

iPhone SE 2020 launched: Design similar to iPhone 8, A13 Bionic chip, dual SIM support, \$ 399

Apple's new low-cost iPhone model has a relatively boring design, in return equipped with many advanced technologies on iPhone 11.

After a long wait with a series of rumors, Apple has officially announced the new generation of iPhone SE today. With a starting price of \$ 399, the iPhone SE 2020 is the cheapest model in Apple's current product segment, but it is still equipped with many features inherited from the high-end iPhone 11 generation.

Design and screen like iPhone 8

Unexpectedly, the iPhone SE 2020 has the same design as the iPhone 8. The front of the device is a thick bezel screen with a Touch ID fingerprint sensor, the back is made of glass and the frame is made of metal. The only difference in the iPhone SE 2020 is the Apple logo on the back is moved down the middle, like the iPhone 11.

The screen of the iPhone SE 2020 is 4.7 inch in size and IPS LCD technology, exactly the same as the iPhone 8. Unfortunately, the iPhone SE 2020 does not have the "Plus" version, which means that users prefer large screen smartphones. will not be interested in this device.

iPhone SE 2020 also inherits iPhone 8 in water resistance. IP67 certification allows this machine to survive underwater at a depth of 1m for 30 minutes.

iPhone SE 2020 has three color versions: black, white and red.

A13 Bionic chip is like the iPhone 11

The most valuable feature of iPhone SE 2020 is performance. With the same Apple A13 Bionic chip as the iPhone 11 and iPhone 11 Pro (Max), the iPhone SE 2020 easily becomes one of the best performance smartphones available today, surpassing many models. Premium Android.

Single camera supports taking photos to remove fonts

iPhone SE 2020 is equipped with a single camera with 12MP resolution, f / 1.8 aperture. It's impossible to confirm that the iPhone SE 2020 camera is the same as the iPhone 11 or iPhone XR, but with the presence of technologies like Smart HDR, OIS optical image stabilization, and Portrait Mode font removal . Users will definitely be able to create beautiful photos with this camera.

Connectivity: Support 2 SIM, Wi-Fi 6

An upgrade of the iPhone SE 2020 that many Vietnamese will be interested in is that this model supports 2 SIMs, which Apple announced included 1 eSIM (electronic SIM) and 1 physical SIM. In addition, it supports the new and fastest Wi-Fi standard currently Wi-Fi 6.

Price and time of sale

iPhone SE 2020 has three versions with the following price:

- 64GB: 399 USD

- 128GB: \$ 449

- 256GB: 549 USD

This machine will allow to order on 17/4 to and officially sold from 24/4.
