Review Oshima car washer

Compact, compact design

Most models of Oshima car washers are designed to be extremely compact like a water pump, which helps users move easily, preserving not much space.

Durable magnetic motor, core wrapped 100% copper wire

All Oshima car washers are equipped with motors from durable, smooth operation. The motor core is covered with copper wire for high durability, less heat overload when used for a long time, helping to bring high performance at work.

Application for many purposes

Car washing machines are used for the following jobs:

1. Spray garden and barn.
2. Wash motorcycles, wash cars, wash bicycles.
3. Cleaning household tools.
4. Cleaning railing, glass doors.
5. Hygiene conditioners.

Car washing machine is capable of self-sucking water

Family car washers have the ability to draw water from bucket pots without high pressure, and the suction power makes it more convenient to use.

The machine disconnects itself when the trigger is stopped

This is an extremely useful feature that any user wants. When stopping the trigger, the machine gun will automatically turn off the water to save electricity and water.

Healthy spray pressure

Oshima washing machine has a maximum spray pressure of 80 bar for powerful water spraying effect, helping to wash the car or wash the garden clean and shiny without spending much time.

Powerful capacity

Oshima car washers often have a power level of 1.100W - 1.300W, so it is very stable and durable, enabling users to work with the machine for a long time.

Full car washer accessories

Oshima car wash machine will come: pressure spray, water quail, water suction wire, filter and short spray gun to help users do not have to spend any more costs.
