

Is Bfsvc.exe a virus? How to remove bfsvc.exe virus

Bfsvc.exe is a Windows operating system file for Boot File Servicing Utility. This process is very important for the operation of your computer, but it is with legitimate bfsvc.exe.

However, there is a Trojan horse that also disguises itself as this file. This virus adds your computer to a ZeroAccess botnet of tens of millions of other infected computers around the globe. When you are part of a botnet, remote hackers use your computer to launch coordinated network attacks, such as DDoS.

The problem is now on the one hand, bfsvc.exe could be an important Windows system file that you shouldn't delete. On the other hand, it could also be a dangerous Trojan virus that needs to be removed from the system.

This article shows you how to tell whether bfsvc.exe on your computer is a virus or legitimate file. If your PC is infected with a virus, the article will also guide you on how to completely uninstall it from your computer.

What is bfsvc.exe virus?

As mentioned earlier, the bfsvc.exe file could be a virus that adds your computer to the ZeroAccess botnet. Hackers use your system resources and others in the botnet to mine Bitcoin and attack other systems.

In addition to facilitating Bitcoin mining, the virus also attacks the Windows Registry to prevent it from being detected and running every time you start the system. It is difficult for users to remove bfsvc.exe virus from their computer, because this virus can disable the anti-virus program with advanced technology.

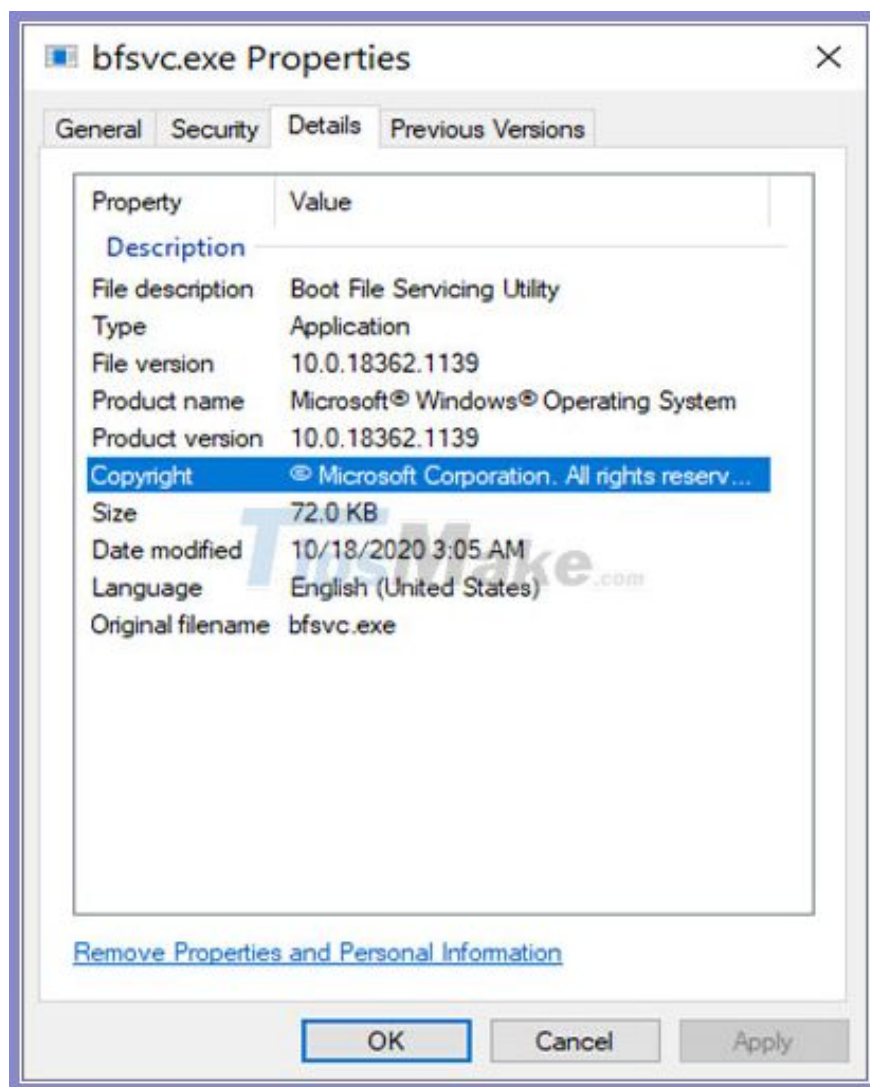

By deactivating the anti-virus software, it makes your computer more susceptible to attack by other similar viruses. Bfsvc.exe actually installs these viruses while on the hard drive.

Hackers can also steal data on systems infected with this virus. If not detected, the bfsvc.exe virus will damage your computer.

How to distinguish between legitimate bfsvc.exe and viruses

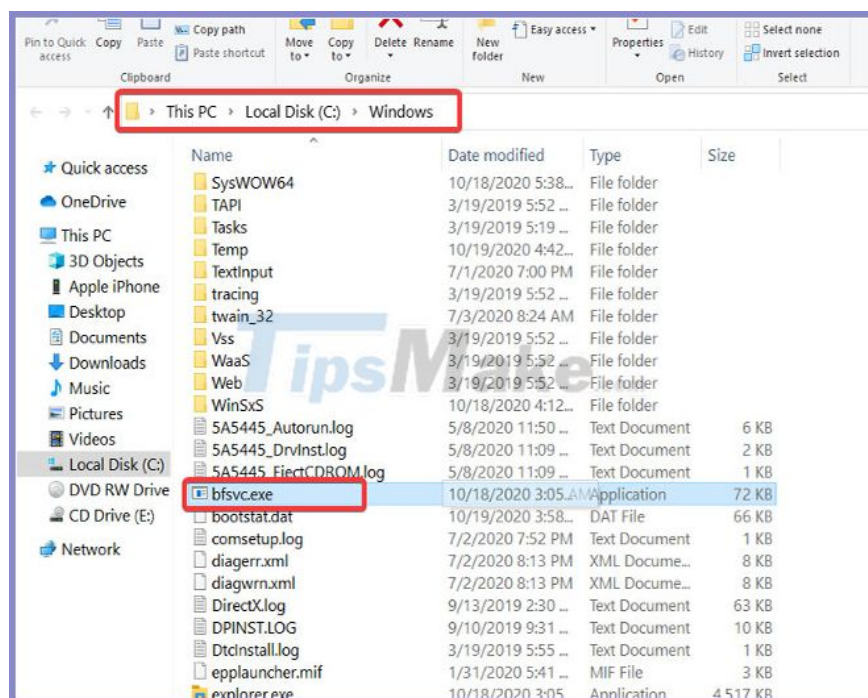

Press the **Windows** key and search for **bfsvc.exe**. Right-click on the file from the search suggestion and click **Open file location** .

Right-click on the file in the folder and select **Properties**. Here, navigate to the **Details** tab and check the file's properties.

First, the malicious bfsvc.exe file will be significantly larger than the legitimate file. The Boot File Servicing Utility bfsvc.exe must be 72kb in size. If the file on your system does not have this size, you may consider deleting it.

The location of the bfsvc.exe file is another factor proving the legality of the file. Ideally, it should be located in a subdirectory of % **WINDOWS%**. If it's in a different location, that process could be malicious.

Another thing to notice in the bfsvc.exe file properties is **Publisher** . Any name other than **Microsoft Corporation** is a sign to watch out for.

How to remove bfsvc.exe virus?

If you have determined that bfsvc.exe on your computer is malicious, you must remove it immediately. You use anti-virus software to remove bfsvc.exe virus from your system.

However, due to the nature of this virus, you may not be able to get rid of it using conventional methods. In this case, you must first start your computer in Safe Mode.

Once in Safe Mode, you can now diagnose your computer with reliable antivirus software. When a virus is detected, remove it immediately with an antivirus program.
