

Is the 'alien skeleton' found in Peru true?

Join us to find out if the alien skeleton found in Peru is real or not!

1. Is life on Mars captured? UFOs and aliens 'found' on Red planet
2. UFOs found in Russia also contain "bodies of aliens"?
3. Google Maps detects 8 strange bases of aliens?

" *Three bones of alien mummies discovered in Peru seem perfectly valid,* " a scientist announced.

These strange mummies with long skulls, arms and legs with only 3 fingers - have been shared all over the world as evidence for aliens to visit our planet.

Dr. **Edson Vivanco** talks about the bodies found in this Nazca cave: " *There are many details that show that those bones are real. To fake a skull with features like It is a very difficult task .* "

' *For example, about the internal structure of the skull, we can see the skull joints, occipital joints, forehead joints and other anatomical features suggesting it is a real skull .* '

Dr. Edson Vivanco made this statement in an interview with British UFO researcher **Steve Meera** , following the *Express* page.

However, he also said that this should not be considered as evidence to conclude for another discovery about aliens nearly 3m long and 3 fingers.

Orthodox scientists have strong doubts about these claims. They said that the bodies could be made from stolen human mummy skeletons and that could be a crime.

The analysis of one of the mummies showed that it had 100% of human DNA, although no conclusions were made yet.

The Mummy Research World Congress said it wanted to express " *interest* " in Dr. Vivanco's statement: "*Mummy research is a science and there is no room for unscientific statements like so* ".

These long skulls may be a product of skull deformation, when the child's head is tied with a cloth or rope to change shape, possibly in religious ceremonies.

Dr. **Vivanco** added: " *There are a number of doctors who have given their personal opinions on this issue without any research. They think these bodies are pieced together without ever being exposed. If it's fake, we'll be the first to say it and report it. Right now, we're still working on finding evidence .* "
