Therefore, it is not necessary to turn clothes upside down when drying. You absolutely can not need to turn the clothes inside out when drying in the sun without worrying about fading.

How to hang on clothes

1. Squeeze clothes dry before drying and spread clothes when drying so that clothes dry quickly to avoid attack by bacteria and fungi and also do not wrinkle after drying.
2. Hang clothes in the sun to kill mold and bacteria. Note, do not dry clothes in the sun for too long to avoid fading.
3. Do not dry clothes overnight because dew clings to clothes easily causing moisture, odors, and mildew.
4. Do not dry clothes near the cooking area, clothes are easy to smell greasy and easy to smell.
5. Do not dry clothes close together, making clothes take a long time to dry.

6. It is recommended to wash it a few times when pulling out clothes to remove dust on clothes.

Drying clothes seems to be a simple job, but not everyone does it properly. Hope the above article has helped you know how to dry clothes properly.
