item is there or not!

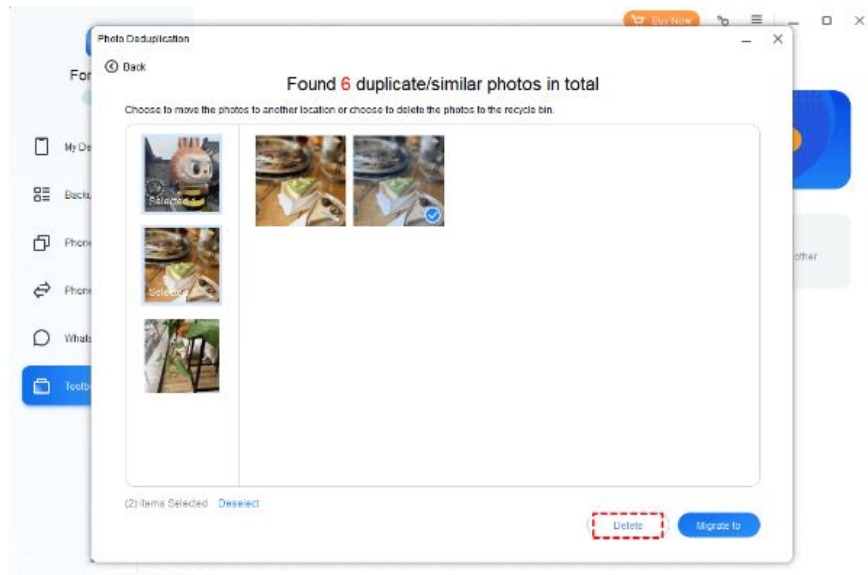

2/ Allow your iPhone to finish indexing Photos

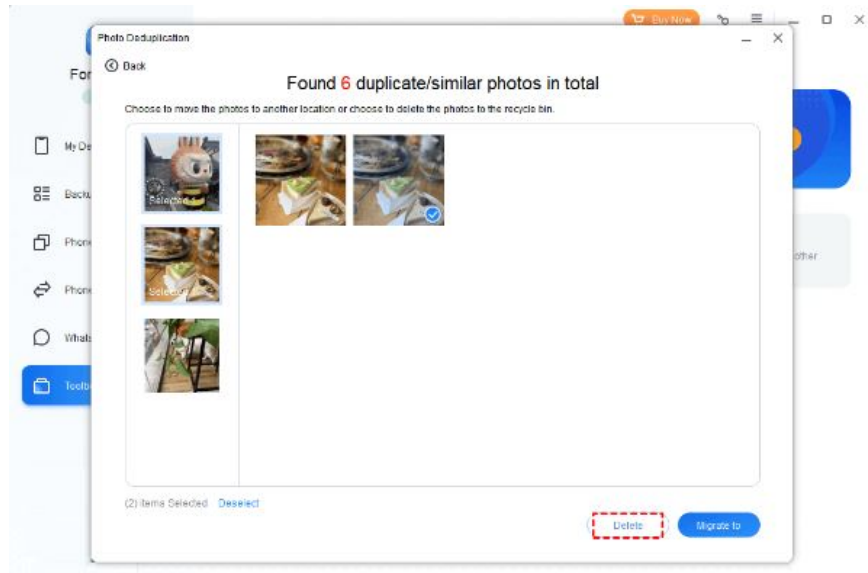

If you find that your iOS 16 does not have Duplicate items, be patient and allow iPhone to index it. You should wait a few days, keeping your iPhone connected to wifi. At night, you can connect your iPhone to a power source. Also, keep the Photos software running in the background. Thus, the iPhone will quickly complete the Photo indexing and the Duplicate section will also appear.

P/S: In case your iPhone does not have a Duplicate section, you can use an iPhone duplicate photo removal app like **FoneTool** . This is installation software for computers, helping users detect and delete duplicate photos on iPhone. The operation is also extremely simple, you download this software, then connect your iPhone to the computer and follow the software instructions.

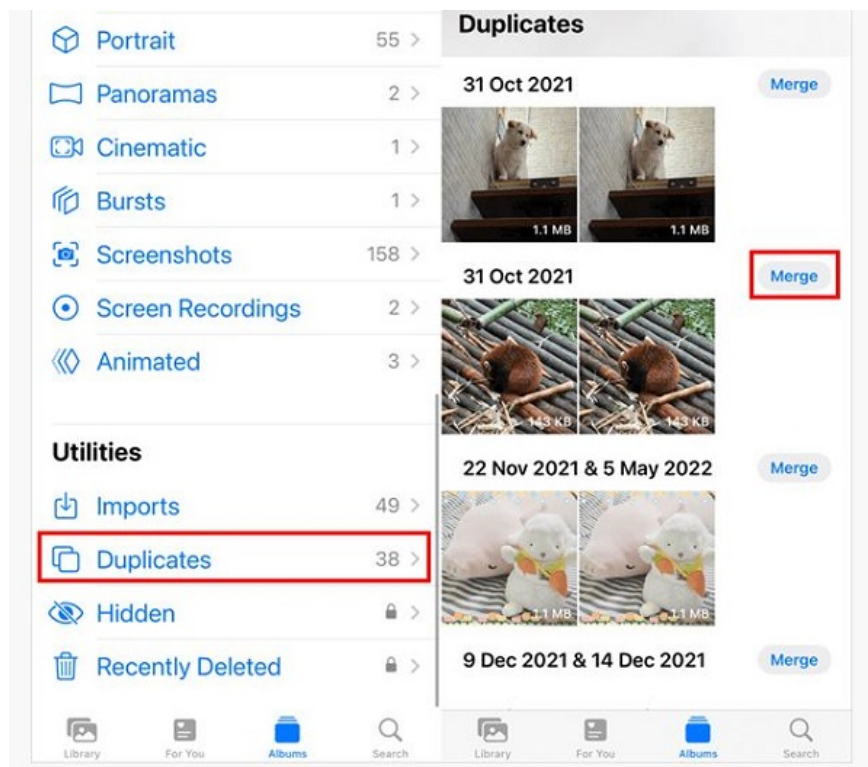

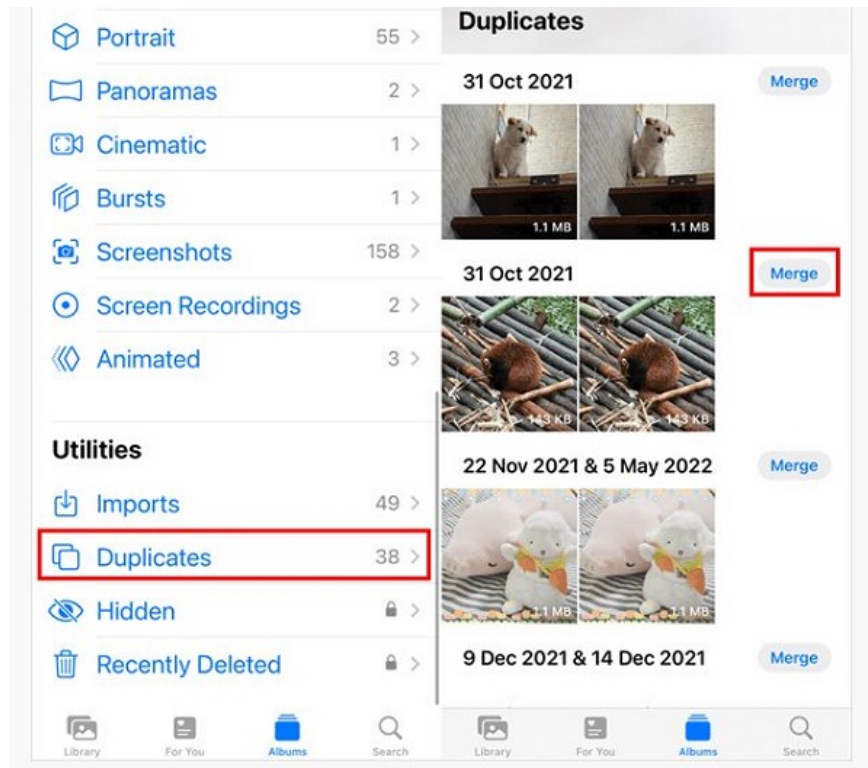

3/ Instructions for deleting duplicate photos on iPhone

Once you have the Duplicate section, you can now delete (merge) similar photos very simply. The way to delete duplicate videos on iPhone is similar!

1. **Step 1** . Open the **Photos** app > click the Album tab at the bottom.
2. **Step 2** . Scroll down to the **Utilities** section and tap **Duplicates**.
3. **Step 3** . You will see all duplicate photos appear in this album. Now you can press Merge **to** delete duplicate photos and you're done .

Above are details on how to handle when the iPhone does not have a Duplicate item. Wishing the Apple brothers a successful recovery!
