

# iPhone XS Max cameras only lost to Huawei P20 Pro in DxOMark's ranking

DxOMark, the world's largest professional camera review website, recently announced the results of evaluating the camera quality of the iPhone Xs Max (Xs and Xs Max have the same camera system).

DxOMark, the world's largest professional camera review website, recently announced the results of evaluating the camera quality of the iPhone Xs Max (Xs and Xs Max have the same camera system).

Accordingly iPhone Xs Max reached 105 points ranked second in the ranking, behind Huawei P20 Pro (109 points).

DxOMark said that the quality of photos and video recording of the iPhone Sx Max is high, the dynamic range is wide, the detail is high and the color is natural in bright conditions.

DxOMARK MOBILE	
109	Huawei P20 Pro
105	Apple iPhone XS Max
103	HTC U12+
103	Samsung Galaxy Note 9
102	Huawei P20
99	Samsung Galaxy S9 Plus
99	Xiaomi Mi 8
98	Google Pixel 2
97	Apple iPhone X

In the video review, the iPhone XS Max with the correct metering system, fast focus and natural colors were excellent at achieving 96 points.

Photos from the iPhone XS Max (left) keep the details outdoors and the subject in the dark over iPhone X (right).

But the iPhone XS Max did not perform as well, even less than other flagship smartphones in the night-time photos and video reviews. Image quality when zoom is not high.

To produce the above result, DXOMark evaluated over 1500 photos and 2 hours of video were taken and shot in both indoor and outdoor conditions.

According to DxOMark, iPhone Xs Max is the perfect choice for smartphone photographers, and compared to the iPhone X, this product is a major upgrade.
