

Is it possible to create a 2nd space on iPhone? – Answer thoroughly

You've heard a lot about the 2nd space feature. How to create a 2nd space on iPhone? How to do it has been revealed in the article

You've heard a lot about the 2nd space feature. How to create a 2nd space on iPhone? Although there is NO, you can still create a second space on your iPhone with a 3rd application. Try it out!

Cloning applications and doubling space brings a lot of convenience to phone users in general and iPhones in particular. This trick is suitable for those who want to use 2 applications at the same time, or have multiple social media accounts. Although the iPhone currently does not have a second space, you can **create a second space on the iPhone** through the App. Let **TipsMake** guide you!

What is Second Space? Is there a way to create a second space on iPhone?

Second Space is a special feature that allows you to open a new, completely independent space on the same device. On each phone it will have different names but the tasks are similar. When using the second space, the entire configuration of the device remains unchanged.

Create a second space that can be applied to perform purposes such as:

1. *Log in to multiple accounts: facebook, Instagram, zalo,.*
2. *Separate work with easy personal management apps.*
3. *Save time logging in and accessing.*
4. *Secure some information (can be combined with application locking).*

Does iPhone have a second space?

Answer: Currently the feature to create a second space on iPhone is not available.

On devices running the Android operating system, this feature is pre-installed in the device settings. You can search for how to create a second space on Android according to each device model.

In the iOS operating system, it is not supported because Apple wants to ensure security on the operating system. Cloning apps or creating a second space can pose some security risks. But users can still Create a 2nd space on iPhone. To create a 3rd party application (second space), you can use a support app as an intermediary to duplicate the application on the iPhone. Note: It still has certain security risks.

Share how to create a second space on iPhone
